(57) **CLAIM**

We claim the ornamental design for an amniotic membrane perforator, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view showing the bottom and right side of an amniotic membrane perforator according to the present invention;

FIG. 2 is an elevational view of the right side of the amniotic membrane perforator of the present invention;

FIG. 3 is an elevational view of the bottom of the amniotic membrane perforator of the present invention;

FIG. 4 is an elevational view of the left side of the amniotic membrane perforator of the present invention;

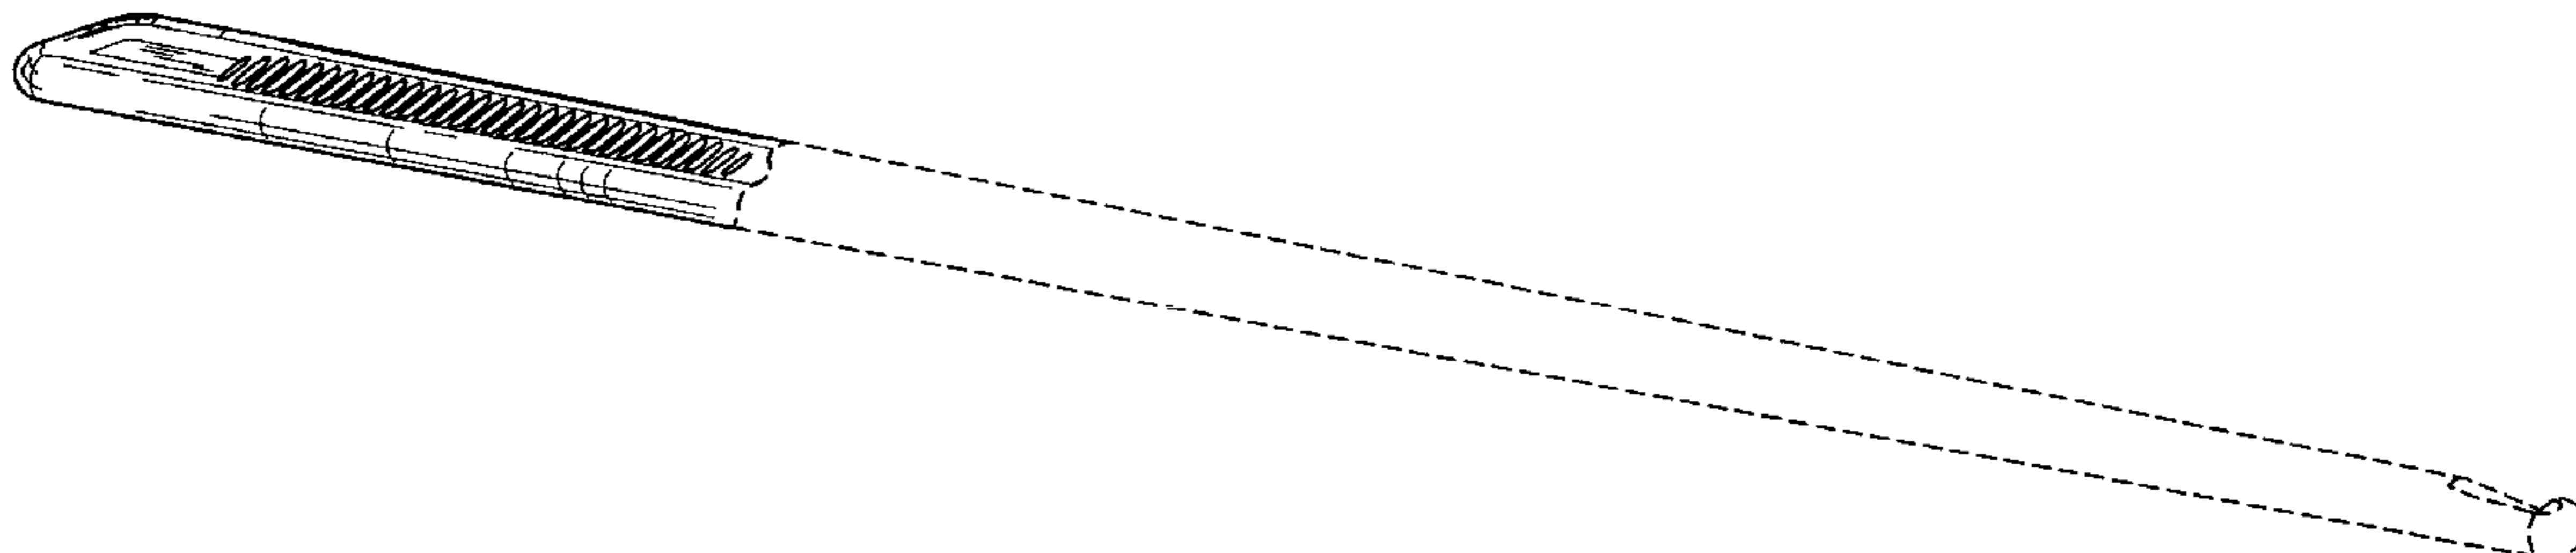

FIG. 5 is an elevational view of the top of the amniotic membrane perforator of the present invention;

FIG. 6 is an elevational view of the distal end of the amniotic membrane perforator of the present invention; and,

FIG. 7 is an elevational view of the proximal end of the amniotic membrane perforator of the present invention.

Those elements that are shown in the above drawings in phantom lines do not form a part of the design sought to be patented.
