(57) **CLAIM**

The ornamental design for a vehicle tail light lens, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a left vehicle tail light lens attached to a vehicle, no part of the vehicle is claimed;

FIG. 2 is a frontal perspective view of the left vehicle tail light lens (front and frontal as used herein describe a view of the rear of a vehicle);

FIG. 3 is a side view of the left vehicle tail light lens;

FIG. 4 is a front view of the left vehicle tail light lens;

FIG. 5 is a top view of the left vehicle tail light lens;

FIG. 6 is a bottom view of the left vehicle tail light lens;

FIG. 7 is a sectional view taken along the lines 7—7 in FIG. 3;

FIG. 8 is a frontal perspective view of a right vehicle tail light lens attached to a vehicle, no part of the vehicle is claimed;

FIG. 9 is a perspective view of the right vehicle tail light lens;

FIG. 10 is a side view of the right vehicle tail light lens;

FIG. 11 is a front view of the right vehicle tail light lens;

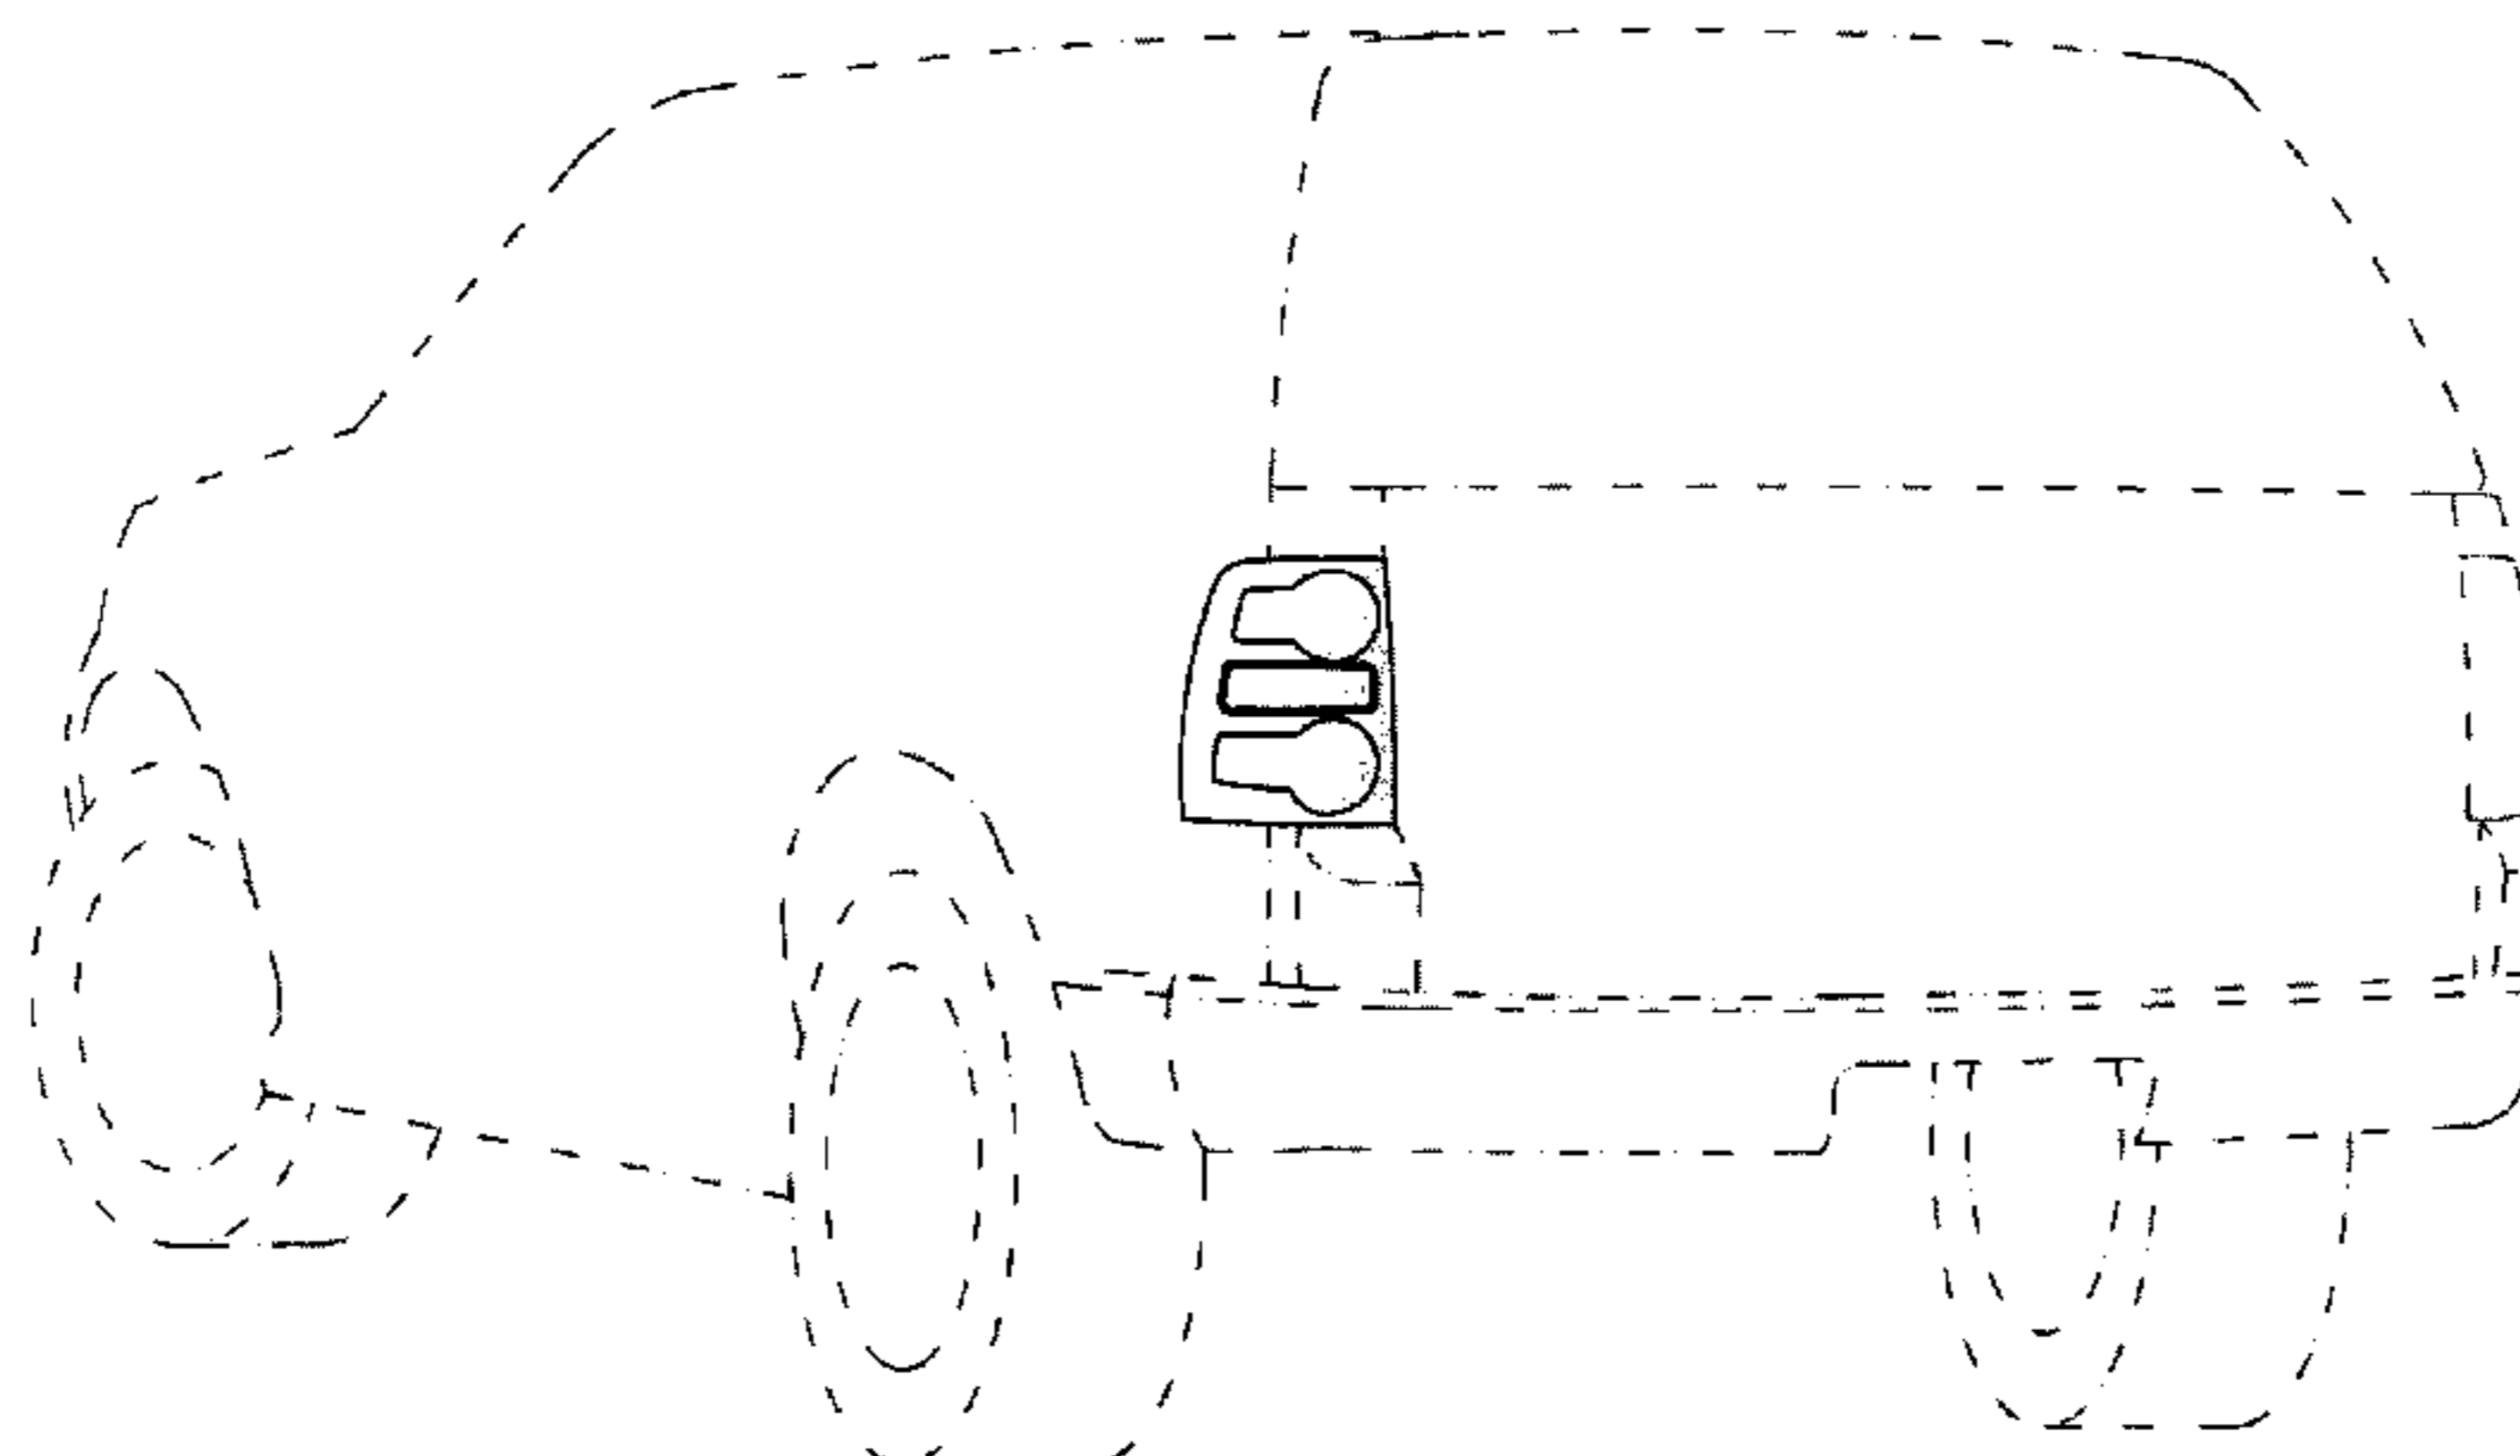

FIG. 12 is a top view of the right vehicle tail light lens;

FIG. 13 is a bottom view of the right vehicle tail light lens; and,

FIG. 14 is a sectional view taken along the lines 14—14 in FIG. 10.

The phantom lines are not a part of the claimed invention. The stippling indicates the curvature of the vehicle tail light lens. The vehicle tail light lens has a recessed rectangular portion between two circular portions. The vehicle tail light lens has a rectangular appearance from the side and a circular appearance from the rear of the vehicle.
