CLAIM

The ornamental design for a cruiser bicycle frame, as shown and described.

FIG. 1 is a front, right side perspective view of a cruiser bicycle frame, with other bicycle components attached to the frame being shown in broken line for illustration purposes only.

FIG. 2 is a right, elevation side view of the cruiser bicycle frame shown in FIG. 1, with other bicycle components attached to the frame being shown in broken line for illustration purposes only, and with a rider, also shown in broken line for illustration purposes only, seated on the bicycle for use.

FIG. 3 is a right, elevation side view of the cruiser bicycle frame shown in FIG. 1, with other bicycle components attached to the frame being shown in broken line for illustration purposes only.

FIG. 4 is a left, elevation side view of the cruiser bicycle frame shown in FIG. 1, with other bicycle components attached to the frame being shown in broken line for illustration purposes only.

FIG. 5 is a top, plane view of the cruiser bicycle frame shown in FIG. 1, with other bicycle components attached to the frame being shown in broken line for illustration purposes only.

FIG. 6 is a front, elevation view of the cruiser bicycle frame shown in FIG. 1, with other bicycle components attached to the frame being shown in broken line for illustration purposes only; and,

FIG. 7 is a rear, elevation view of the cruiser bicycle frame shown in FIG. 1, with other bicycle components attached to the frame being shown in broken line for illustration purposes only.
