(57) **CLAIM**

The ornamental design for a top of a lid, as shown and described.

**DESCRIPTION**

FIG. 1 is a front isometric view showing our new design for a top of a lid. The lid can either (A) be hinged directly to a package or container, or (B) hinged to a closure base which in turn can be installed on a package or container;

FIG. 2 is a top plan view thereof;

FIG. 3 is a front elevational view thereof;

FIG. 4 is a rear elevational view thereof;

FIG. 5 is a left side elevational view thereof; and,

FIG. 6 is a right side elevational view thereof.

The broken line showing of a hinge is for purposes only and forms no part of the claimed design.

The entire lid is translucent, and structural features on the underside of the lid are partially visible through the top of the translucent lid as indicated by lighter lines representing such features so that the aesthetic appearance of the view of the top of the lid is enhanced.

The shading in the form of stippling represents translucency which may be of any color (including translucent white or translucent clear).
