(57) **CLAIM**

The ornamental design for a cordless telephone, as shown and described.

**DESCRIPTION**

FIG. 1 is a front perspective view of the design for the cordless telephone having a number of environmental features, namely, a plurality of buttons, speaker holes, a display, and a positionable camera;

FIG. 2 is a front view of the cordless telephone of FIG. 1 with a handset portion separated with respect to a base portion, and illustrating the environmental plurality of buttons, the environmental display, the environmental speaker holes, and the environmental positionable camera;

FIG. 3 is a right side view of the cordless telephone of FIG. 1 with a handset portion separated with respect to a base portion, and illustrating the environmental plurality of buttons and the environmental positionable camera, the left side view of the cordless telephone being a mirror image of the right side view;

FIG. 4 is a top view of a phone portion of the cordless telephone of FIG. 1, illustrating the environmental plurality of buttons and the environmental positionable camera;

FIG. 5 is a top view of a base portion of the cordless telephone of FIG. 1; and,

FIG. 6 is a rear view of the cordless telephone of FIG. 1 with a handset phone portion separated with respect to a base position, and illustrating the environmental speaker holes and the environmental positionable camera.

The handset and base have been shown separately in FIGS. 4 and 5 to show portions not visible when in a combined state.

The broken lines applied to the handset in FIGS. 1, 2, 3, 4, and 6 are used to indicate environmental structures and form no part of the claimed design. The additional broken lines between the handset and base in FIGS. 1, 2, and 6 indicate the path along which the components are exploded.
