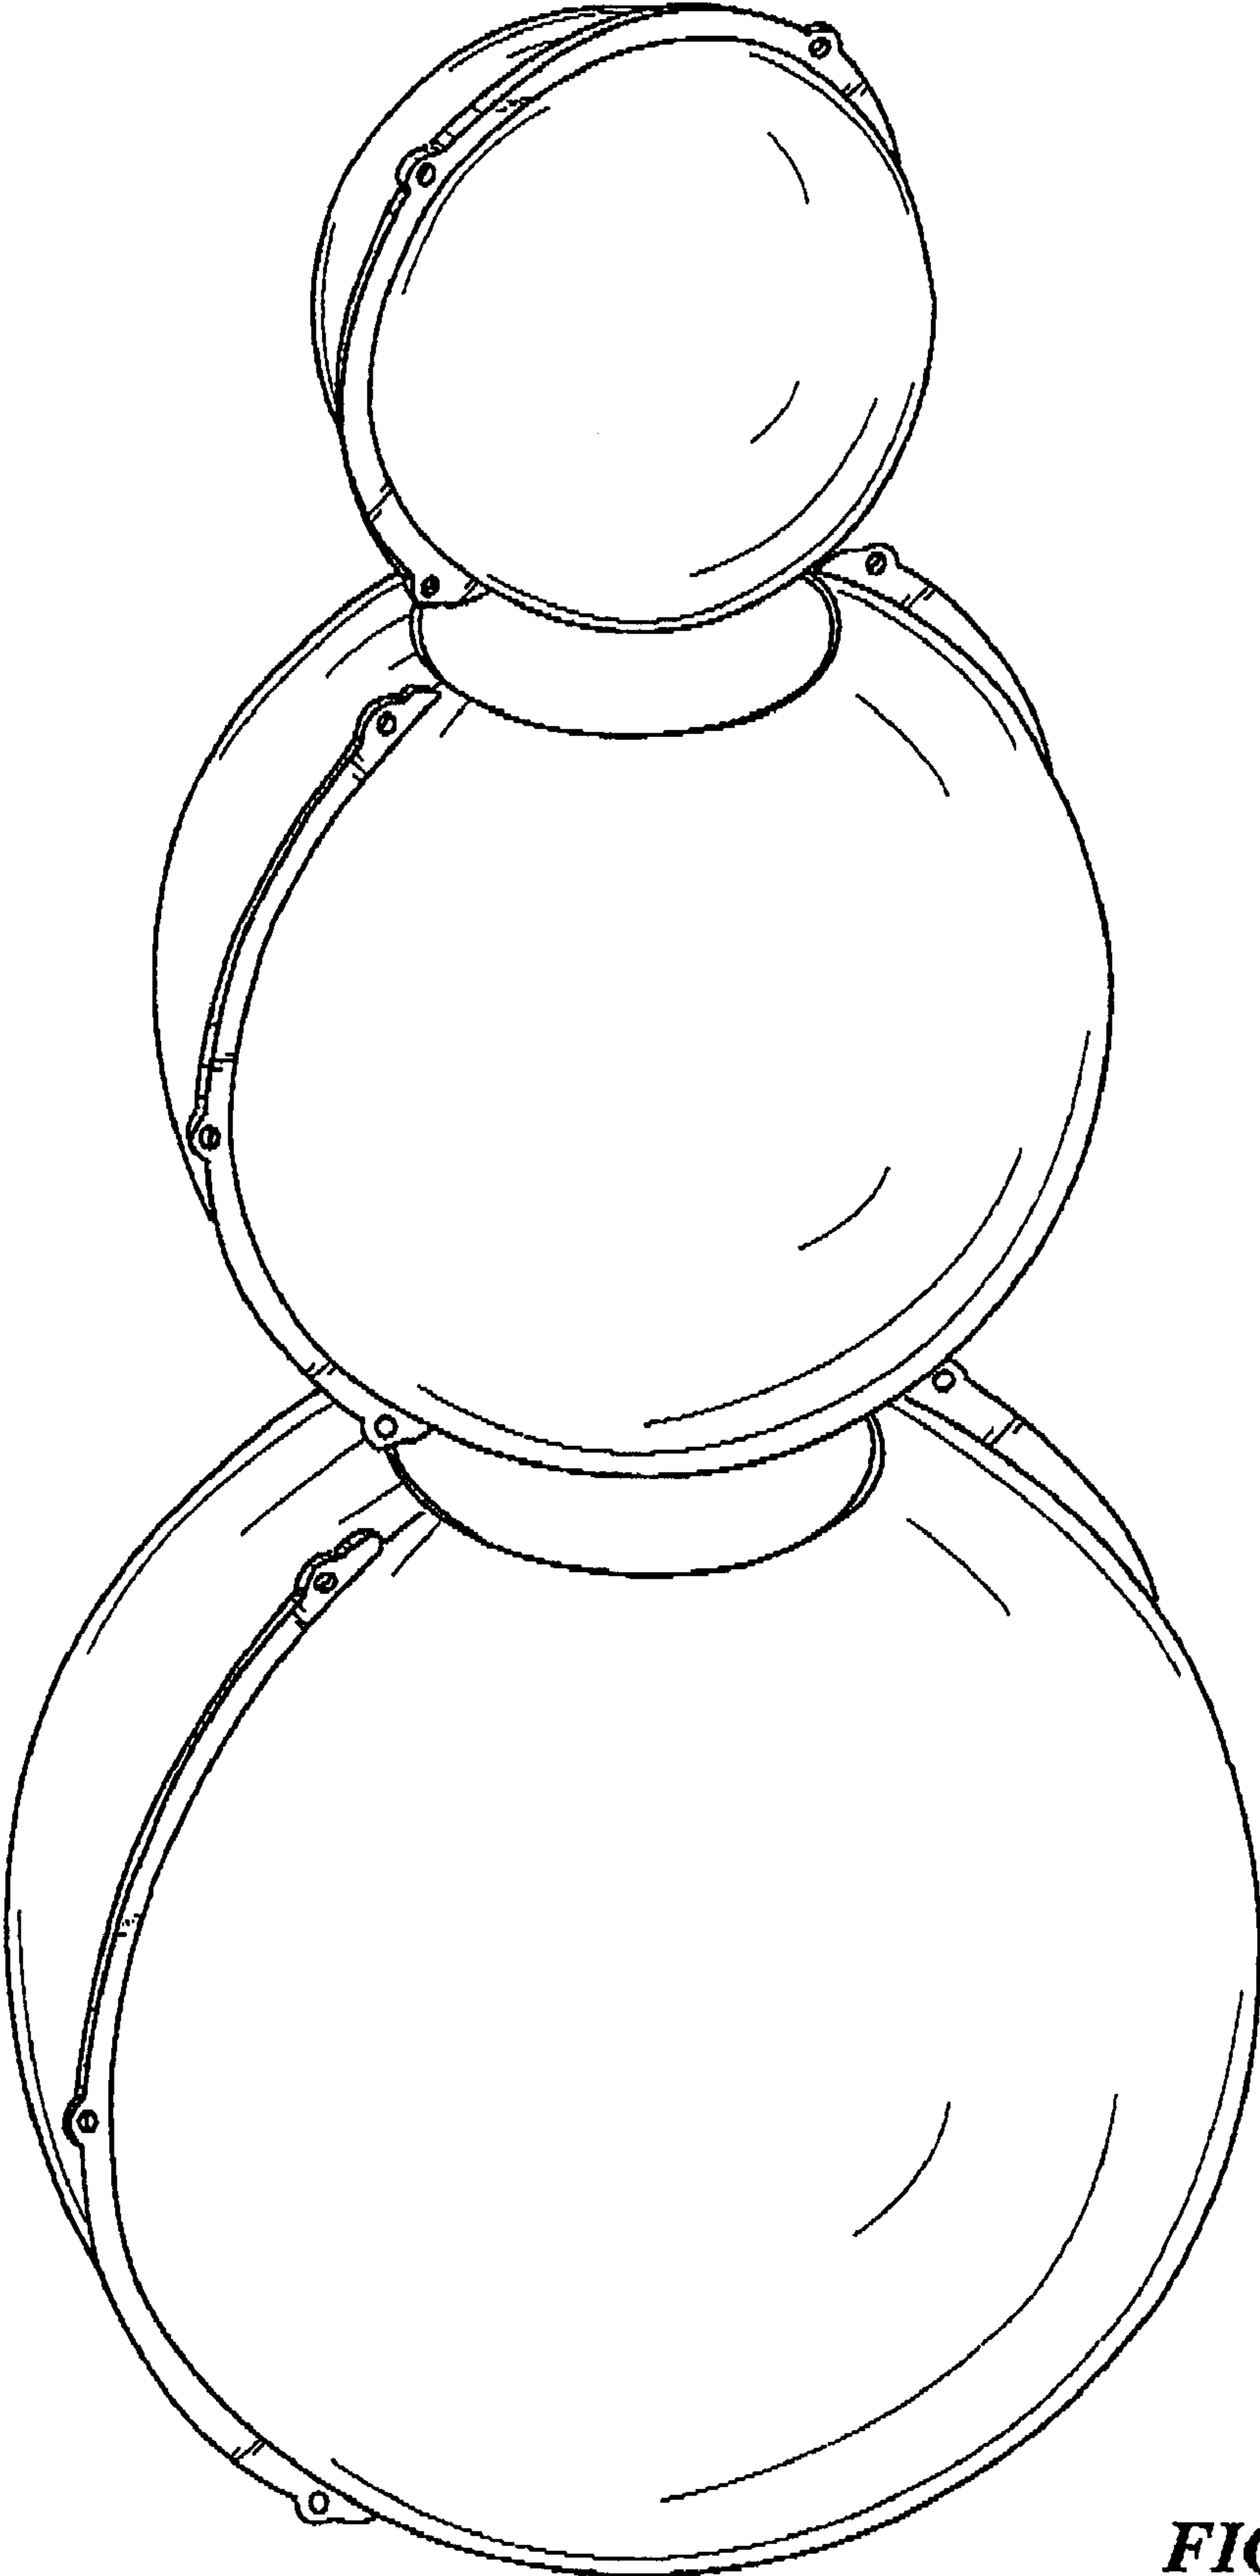

FIG. 2 shows each portion of the new snowman mold  
design, as shown in FIG. 1, separated into a first half section  
