(57) **CLAIM**

The ornamental design for a covering for a book or card, as shown and described.

**DESCRIPTION**

FIG. 1 is an outside elevational view of a first embodiment of the covering for a book or card in open condition showing my new design;

FIG. 2 is an inside view of FIG. 1;

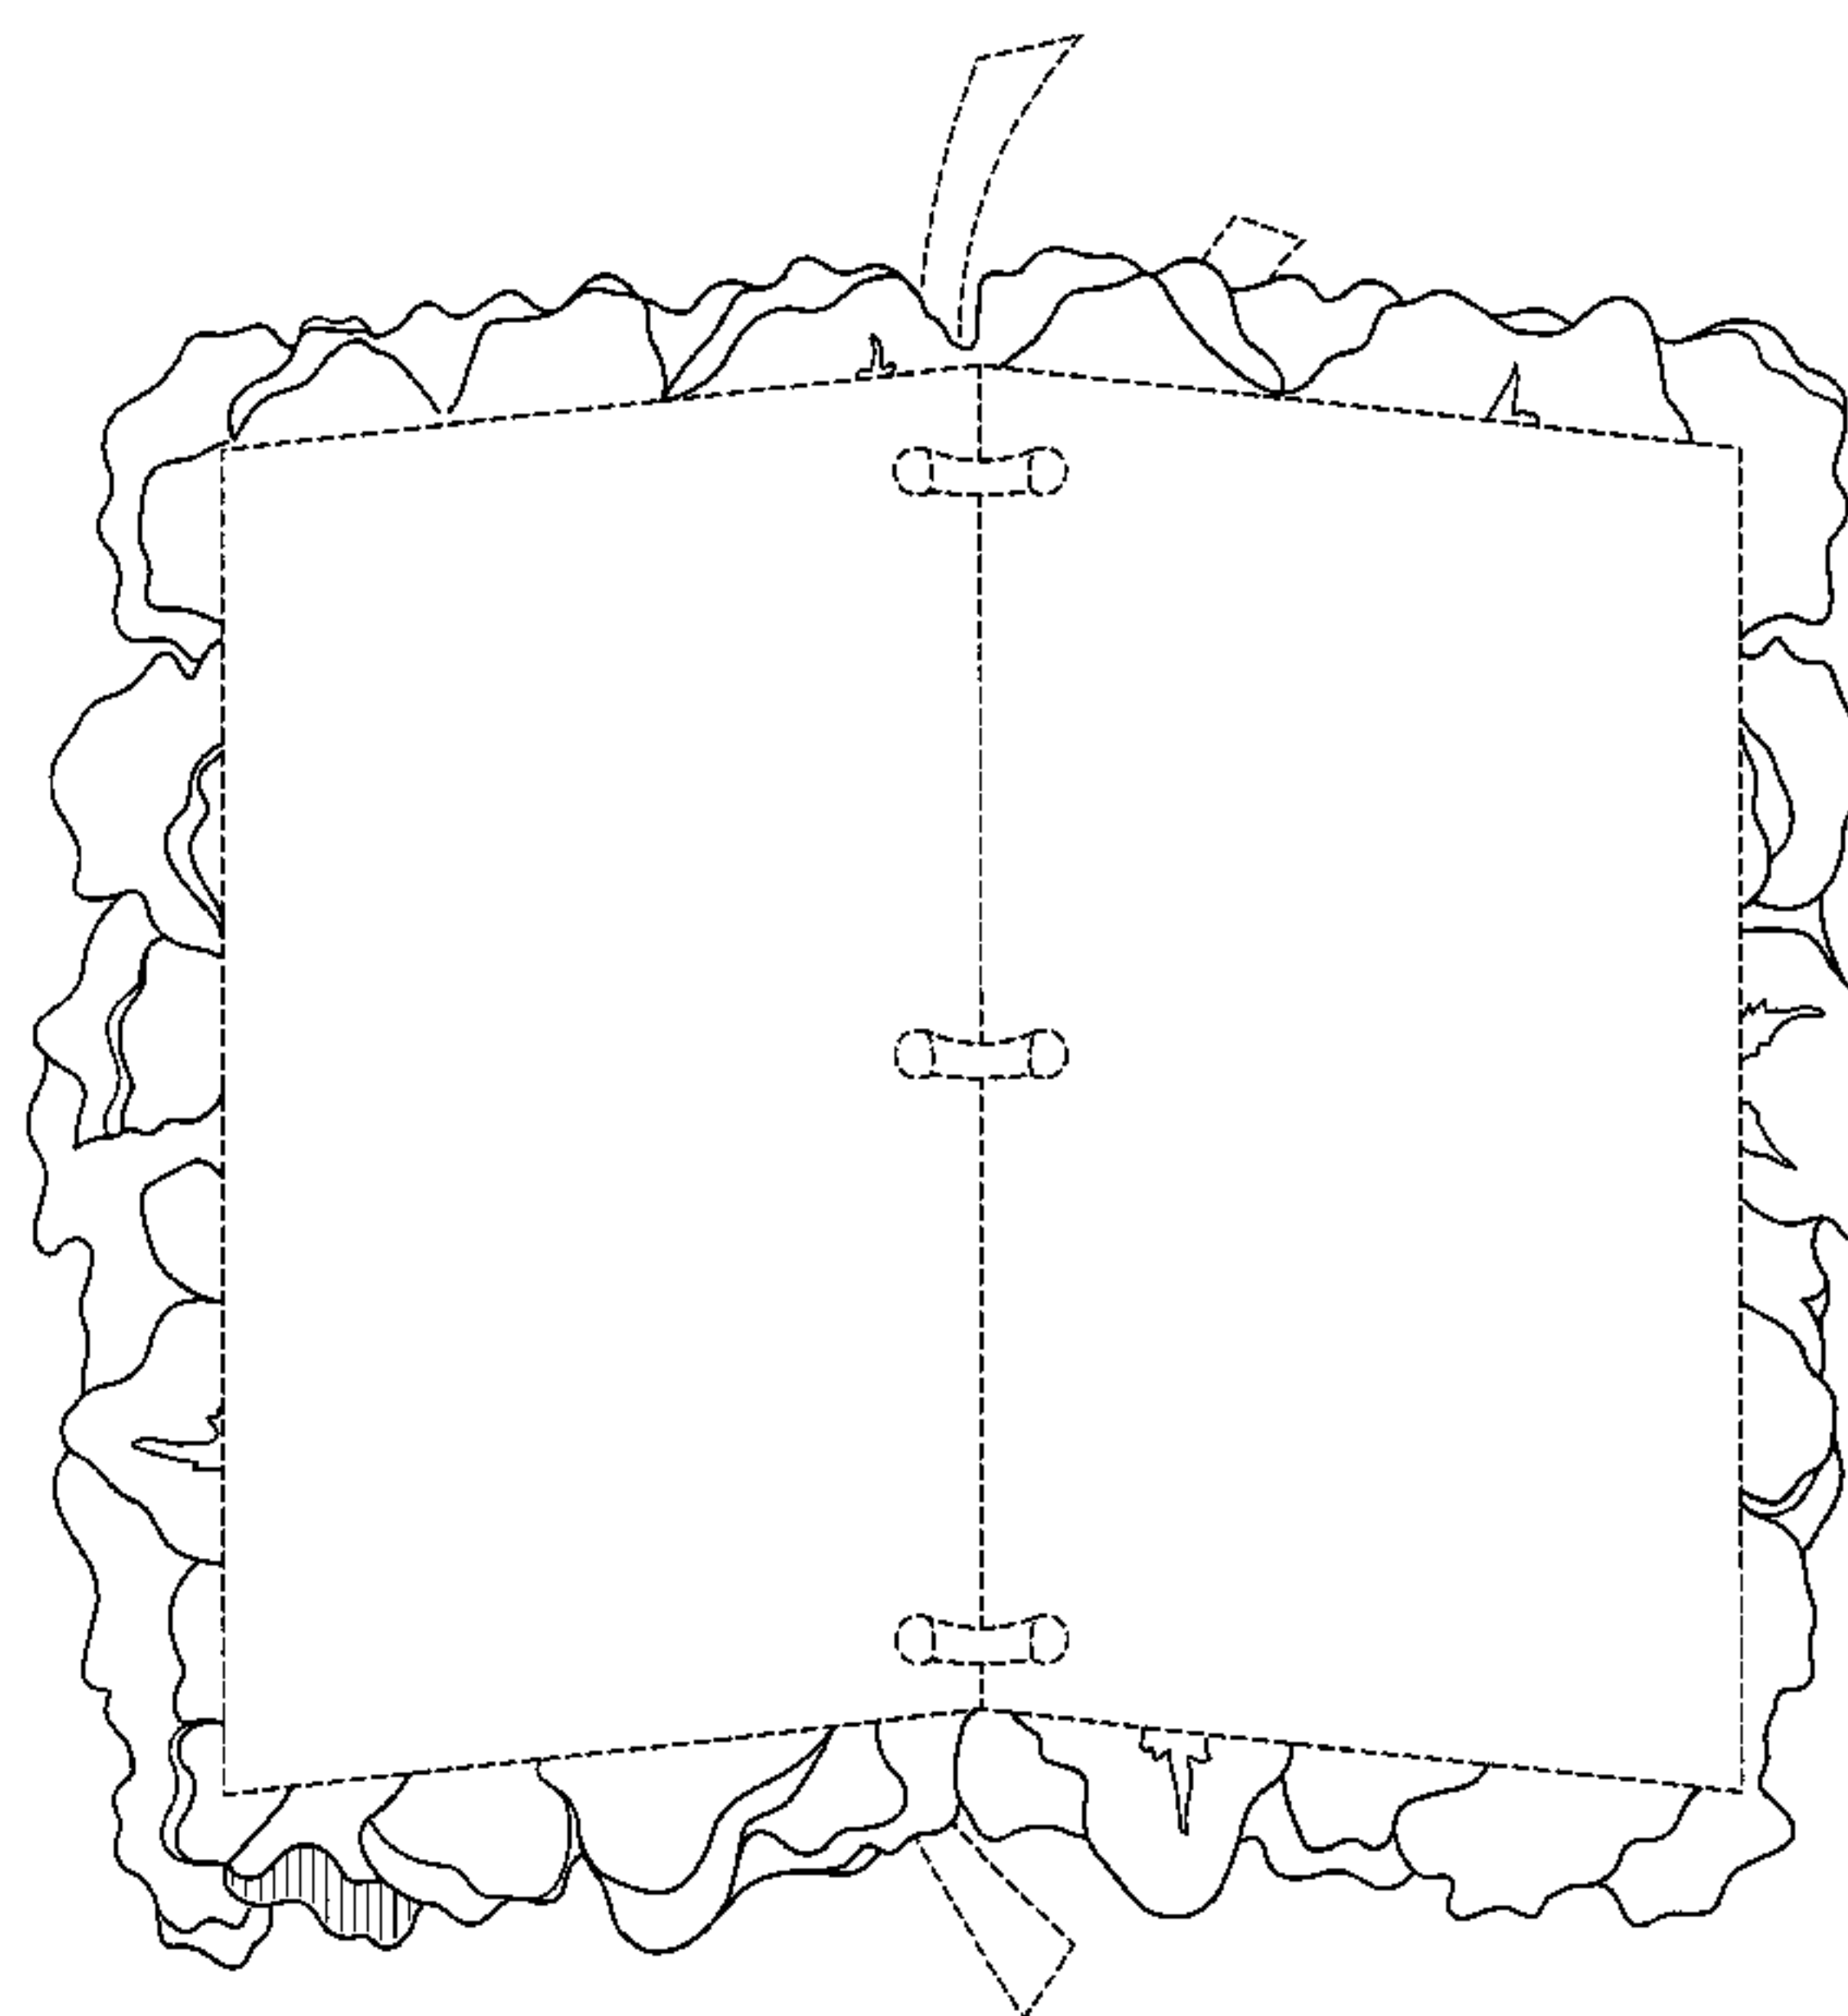

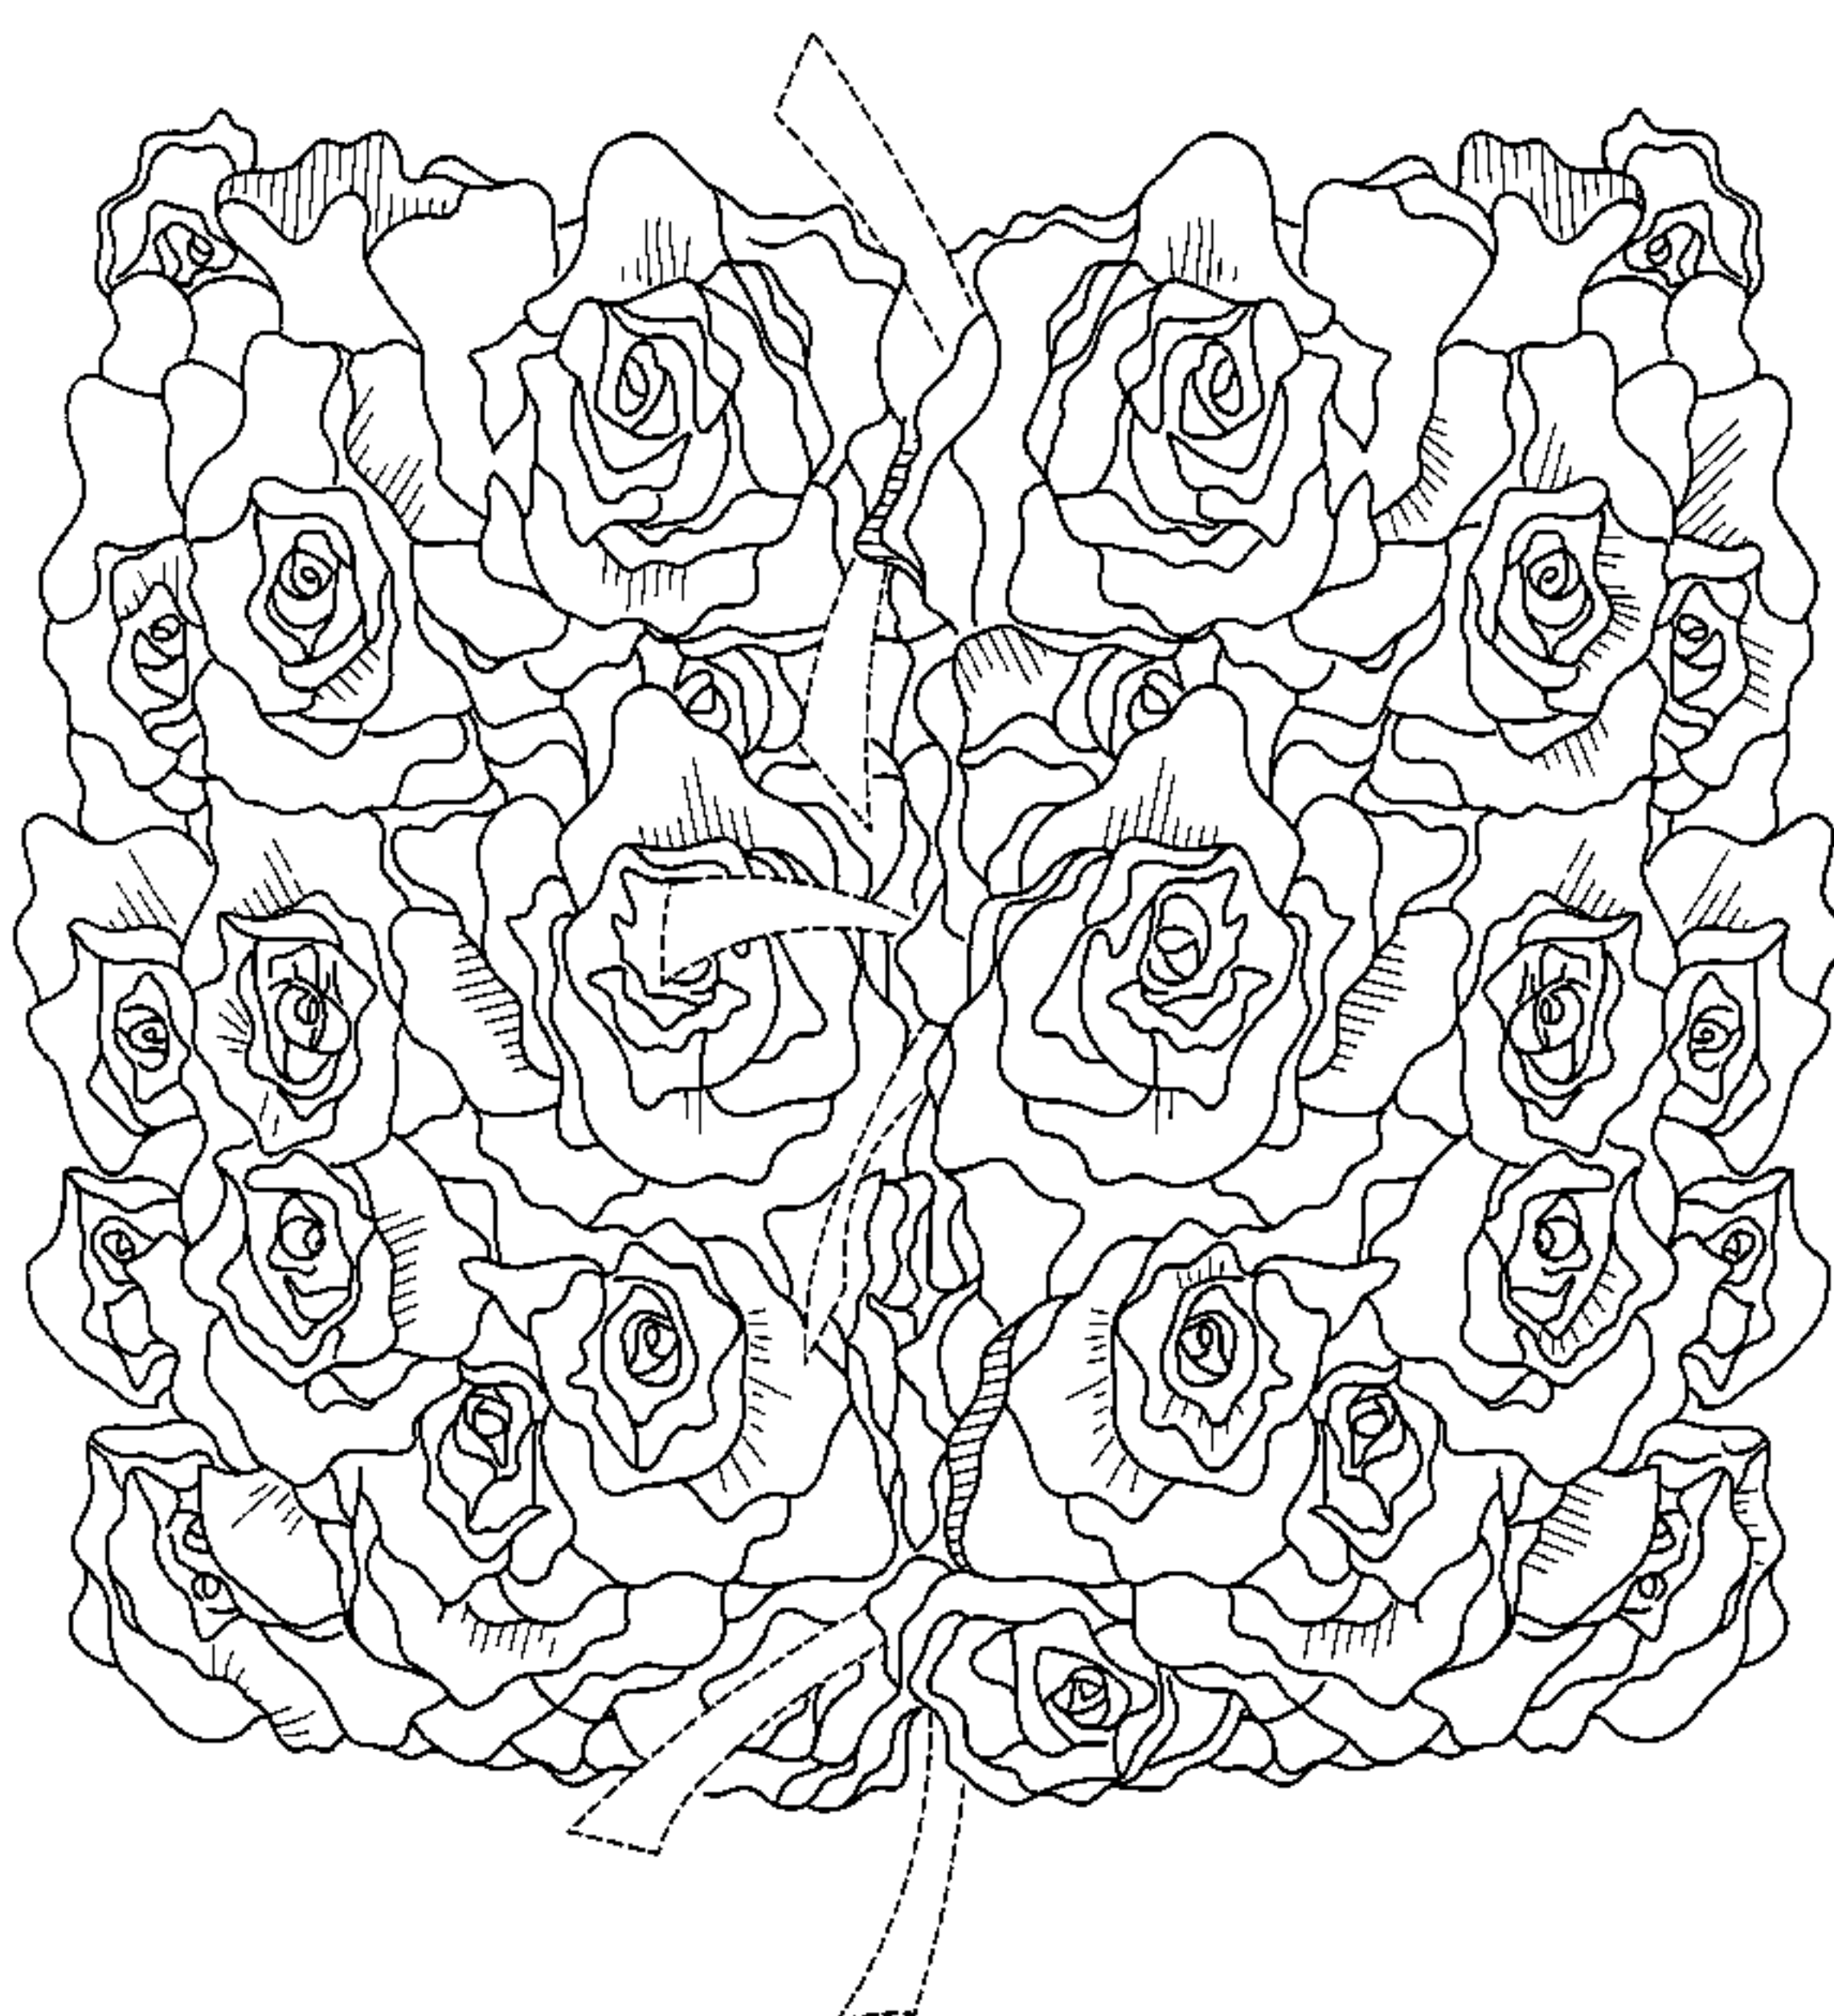

FIG. 3 is an outside elevational view of a second embodiment of the covering for a book or card in open condition, which is the same as the embodiment shown in FIGS. 1, 2, and 4 except that it includes an insect;

FIG. 4 is a side horizontal view of FIG. 1 in closed condition.

The claimed design consists of closely packed flowers affixed to an unclaimed covering. Inconsistencies between the way the petals of the flowers appear in the different views are caused by variations in the irregular pattern in which the flowers are affixed to the covering, to the organic nature of the flowers themselves in which every petal is a different size and shape from every other petal, and the different viewpoints from which they are shown.

The broken lines showing environment in the drawings are for information purposes only and form no part of the claimed design.
