(57) **CLAIM**

The ornamental design for an automotive door, as shown and described.

DESCRIPTION

FIG. 1 is a left side perspective view of a first embodiment automotive door design in accordance with the present invention, wherein a right side perspective view of a first embodiment is a mirror image thereof;

FIG. 2 is a left side perspective view of a second embodiment automotive door design in accordance with the present invention, wherein a right side perspective view of a second embodiment is a mirror image thereof;

FIG. 3 is a left side perspective view of a third embodiment automotive door design in accordance with the present invention, wherein a right side perspective view of a third embodiment is a mirror image thereof;

FIG. 4 is a left side perspective view of a fourth embodiment automotive door design in accordance with the present invention, wherein a right side perspective view of a fourth embodiment is a mirror image thereof;

FIG. 5 is a left side perspective of a fifth embodiment automotive door design in accordance with the present invention, wherein a right side perspective view of a fifth embodiment is a mirror image thereof; and,

FIG. 6 is a left side perspective view of a sixth embodiment automotive door design in accordance with the present invention, wherein a right side perspective view of a sixth embodiment is a mirror image thereof.

The broken lines are for illustrative purposes only and form no part of the claimed design.
