FIG. 3 is a cross-sectional view of the embossed paper product of FIG. 1 taken along the line 3—3 shown in FIG. 2.

FIG. 4 is a cross-sectional view of the embossed paper product of FIG. 1 taken along the line 4—4 in FIG. 2; and, FIG. 5 is a top plan view illustrating a repeat unit of the claimed design of the embossed paper product of FIG. 1. The broken lines around the perimeters of FIGS. 1 and 2 depict boundaries of the embossed paper product. Those broken line boundaries indicate that the embossed paper product has indeterminate length and width, and that the claimed design repeats uniformly throughout the length and width of the embossed paper product. The broken lines around the perimeters of FIG. 5 depict boundaries of the repeat unit. Those broken line boundaries indicate that the repeat unit may repeat an indeterminate number of times, and that the repeat unit repeats uniformly, throughout the length and width of the embossed paper product.
