(57) **CLAIM**

The ornamental design for a portion of a display screen with an animated image, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a portion of a display screen with an animated image showing my new design, with the animated image having a first appearance state;

FIG. 2 is a front view thereof with the animated image having a second appearance state;

FIG. 3 is a front view thereof with the animated image having a third appearance state;

FIG. 4 is a front view thereof with the animated image having a fourth appearance state;

FIG. 5 is a front view thereof with the animated image having a fifth appearance state;

FIG. 6 is a front view thereof with the animated image having a sixth appearance state;

FIG. 7 is a front view thereof with the animated image having a seventh appearance state;

FIG. 8 is a front view thereof with the animated image having an eighth appearance state;

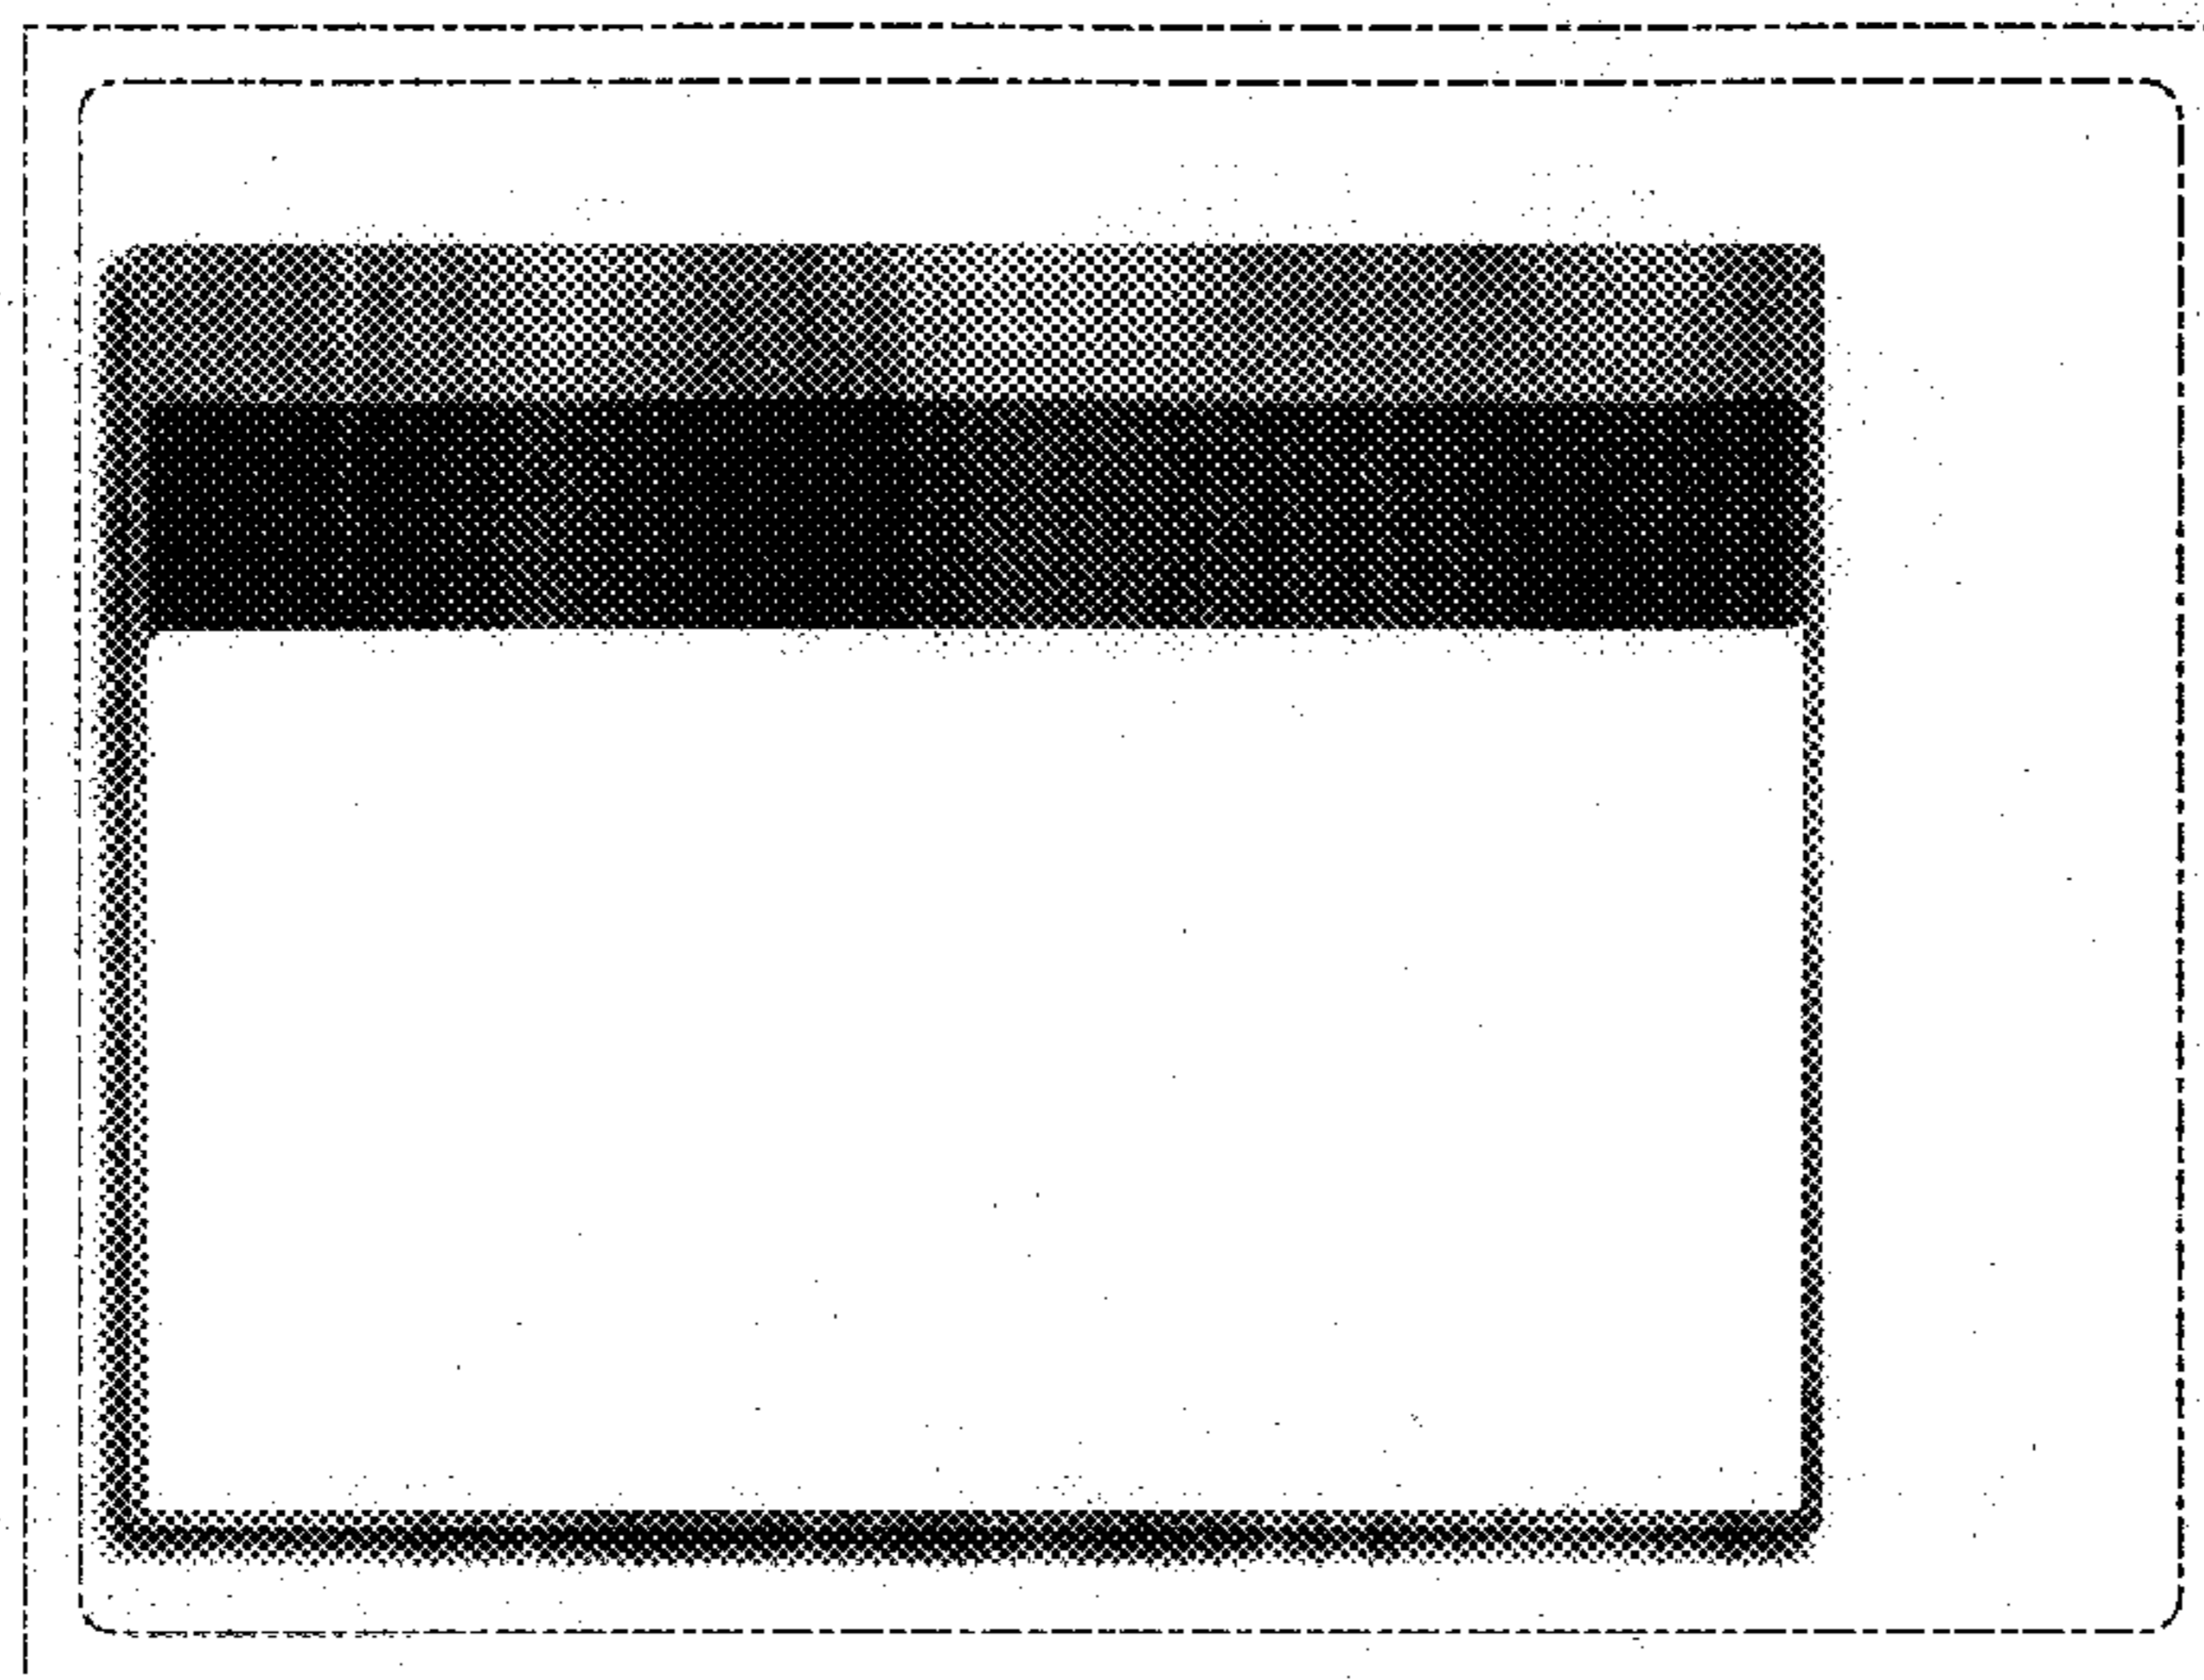

FIG. 9 is a front view thereof with the animated image having a ninth appearance state; and,

FIG. 10 is a front view thereof with the animated image having a tenth appearance state.

The appearance of the animated image is shown by the representative consecutive appearance states in FIGS. 1-10, and the animated image sequentially transitions between the appearance states shown in FIG. 1 and FIG. 10. The broken line showing of a display screen is for illustrative purposes only and forms no part of the claimed design.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.
