(57) **CLAIM**

The ornamental design for an airplane, as shown and described.

**DESCRIPTION**

FIG. 1 is a top, rear and left side perspective view in an open configuration of an airplane according to the present invention, the top, rear and right side perspective view being a mirror image of the perspective view shown;

FIG. 2 is a top, rear and left side perspective view thereof in a closed configuration, the top, rear and right side perspective view being a mirror image of the perspective view shown;

FIG. 3 is a top, front and left side perspective view thereof in a closed configuration, the top, front and right side perspective view being a mirror image of the perspective view shown;

FIG. 4 is a top, front and left side perspective view thereof in an open configuration; and,

FIG. 5 is a bottom, front and left side perspective view thereof in a closed configuration, the bottom, front and right side perspective view being a mirror image of the perspective view shown.
