(57) **CLAIM**

The ornamental design for wall mounted luminaire, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view from the front right side showing the design for a wall mounted luminaire. The luminary is characterized by an extremely flat design. The luminary basically comprises a base unit for mounting to a wall, which holds at least one lamp and extremely thin profile louvers, and a cover, which is adjustably attached to the base. The louvers are moveable to direct light up or down depending on the position of the louvers.

FIG. 2 is a front elevational view thereof.

FIG. 3 is a right side elevational view thereof. The left side is a mirror image of the right side.

FIG. 4 is second right side elevational view thereof showing the cover in a second position. The left side is a mirror image of the right side.

FIG. 5 is a top plan view thereof. The bottom view is the same as the top view; and,

FIG. 6 is a rear elevational view thereof.

The broken lines shown on the drawings are for illustrative purposes only and form no part of the claimed design.
