(57) **CLAIM**

I claim the ornamental design for an ivy fishing hat, as
shown and described.

DESCRIPTION

FIG. 1 is a perspective view of one embodiment of an ivy
fishing hat.

FIG. 2 is a front view of the hat of FIG. 1.

FIG. 3 is a back view of the hat of FIG. 1.

FIG. 4 is a side view of the hat of FIG. 1.

FIG. 5 is a top view of the hat of FIG. 1.

FIG. 6 is a bottom view of the hat of FIG. 1.

FIG. 7 is a perspective view of another embodiment of an
ivy fishing hat.

FIG. 8 is a front view of the hat of FIG. 7.

FIG. 9 is a back view of the hat of FIG. 7.

FIG. 10 is a side view of the hat of FIG. 7.

FIG. 11 is a top view of the hat of FIG. 7; and,

FIG. 12 is a bottom view of the hat of FIG. 7.

The details shown as chains of dots represent stitches in all
figures. The details shown in long dashed broken lines are
for illustrative purposes only and form no part of the claimed
design.

The design is understood to consist of clusters of the stems
of two or more leaves, randomly attached to the surface of
a hat. For example, the leaves that are only partly shown
toward the rear of the brim and the crown in FIGS. 1 and 7
are understood to be part of clusters of two or more leaves
having an appearance similar to the clusters shown in the
other views.

Furthermore, inconsistencies between the way the leaf clus-
ters appear in the different views of the drawings are
understood to be caused by the variations in the random,
irregular pattern in which the leaves are attached to the hat
and to the organic nature of the leaves themselves in which
every leaf is a different size and shape from every other leaf.
Differences in the appearance of the leaves are also due to
the variations of the different viewpoints, i.e., the viewpoint
being a perspective view or front, rear, side, etc. view.

These minor variations in the appearance of the leaves from
one view to another do not render the designs patentably
distinct, but are considered to be due to the subject matter of
the leaves.
