(57) **CLAIM**

The ornamental design for a heat element tip for skin heating device, as shown and described.

DESCRIPTION

The present application is related to copending and commonly assigned United States design patent application Ser.

No. 29/243,341, concurrently filed herewith, the disclosure of which is hereby incorporated herein by reference.

Skin heating devices, with which embodiments of the heat element tip of the present invention may be used, provide a portable, self-contained unit for delivering controlled heat therapy to selected areas of a user's skin. Such selected areas of the skin may comprise lesions, disease, rash, etcetera. The controlled heat therapy affords treatment of such lesions, disease, rash etcetera. Heat element tips of embodiments of the present invention provide replaceable tip components for the aforementioned skin heating devices.

FIG. 1 shows an isometric view of a heat element tip of an embodiment of the present invention disposed on a host skin heating device which is illustrated in phantom for environment purposes and does not form part of the claimed invention;

FIG. 2 shows a top plan view of the heat element tip of FIG. 1;

FIG. 3 shows a front elevation view of the heat element tip of FIG. 1, wherein the mechanical and electrical connectors illustrated in phantom are shown for environment purposes and do not form part of the claimed invention;

FIG. 4 shows a bottom plan view of the heat element tip of FIG. 1, wherein the mechanical and electrical connectors illustrated in phantom are shown for environment purposes and do not form part of the claimed invention;

FIG. 5 shows a left elevation view of the heat element tip of FIG. 1, wherein the mechanical connector illustrated in phantom is shown for environment purposes and does not form part of the claimed invention; and,

FIG. 6 shows a right elevation view of the heat element tip of FIG. 1, wherein the mechanical and electrical connectors illustrated in phantom are shown for environment purposes and do not form part of the claimed invention.
