(57) **CLAIM**

The ornamental design of the opposite end regions for a paver, as shown and described.

FIG. 1 is a perspective view from above showing my opposite end regions for a paver design as applied to a generally rectangular-shaped paver and includes a pair of horizontal break lines to indicate that my design is not limited to any particular dimension in the vertical direction;

FIG. 2 is a plan view of the opposite end regions for a paver design of FIG. 1;

FIG. 3 is a left end elevation view of the opposite end regions for a paver design of FIG. 1 and includes a horizontal break line again indicating that no particular vertical dimension is intended to be claimed for my design, with the right end elevation view being identical to the left end elevation view;

FIG. 4 is a front elevation view of the opposite end regions for a paver design of FIG. 1 and includes a horizontal break line to again indicate that no particular vertical dimension is being claimed for my design, with the back elevation view being identical to the front elevation view;

FIG. 5 is a plan view of my opposite end regions for a paver design as applied to a generally square-shaped paver;

FIG. 6 is a plan view of my opposite end regions for a paver design as applied to a larger generally square paver that is larger than the paver of FIG. 5; and,

FIG. 7 is a plan view of my opposite end regions for a paver design as applied to a generally rectangular paver that is larger than the paver of FIG. 2.

The broken lines adjacent to the shaded surfaces define the bounds of the claimed design form no part thereof.

The broken lines showing of portions of the block are for illustrative purposes only and form no part of the claimed design.
