(57) **CLAIM**

The ornamental design for a body composition monitor, as shown and described.

**DESCRIPTION**

FIG. 1 is a front perspective view of the body composition monitor showing the new design with its hand electrodes stored in its main body;

FIG. 2 is a front view of the body composition monitor with the hand electrodes stored in the main body;

FIG. 3 is a rear view of the body composition monitor with the hand electrodes stored in the main body;

FIG. 4 is a side view of the body composition monitor with the hand electrodes stored in the main body;

FIG. 5 is another side view of the body composition monitor with the hand electrodes stored in the main body;

FIG. 6 is a top view of the body composition monitor with the hand electrodes stored in the main body;

FIG. 7 is a bottom view of the body composition monitor with the hand electrodes stored in the main body; and,

FIG. 8 is a front perspective view of the body composition monitor with the hand electrodes taken out of the main body.
