(57) **CLAIM**

The ornamental design for a bottle shaped hat, as shown and described.

**DESCRIPTION**

FIG. 1 is a front perspective view of a bottle shaped hat showing my new design as placed on an individual's head and having a frill of reflective strands and reflective strands tipped with stars.

FIG. 2 is a front side view of the bottle shaped hat of FIG. 1, the bottle shaped hat being generally symmetric about a vertical axis, the left side view, right side view, and back side views are generally identical.

FIG. 3 is a top view of the bottle shaped hat of FIG. 1;

FIG. 4 is a bottom view of the bottle shaped hat of FIG. 1; and,

FIG. 5 is a front view of a second embodiment of FIG. 1, the only difference being that the frill consists of reflective strands tipped with stars only, it being understood that all other surfaces are the same as those of the first embodiment. In the drawings the broken lines depicted in the figures are for illustrative purposes only, and form no part of the claimed design.
