See application file for complete search history.

(57) **CLAIM**

I claim the ornamental design for an outsole for a shoe, as shown and described.

DESCRIPTION

FIG. 1 is a bottom plan view of an outsole for a shoe showing my new design;
FIG. 2 is a right side view thereof;
FIG. 3 is a left side view thereof;
FIG. 4 is a front view thereof;
FIG. 5 is a rear view thereof; and,
FIG. 6 is an enlarged perspective view of the area labeled "6" in FIG. 1.

The parallel broken lines around the periphery of FIGS. 2–6, along with the broken curvilinear shape in FIG. 1, represent the boundaries of the design; with the broken lines themselves and the areas within them forming no part of the claim. Although only one of the generally oval or tear-drop shaped plateaus in FIGS. 2–6 is shown to be texturized with raised protrusions, all of the generally oval or tear-drop shaped plateaus are understood to have such texturized surfaces. Although the raised surface that does not include any generally oval or teardrop shaped plateaus on the raised surface, as shown in FIG. 6, depicts triangular textures extending over a portion of the raised surface, it is understood that the triangular textures extend across the entire raised surface.
