(57) **CLAIM**

The ornamental design for a tire tread, as shown and
described.

DESCRIPTION

FIG. 1 is a side perspective view of a tire tread showing our
new design, it being understood that the tread pattern is
repeated throughout the circumference of the tire tread, the
opposite side being the same as that shown;

FIG. 2 is a front elevational view of the right side thereof,
the opposite side being identical thereto; and,

FIG. 3 is a side elevational view of the right side thereof, the
opposite side being identical thereto; and,

FIG. 4 is an enlarged fragmentary front elevational view
thereof.

The broken lines defining the tire sidewall, inner bead, and
the peripheral boundary between the claimed tire tread and
sidewall are for illustrative purposes only and form no part
of the claimed design.

In the drawings, the dark stippled surface shading represents
the recessed portion of the tread grooves, having the depth
shown at the top and bottom of FIG. 2.
