(57) **CLAIM**

The ornamental design for a mesh drawer, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a mesh drawer showing our new design;

FIG. 2 is a front view thereof;

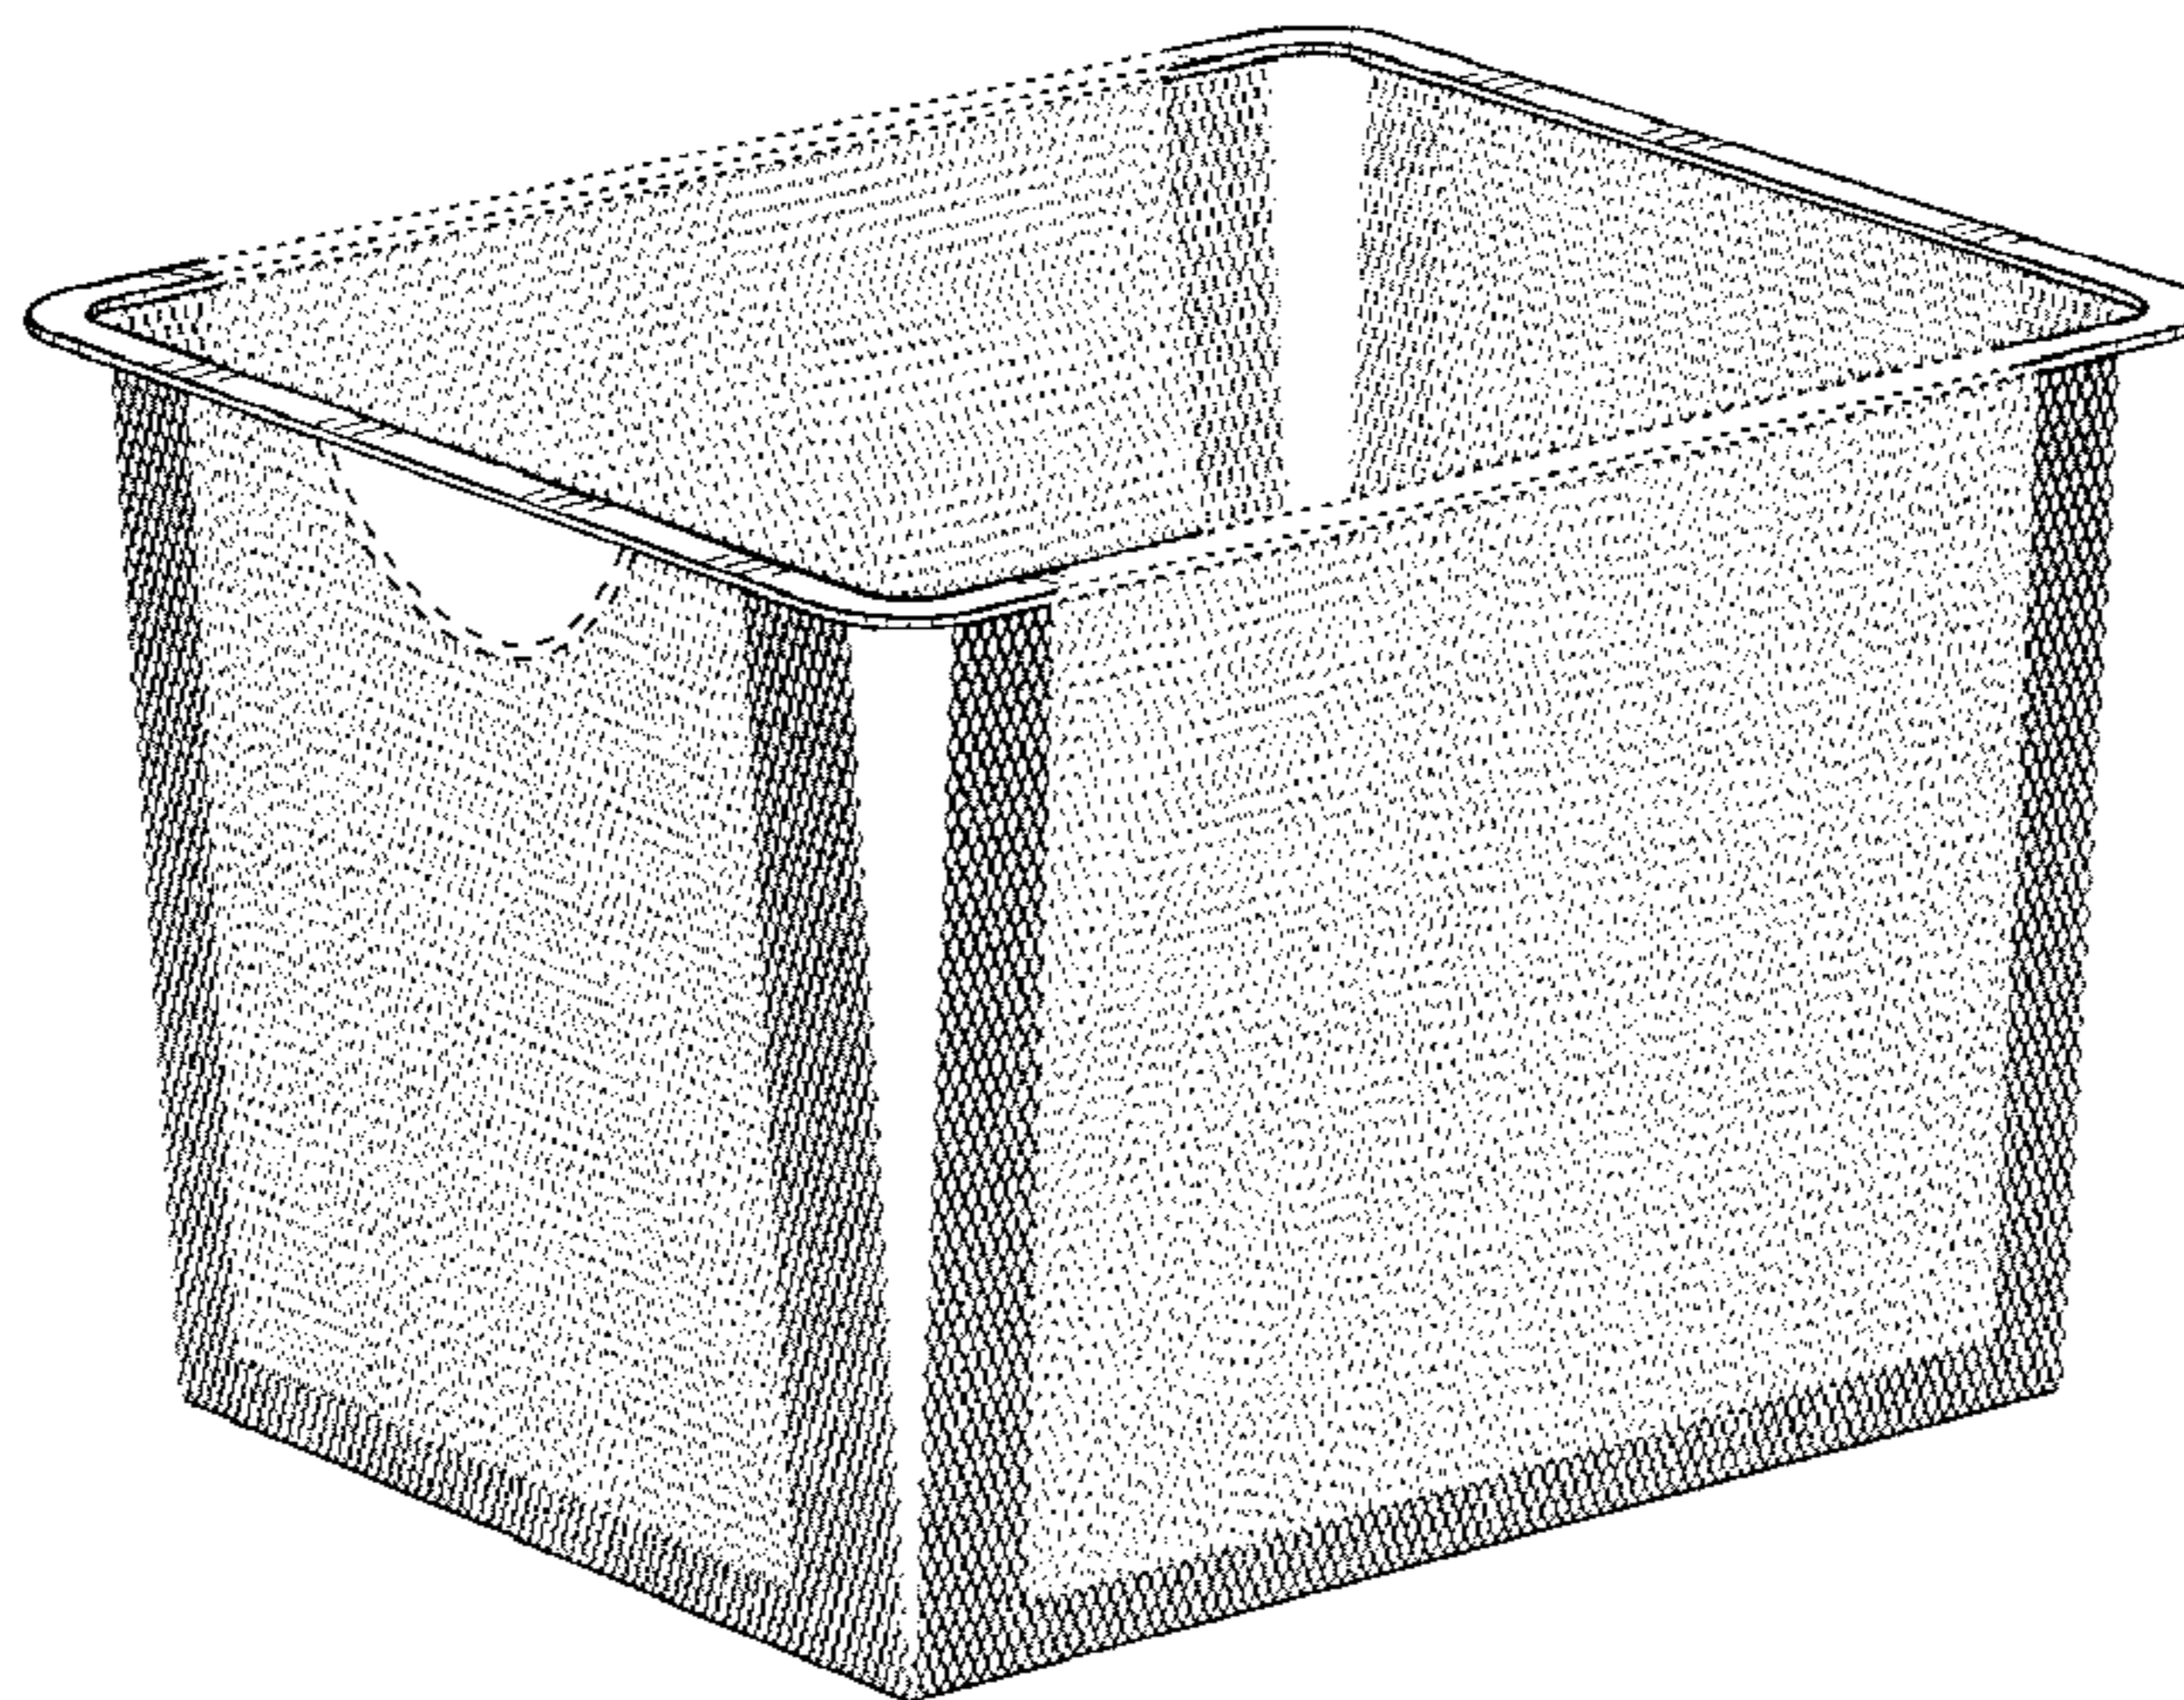

FIG. 3 is a rear view thereof; and,

FIG. 4 is a side view thereof, the opposite side view being identical.

The jagged broken lines surrounding a U-shaped opening in the front panel of the drawers indicates that no particular handle shape is being claimed in this figure, and represent boundaries of the designs claimed in those figures and form no part of the claimed design. The jagged broken line surrounding a U-shaped opening in the side panels of the drawers represent boundaries of the designs claimed in those figures and form no part of the claimed design. The pairs of adjacent, spaced jagged broken lines in the drawings form no part of the claimed design and the portions between such pairs of jagged, broken lines are broken away to disclose indeterminate length. In the drawings, the mesh material that may be visible through each U-shaped opening, the corner openings, between the jagged broken lines and the holes in the mesh is not shown for clarity.

The broken line showing of areas of the top rail, mesh, and handle opening is for illustrative purposes only and forms no part of the claimed design.

1 Claim, 3 Drawing Sheets
