(57) **CLAIM**

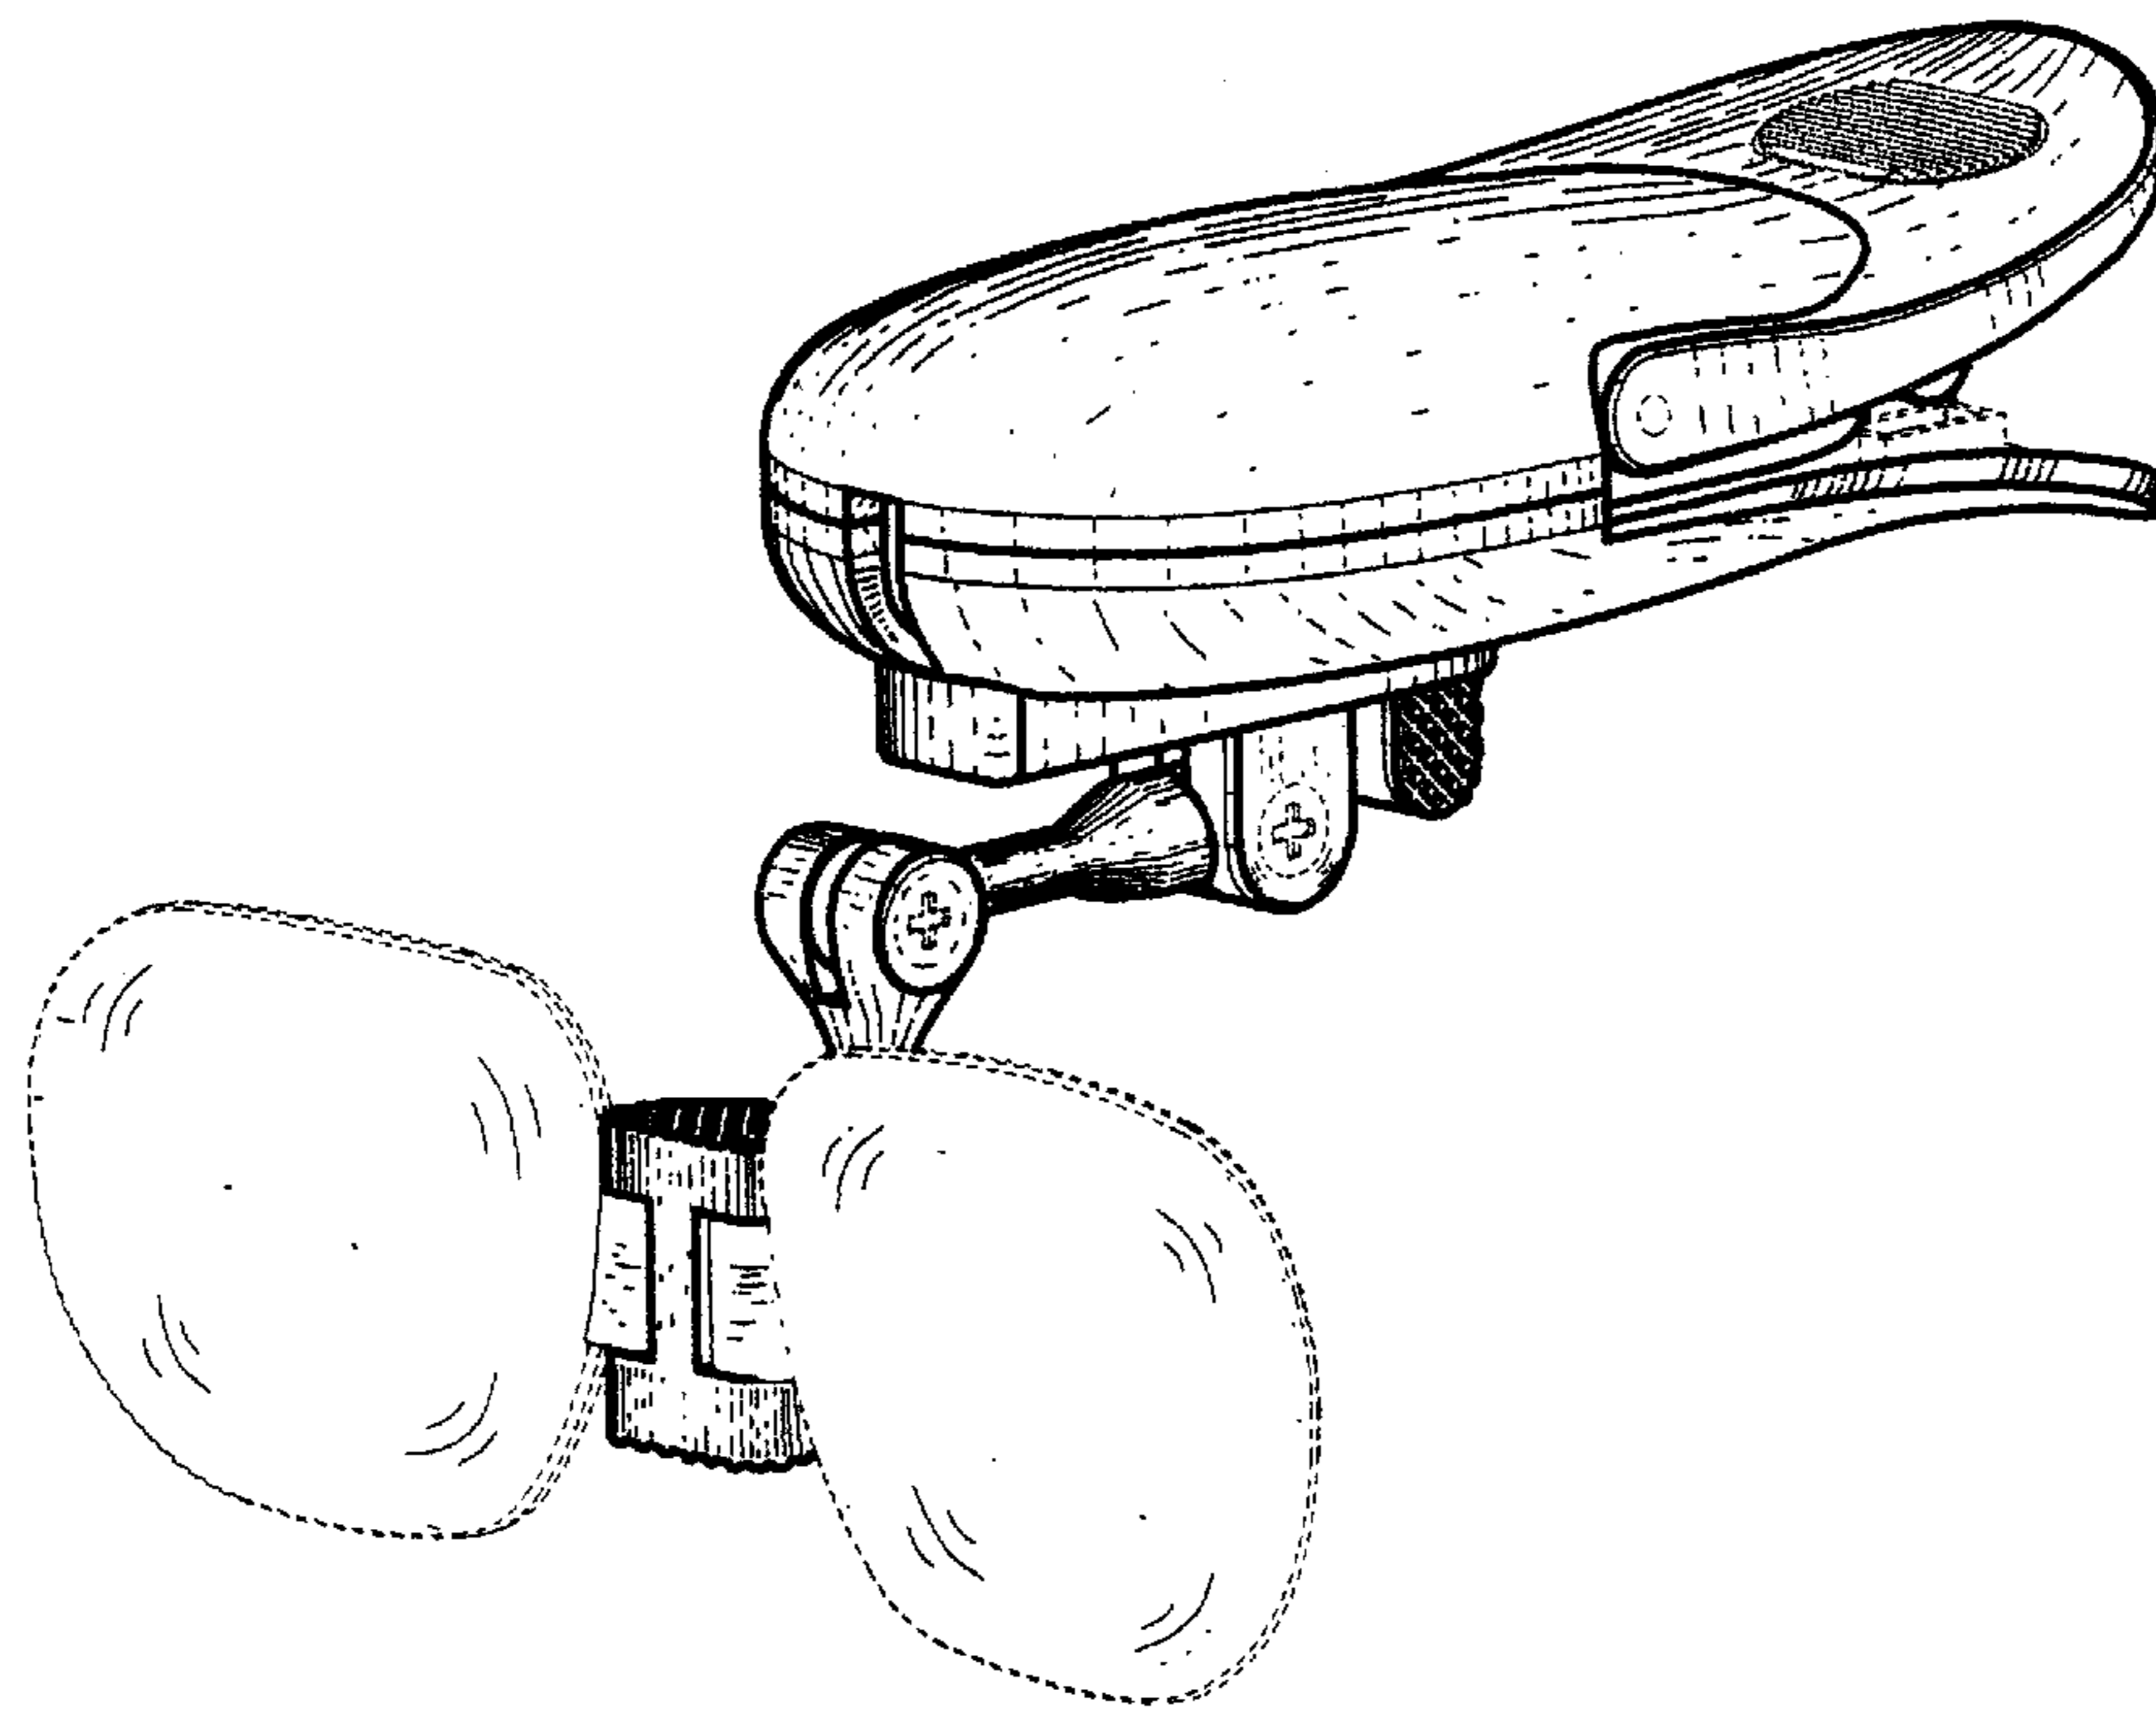

The ornamental design for a clip-on housing and support for a magnifier lens, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a clip-on housing and support for a magnifier lens showing our new design;
 FIG. 2 is a perspective view thereof, showing the support for the magnifier lens in a retracted position;
 FIG. 3 is a perspective view thereof, with the support being slightly extended from its fully retracted position;
 FIG. 4 is a top plan view of FIG. 1;
 FIG. 5 is a bottom plan view of FIG. 1;
 FIG. 6 is a right side elevational view of FIG. 1;
 FIG. 7 is a left side elevational view of FIG. 1;
 FIG. 8 is a first end elevational view of FIG. 1; and,
 FIG. 9 is a second end elevational view of FIG. 1.

The dotted lines are intended to show features that are environmental only and form no part of the claimed design (e.g. for example and without limitation, the finger grip and the lens form no part of the invention). Also, there is no intent to claim any surface indicia as all such surface lines are merely intended to be shading lines.
