(57) **CLAIM**

The ornamental design for an illuminated planter, substantially as shown and described.

**DESCRIPTION**

FIG. 1 is a front perspective view of the illuminated planter according to my new design; and,  
 FIG. 2 is a front elevational view thereof, the rear, left side, and right side elevation views being mirror images.  
 The bottom of the illuminated planter is flat and unornamented.  
 The characteristic feature of the design resides in the variance in the luminosity of the planter’s exterior surface, resulting from illumination from within the planter itself.
