(57) **CLAIM**

The ornamental design for a surface pattern of a paper product, as shown and described.

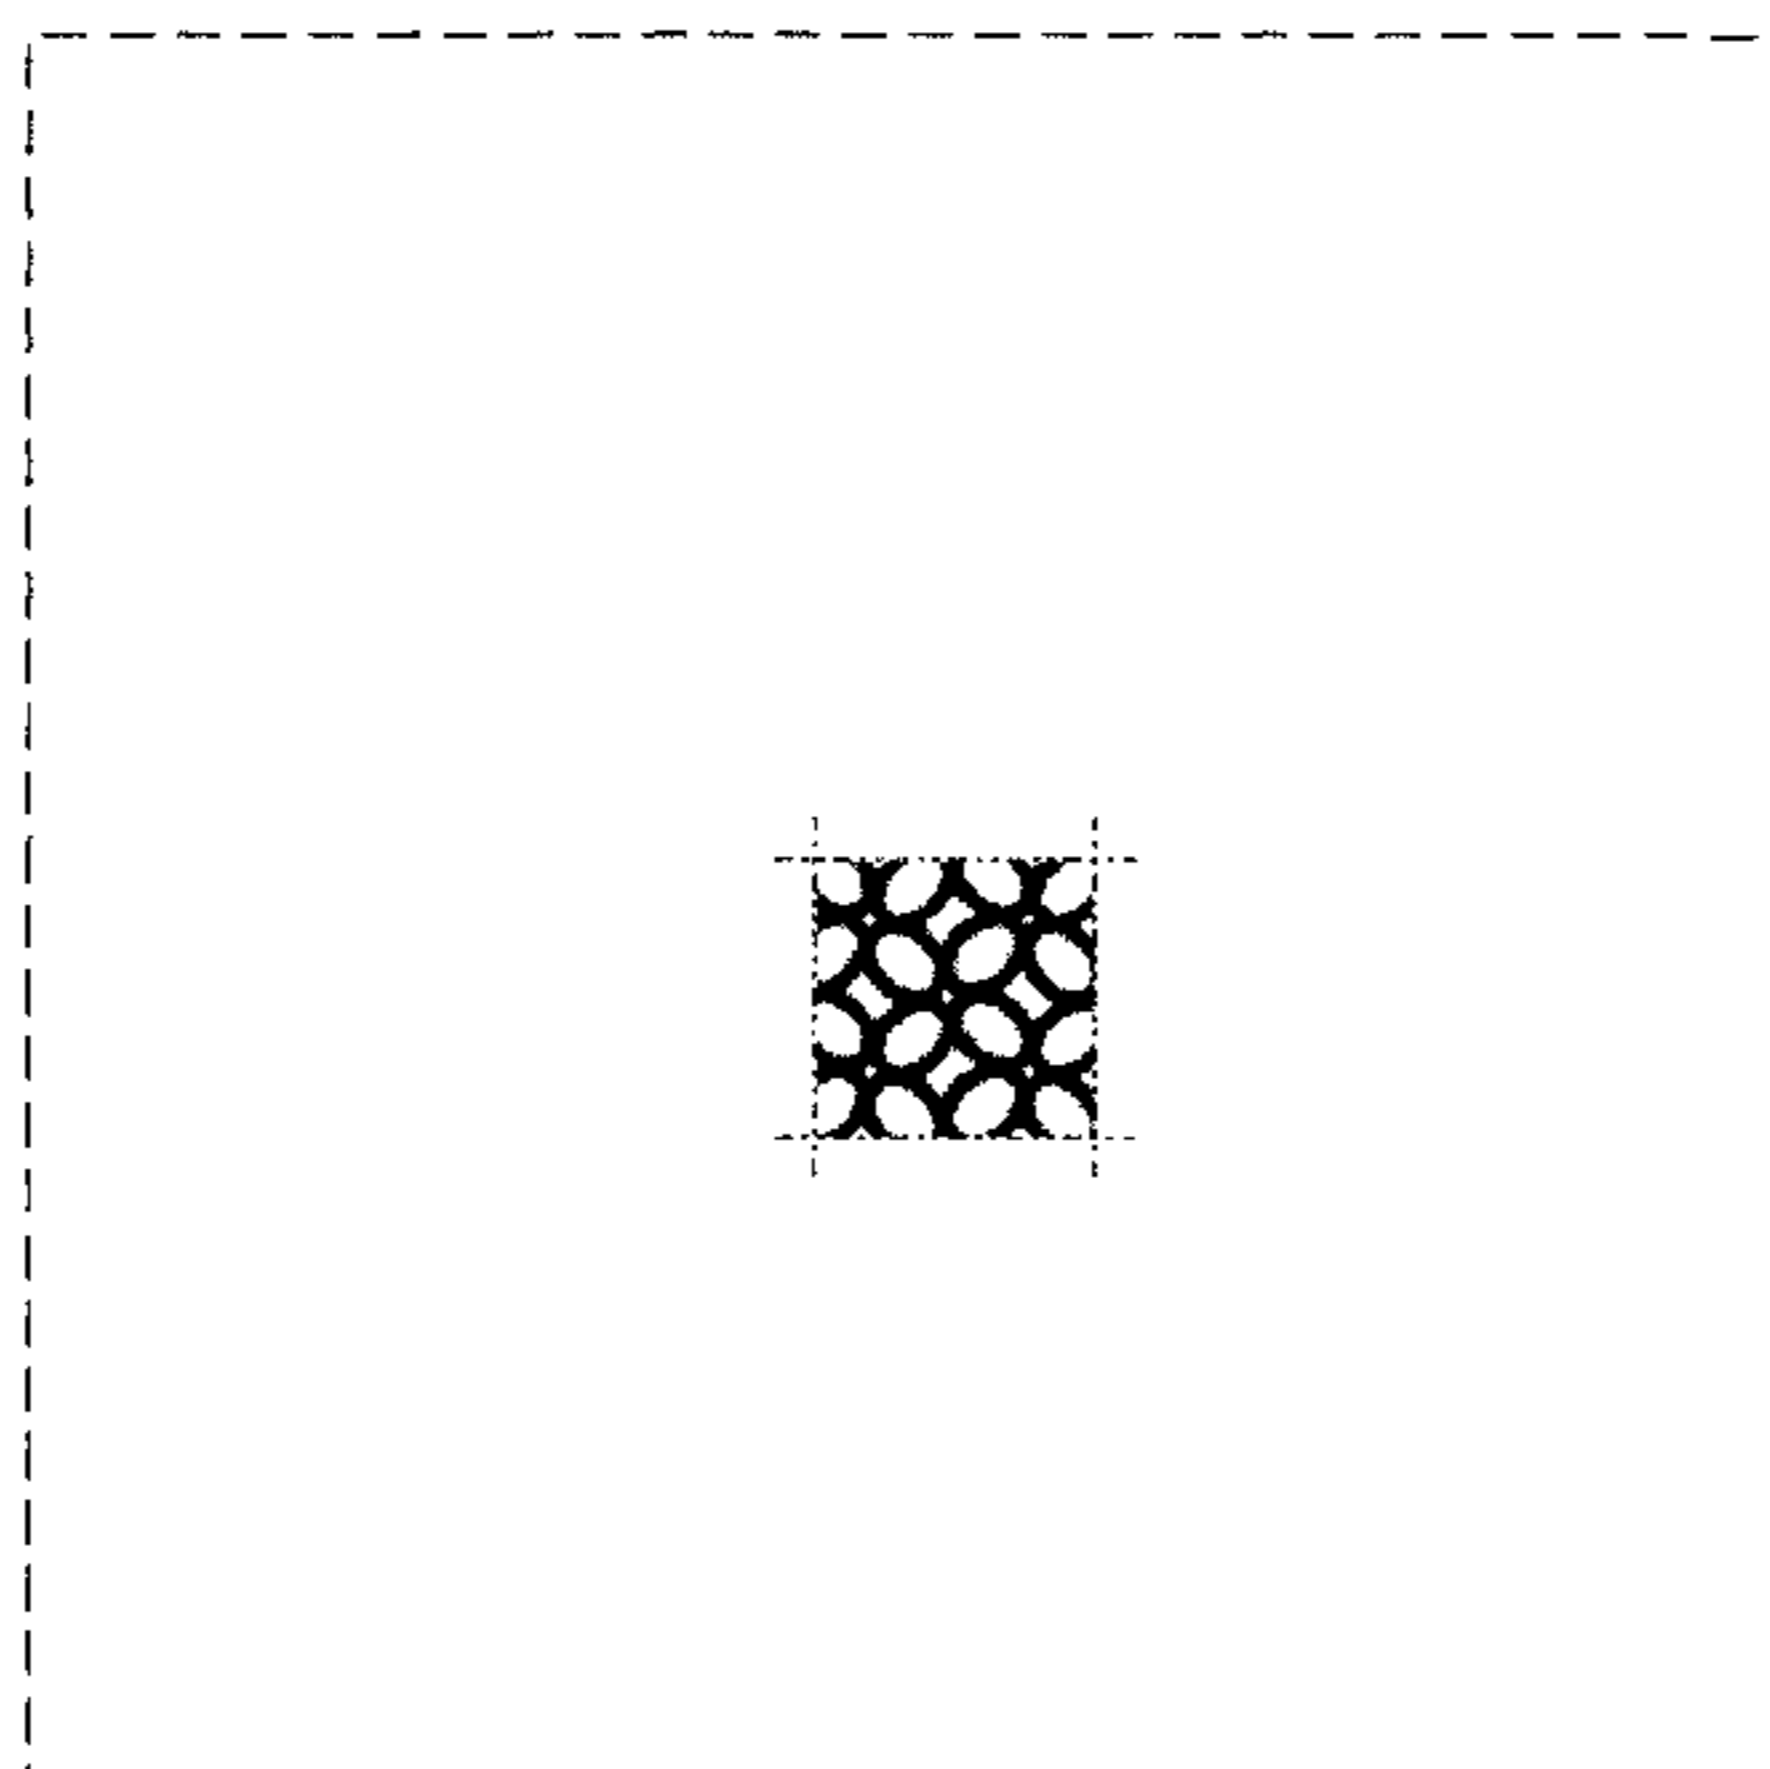

**DESCRIPTION**

The FIGURE is a top plan view of a surface patter for a paper product showing our new ornamental design. It is understood that the inner perimeter of broken lines defines the surface pattern, which repeats uniformly and indefinitely throughout the entire surface of the paper product. The outer perimeter of broken lines indicates that the paper product is of indeterminate length and width.

The broken line showings are for illustrative purposes only and form no part of the claimed design.

The surfaces or portions not shown in the drawings or described in the specification form no part of the claimed design.