having a mating flange along its periphery and a second half  
section having a corresponding mating flange along its  
periphery; the top, middle, and bottom portions each having  
a lower opening, and the middle and bottom portions each  
having a top opening;

FIG. 3 is a perspective view of the first half section and the  
second half section of each portion of the new snowman  
mold stacked/nested as shown; and,

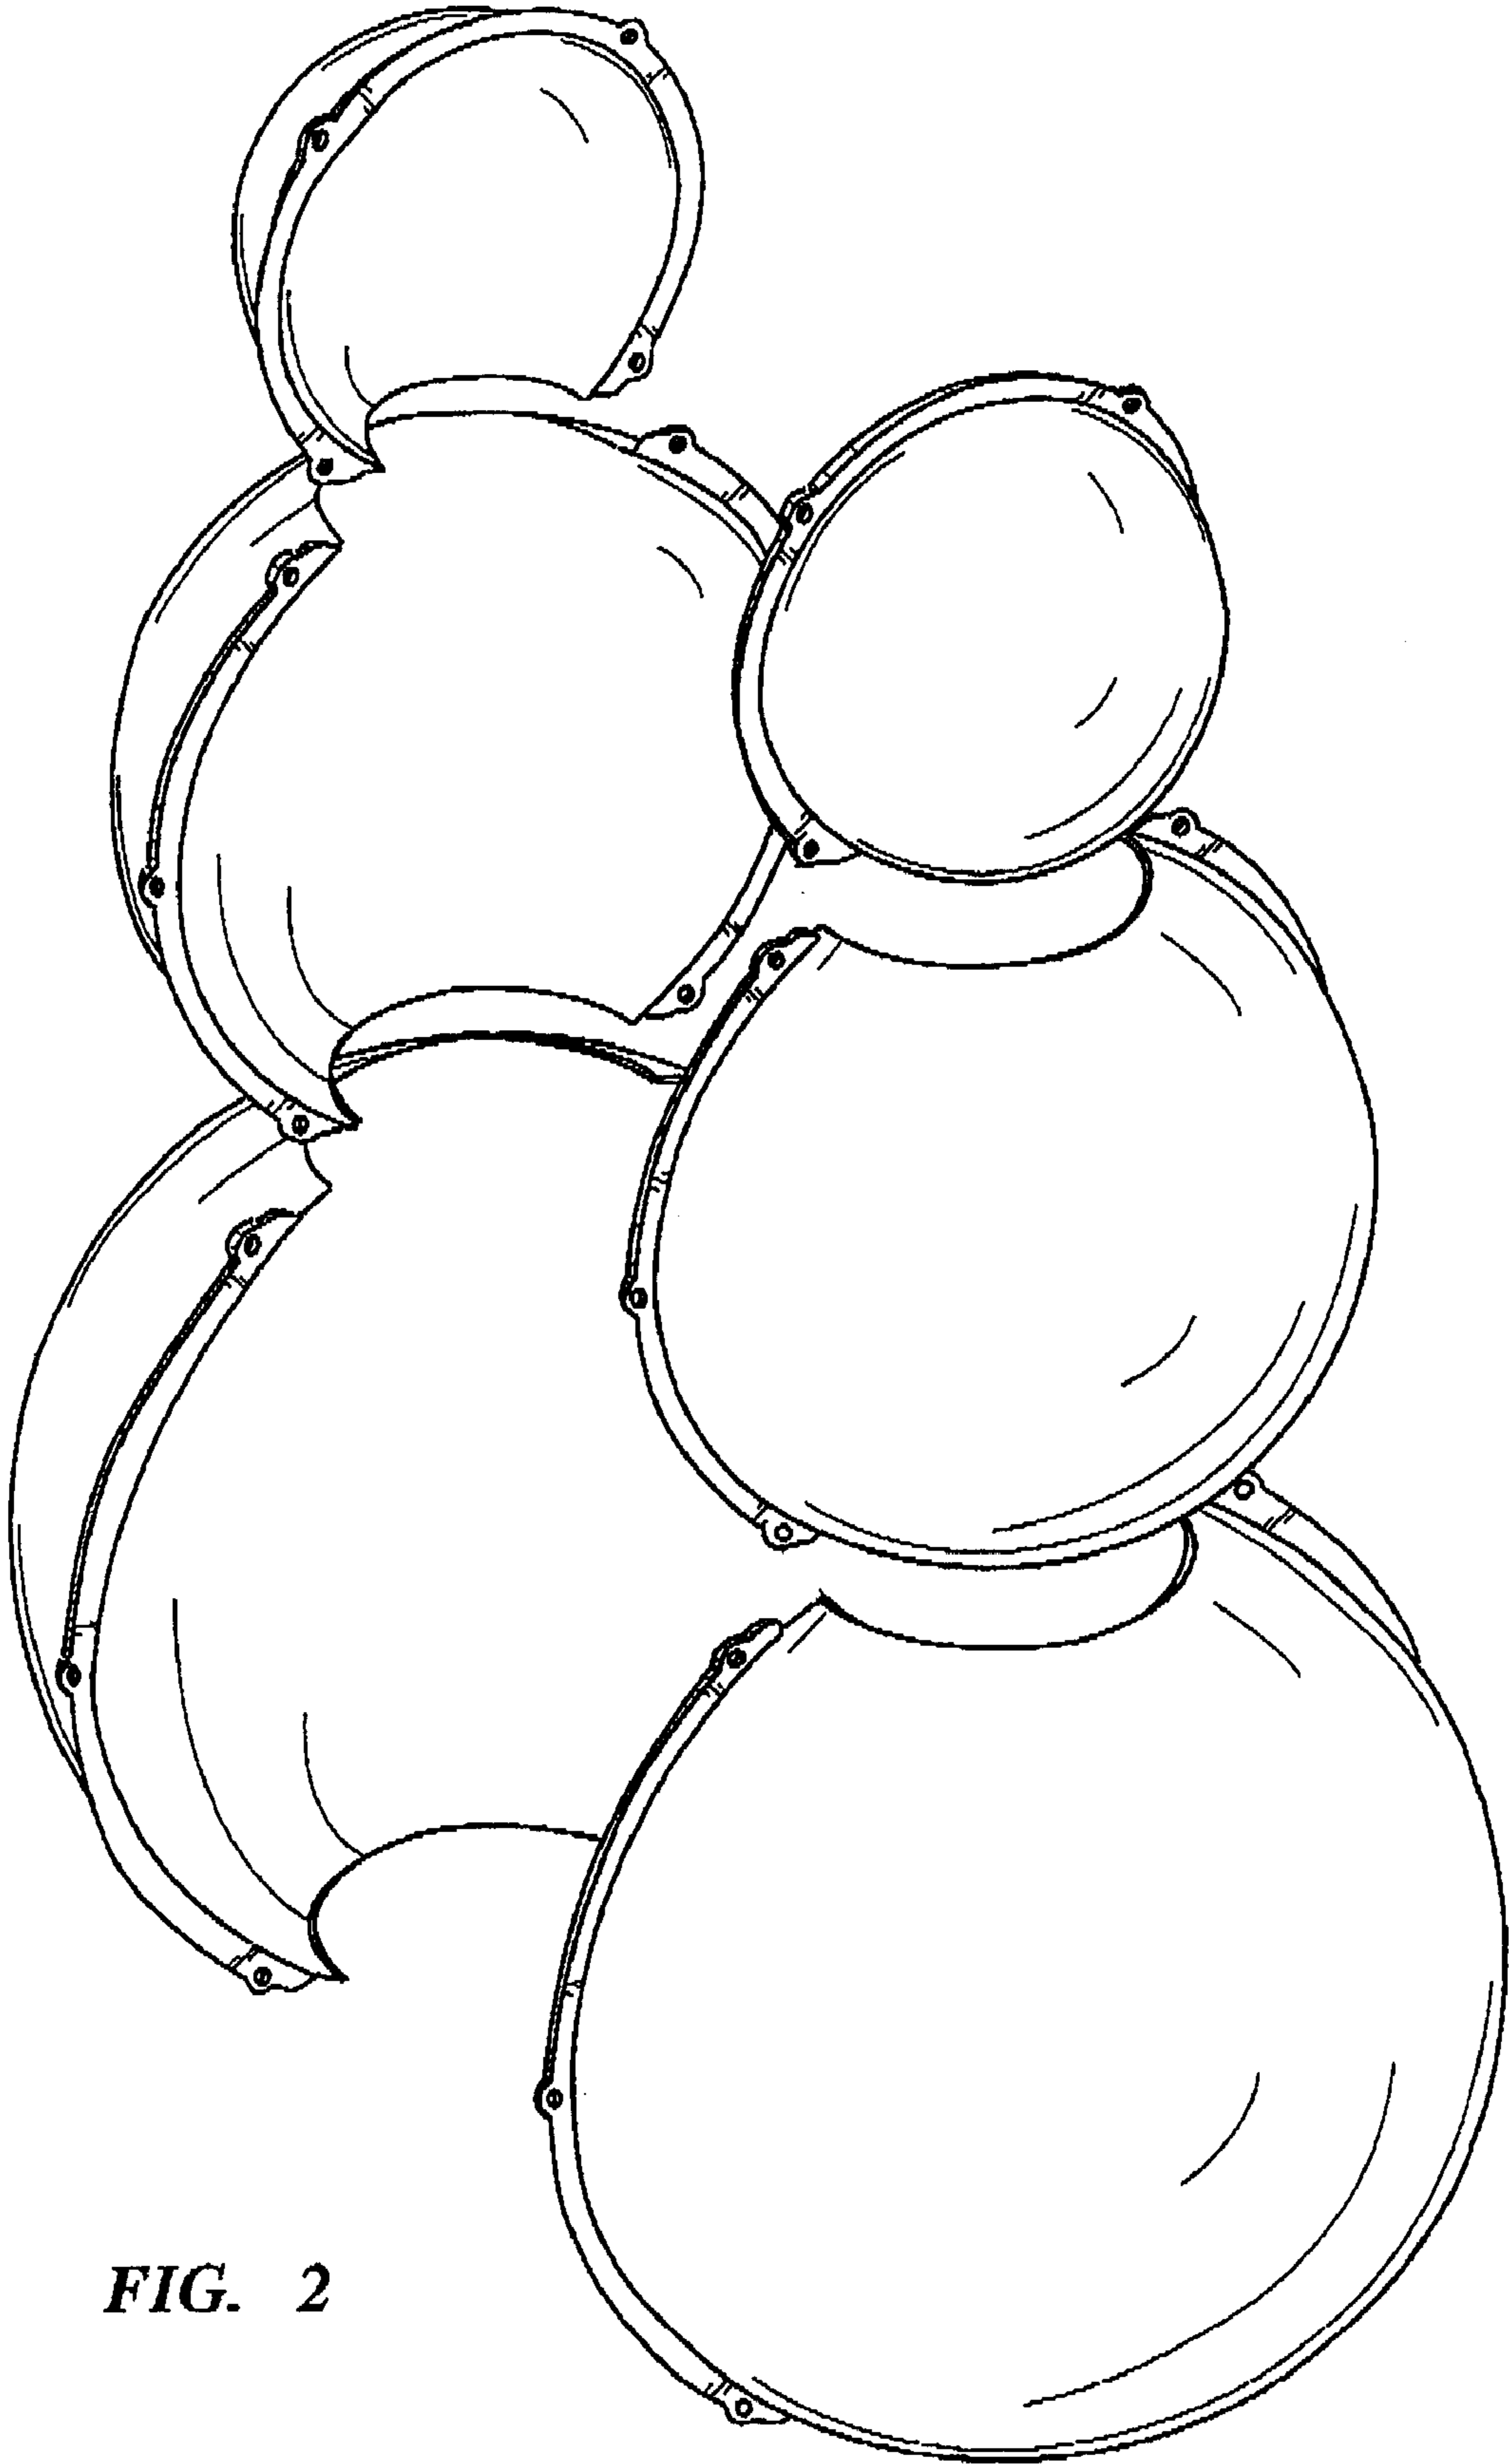

FIG. 4 shows a half section of the top, middle, and top  
portion packed with snow, the snow forming no part of the  
new snowman mold design.
