(57) **CLAIM**

The ornamental design for a sensor housing, as shown and described.

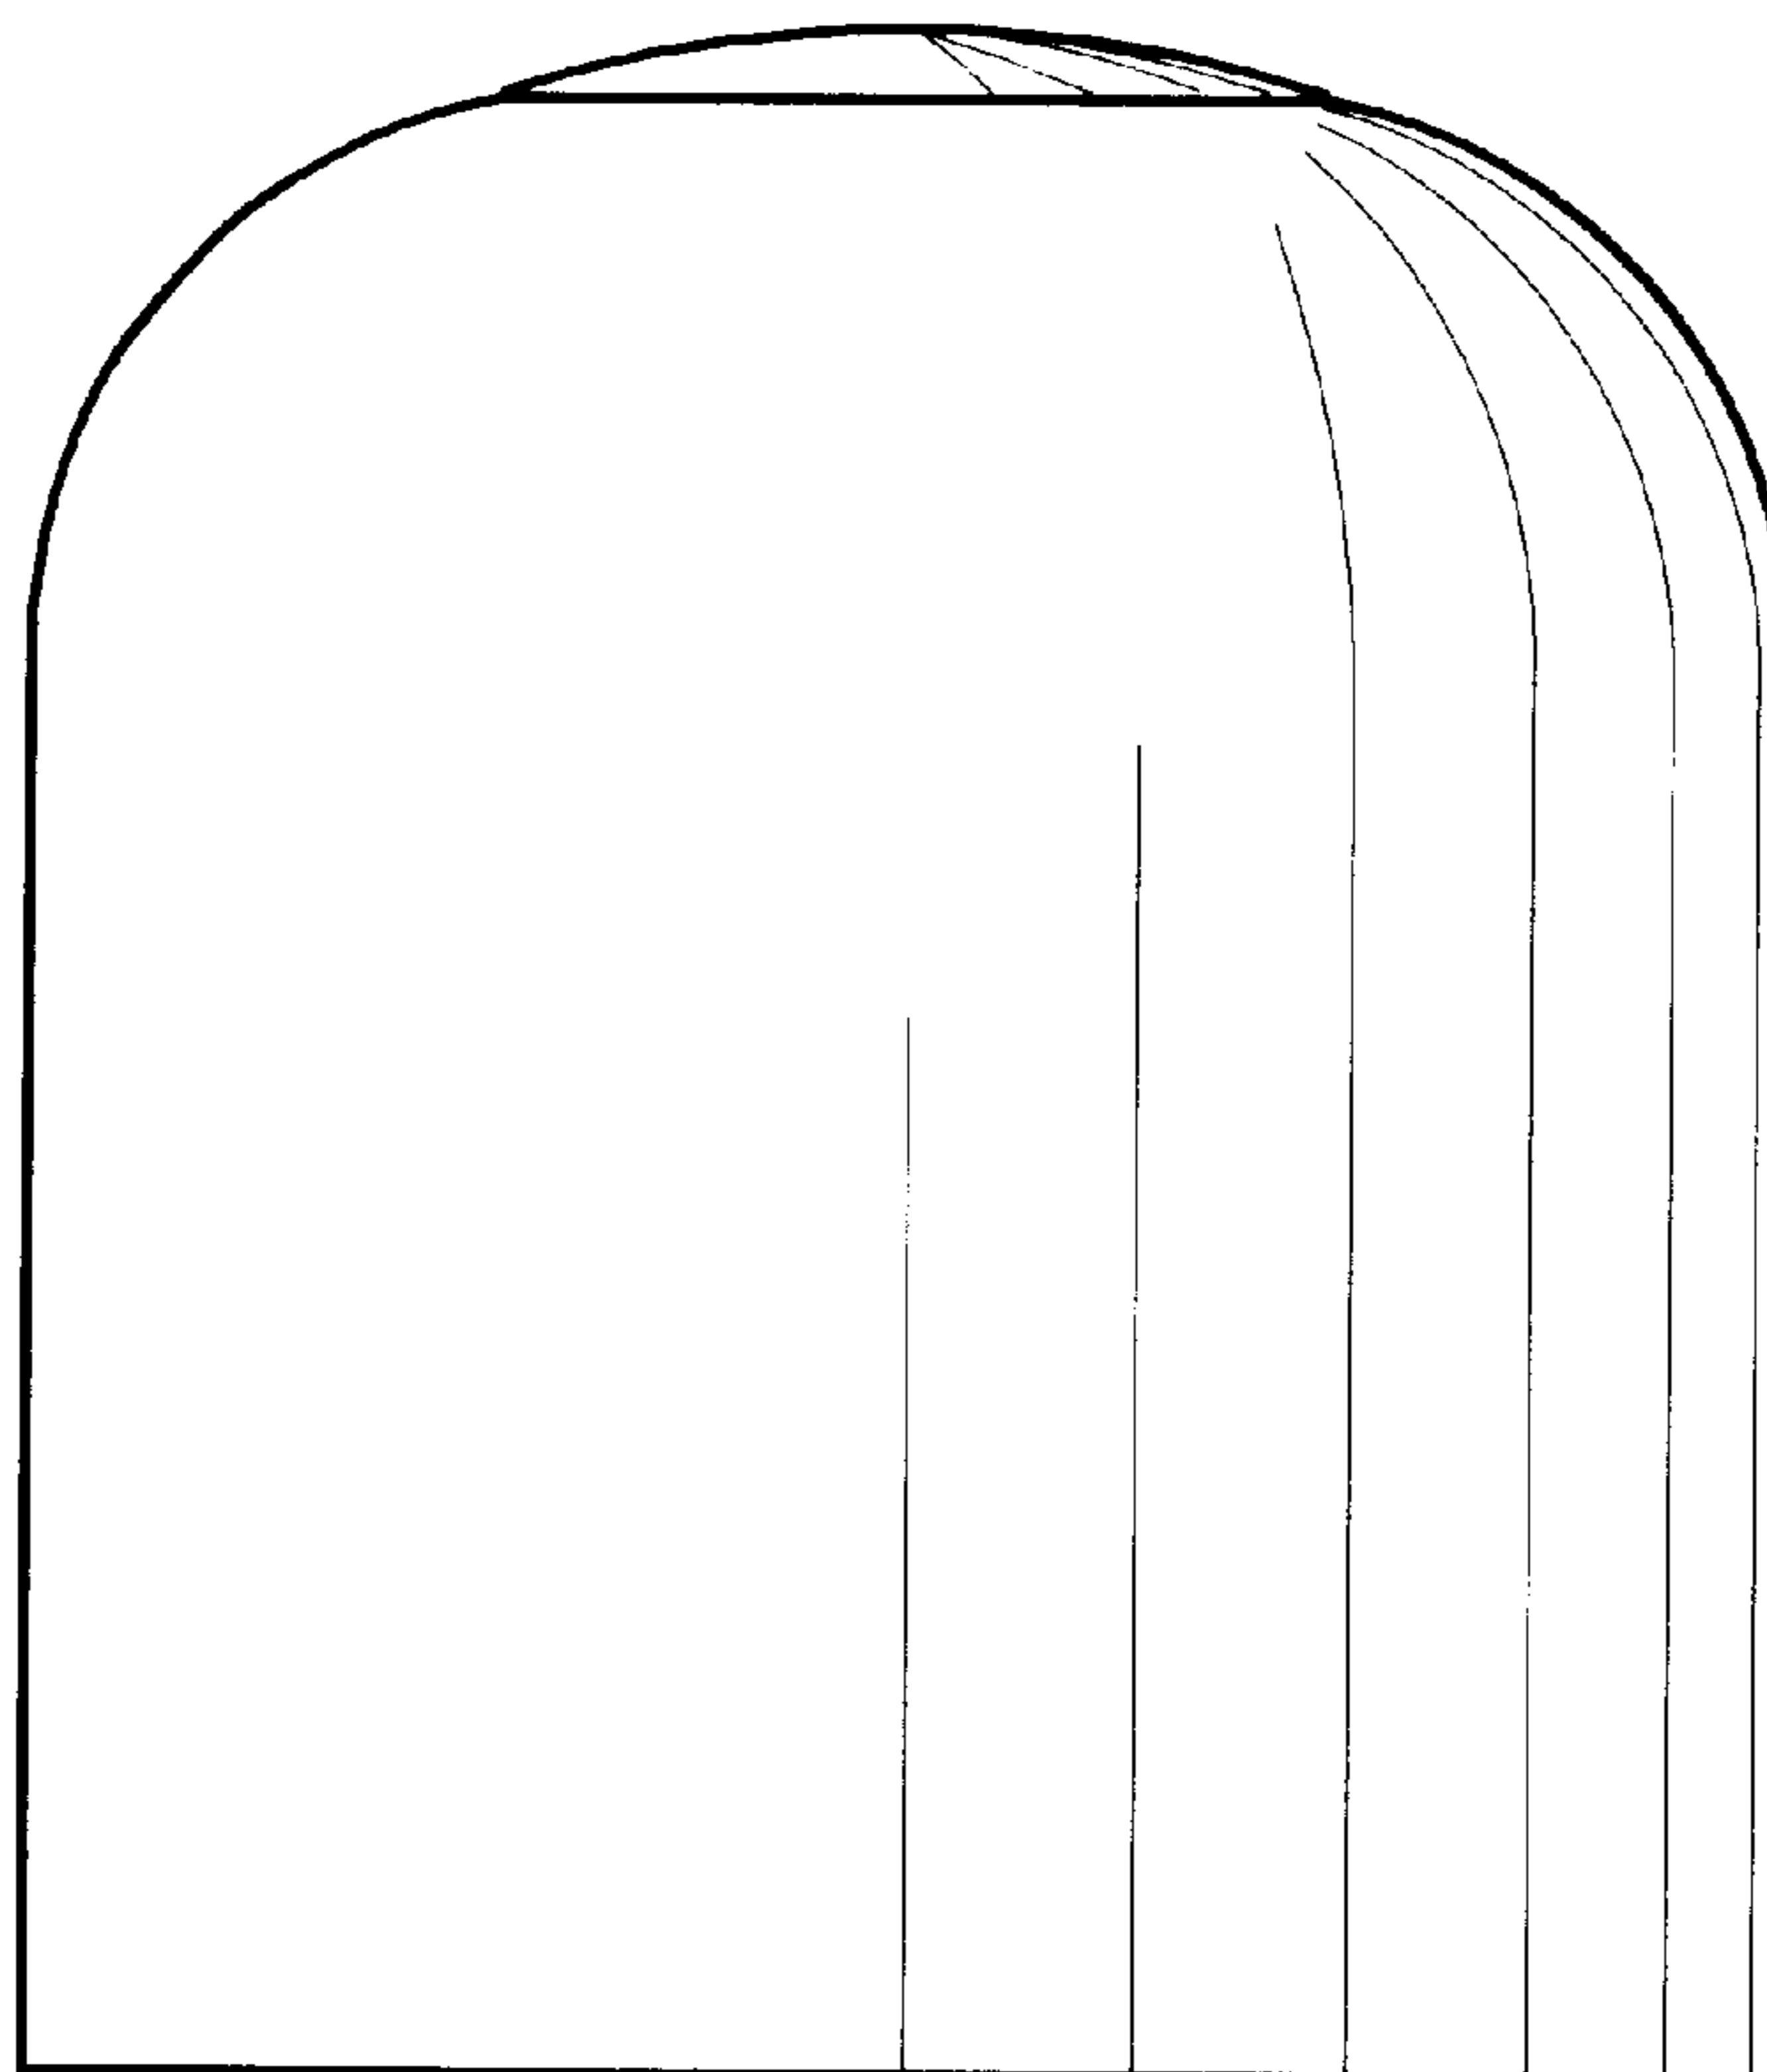

DESCRIPTION

FIG. 1 is a side view in elevation of an ornamental sensor housing constructed according to principles of the invention; and,

FIG. 2 is a top view thereof.

An ornamental sensor housing including a generally cylindrical body with a rounded distal end, and having a white bull's-eye center portion distally disposed, on the rounded end, in approximate radial symmetry about an axis of the cylinder, and the body being colored to contrast with the bull's-eye. A preferred embodiment has a white bull's-eye and a black body.
