(57) **CLAIM**

The ornamental design for umbrella poles and endcap for patio or beach, as shown and described.

DESCRIPTION

The characteristic features of the design reside in a curved umbrella pole with ornamental endcap and a middle pole section that is half-filled with packed sand and half-filled with concrete for stabilization.

The FIGURE is a side perspective view of the entire umbrella and base thereof, shown in an exploded view for clarity of illustration.

The broken line showing of (the base, crank shaft, tilt mechanism and parasol) is for illustrative purposes only and forms no part of the claimed design.
