The ornamental design for a chest protector, substantially as
shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a chest protector showing my
new design;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a rear elevational view thereof;

FIG. 4 is a side elevational view thereof with the opposite
side being a mirror image;

FIG. 5 is a top plan view thereof; and,

FIG. 6 is a bottom view thereof.

The dashed and dotted lines as well as the broken lines on
the surface of the chest protector in FIGS. 1–6 are for
illustration purposes only and do not form part of the
claimed design. The fragmentary hatching seen on the chest
protector and straps is understood to represent fabric and the
fragmentary stipple shading seen in the FIG. 3 and 6 views
is understood to represent contrasting material. Both are
understood to repeat uniformly through the areas upon
which they are shown.
