(57) **CLAIM**

The ornamental design for a tire tread, as shown and
described.

DESCRIPTION

FIG. 1 is a perspective view of a tire tread showing our new
design, it being understood that the tread pattern repeats
circumferentially throughout the outer circumference and
shoulder of a tire, the opposite side perspective view being
identical thereto; and,

FIG. 2 is an enlarged fragmentary front elevation view of the
tire tread thereof of FIG. 1.

In the drawings, the dark stippled surface shading represents
the recessed groove portions of the tire tread having a depth
as best illustrated along the right edge of FIG. 1. The broken
line disclosure of the tire sidewall and inner bead is for
illustrative purposes only and forms no part of the claimed
design.
