(57) **CLAIM**

The ornamental design for a decorative tower object having a tapered inner cavity, as shown and described above.

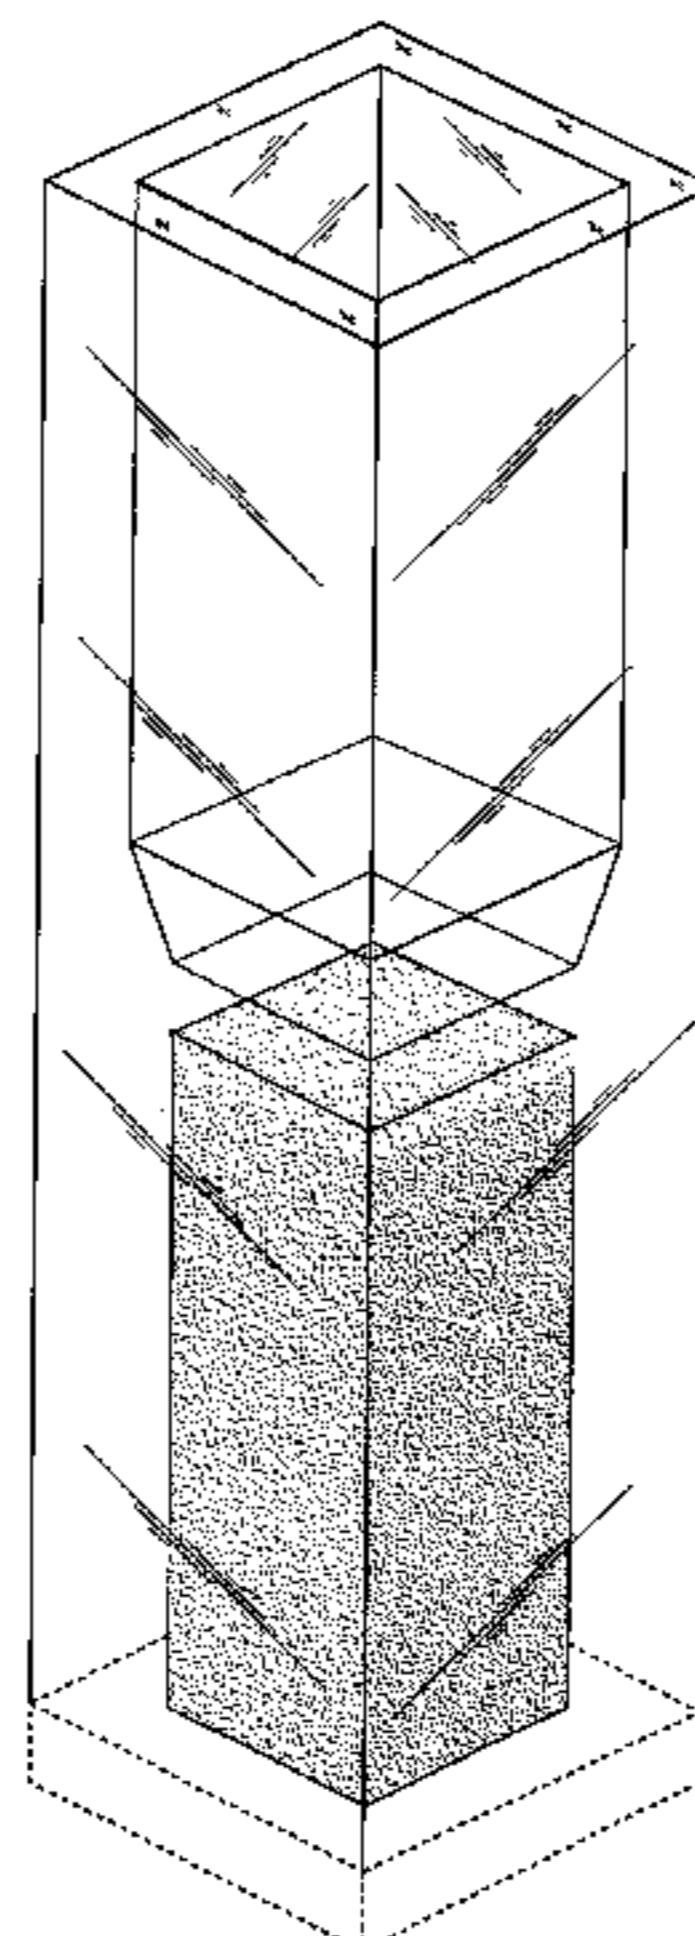

**DESCRIPTION**

FIG. 1 is a perspective view of the object; FIG. 2 is a front view of the object; and, FIG. 3 is a top view of the object.

The rear and both sides of the object are identical to the front of the object depicted in FIG. 2. In the figures, stippling is used to show an inner cavity having a translucent, non-transparent surface. An alternative embodiment of our design is similar to that shown in FIGS. 1-3 except for the incorporation of a transparent, rather than translucent inner cavity surface.

The portions shown in broken lines are for illustrative purposes only and form no part of the claimed design.
