(57) **CLAIM**

The ornamental design for a computer peripheral, as shown and described.

DESCRIPTION

FIG. 1 is a top, front, left side perspective view of the computer peripheral.

FIG. 2 is a front elevational view of the computer peripheral.

FIG. 3 is a left side elevational view, the right side being a mirror image thereof, of the computer peripheral.

FIG. 4 is a top plan view of the computer peripheral; and, FIG. 5 is a bottom plan view of the computer peripheral.

The rear view need not be considered.

This computer peripheral may be rack mounted and may be used, for example, for input and output of media data, such as audio and video data. The design also may be applied to other articles such as storage devices, processing devices, communication equipment and other computer peripherals. The characteristic feature of the design resides in the curved shape of the left side of the front panel of the computer peripheral.

The broken line showing of elements in the drawing are for illustrative purposes only and forms no part of the claimed design.
