FIG. 1 is a perspective view of the support of my design, on a reduced scale, showing its general wedge shape with a curved and upward slopping top surface;  
FIG. 2 is an elevational view of the back, head end, of the support showing suction cups extending from the bottom;  
FIG. 3 is a left side elevational view thereof, which is substantially the same as a right side view not shown, also showing the suction cups extending from the bottom;  
FIG. 4 is a front elevational view thereof better showing the curved and upward sloping top surface;  
FIG. 5 is a plan view of the bottom of the support which is substantially flat with suction cups extending therefrom to hold the support in place in a bathtub or the like;  
FIG. 6 is a side view illustration of how a small infant (shown in broken lines) would be placed on the top, curved surface of the support for washing its hair in a bathtub or the like (not shown); and,  
FIG. 7 is a side view illustration of how a larger child or toddler (shown in broken lines) would be placed with its neck on the support for washing its hair.  
The broken line showing of an infant and toddler is for illustrative purposes only and forms no part of the claimed design.
