(57) **CLAIM**

The ornamental design for a region of a fingerprint scanning device with an illuminated ring, as shown and described.

**DESCRIPTION**

FIG. 1 is a top perspective view of a region of a fingerprint scanning device with an illuminated ring showing my new design; and,

FIG. 2 is a top plan view thereof.

The uneven broken line oval in the Figures represents an unclaimed boundary of the design. The uneven broken line showing of the remainder of the fingerprint scanning device in the Figures is for illustrative purposes only and forms no part of the claimed design. The radial lines extending outward from the outermost solid line concentric oval in the Figures represent illumination from between the two outer solid line concentric ovals in the Figures.

**1 Claim, 1 Drawing Sheet**

FIG. 1

FIG. 2
