(57)**CLAIM**

The ornamental design for a docking station with microclock or micro-compass, as shown.

DESCRIPTION

FIG. 1 is a perspective view of a docking station of a first embodiment of the present invention, wherein the docking station includes a micro-clock shown in broken lines;

FIG. 2 is a top view thereof;

FIG. 3 is a bottom view thereof;

FIG. 4 is a left side view thereof;

FIG. 5 is a right side view thereof;

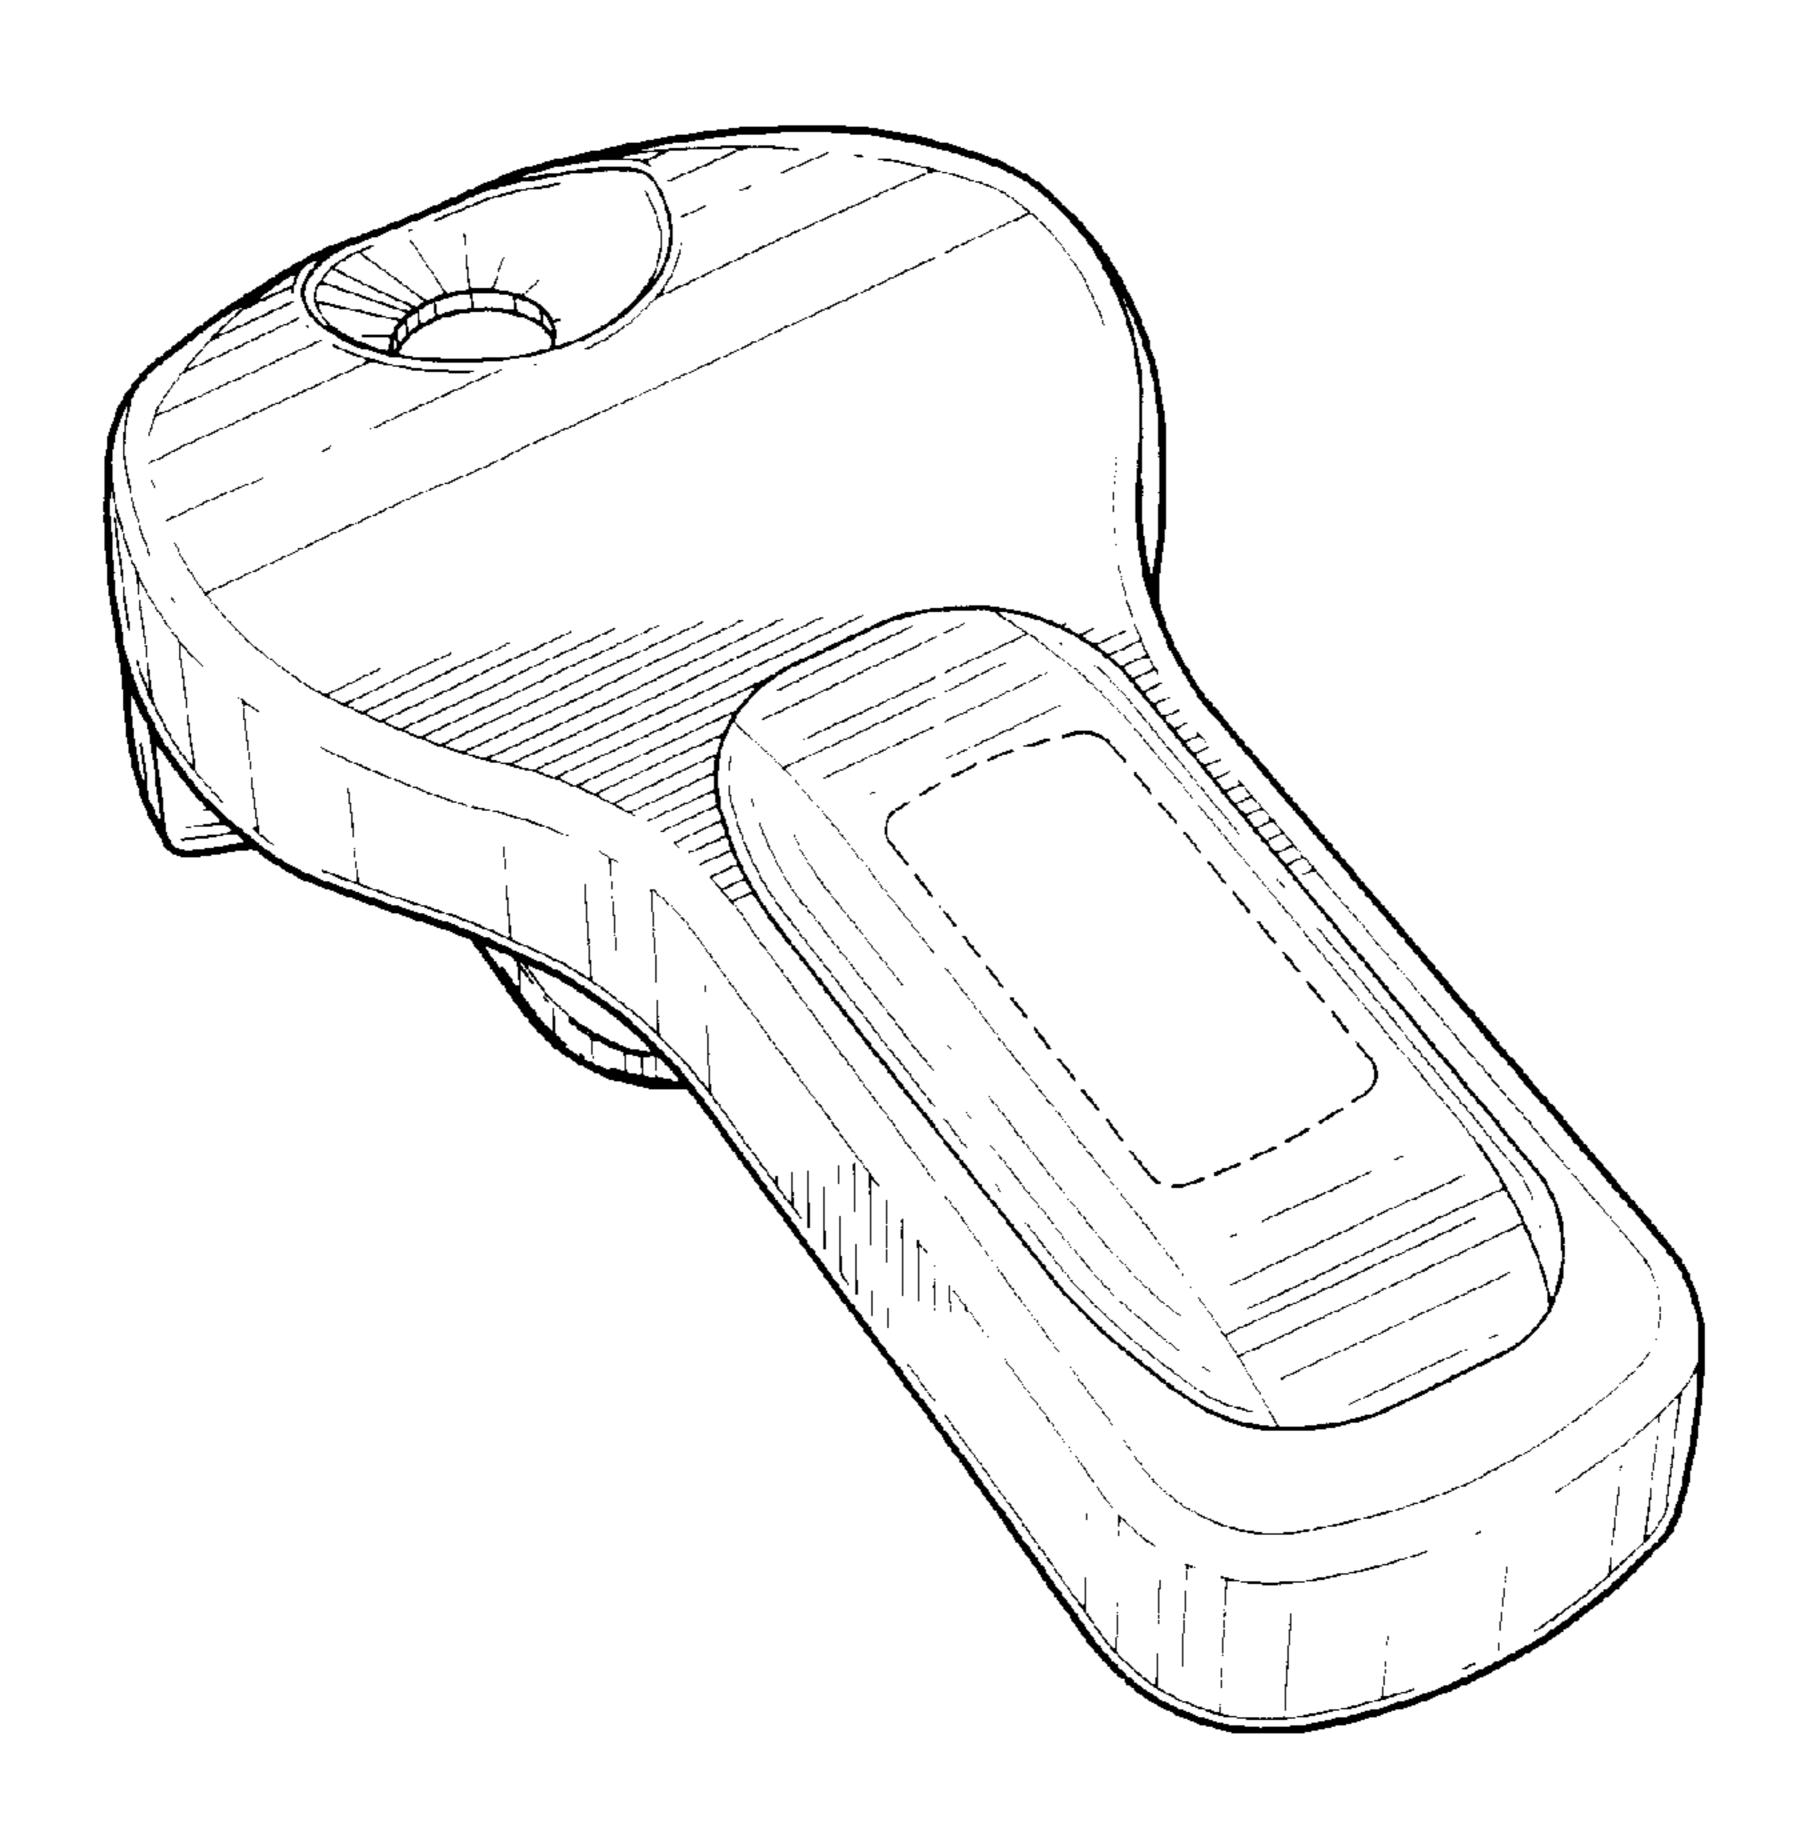

FIG. 6 is a front view thereof;

FIG. 7 is a rear view thereof; and,

FIG. 8 is a perspective view of a docking station of a second embodiment of the present invention, wherein the docking station includes a micro-compass shown in broken lines rather than the micro-clock of FIG. 1, the only difference between the second embodiment and the first embodiment being the accommodation of the micro-compass in the top of the docking station, it being understood that all other surfaces are the same as those of the first embodiment.

The broken line showing is for illustrative purposes only and forms no part of the claimed design.
