(57) **CLAIM**

The ornamental design for hydraulic valve manifold block, as shown and described.

**DESCRIPTION**

In a preferred embodiment, the nature of this product is as a hydraulic valve manifold block primarily useful for conveying hydraulic fluid between inlet and outlet ports and a plurality of valves that can be mounted on the hydraulic valve manifold block.

FIG. 1 is a downward perspective view from a right front corner of a hydraulic valve manifold block embodying the new design;

FIG. 2 is a upward perspective view from a left rear corner thereof;

FIG. 3 is a top plan view thereof;

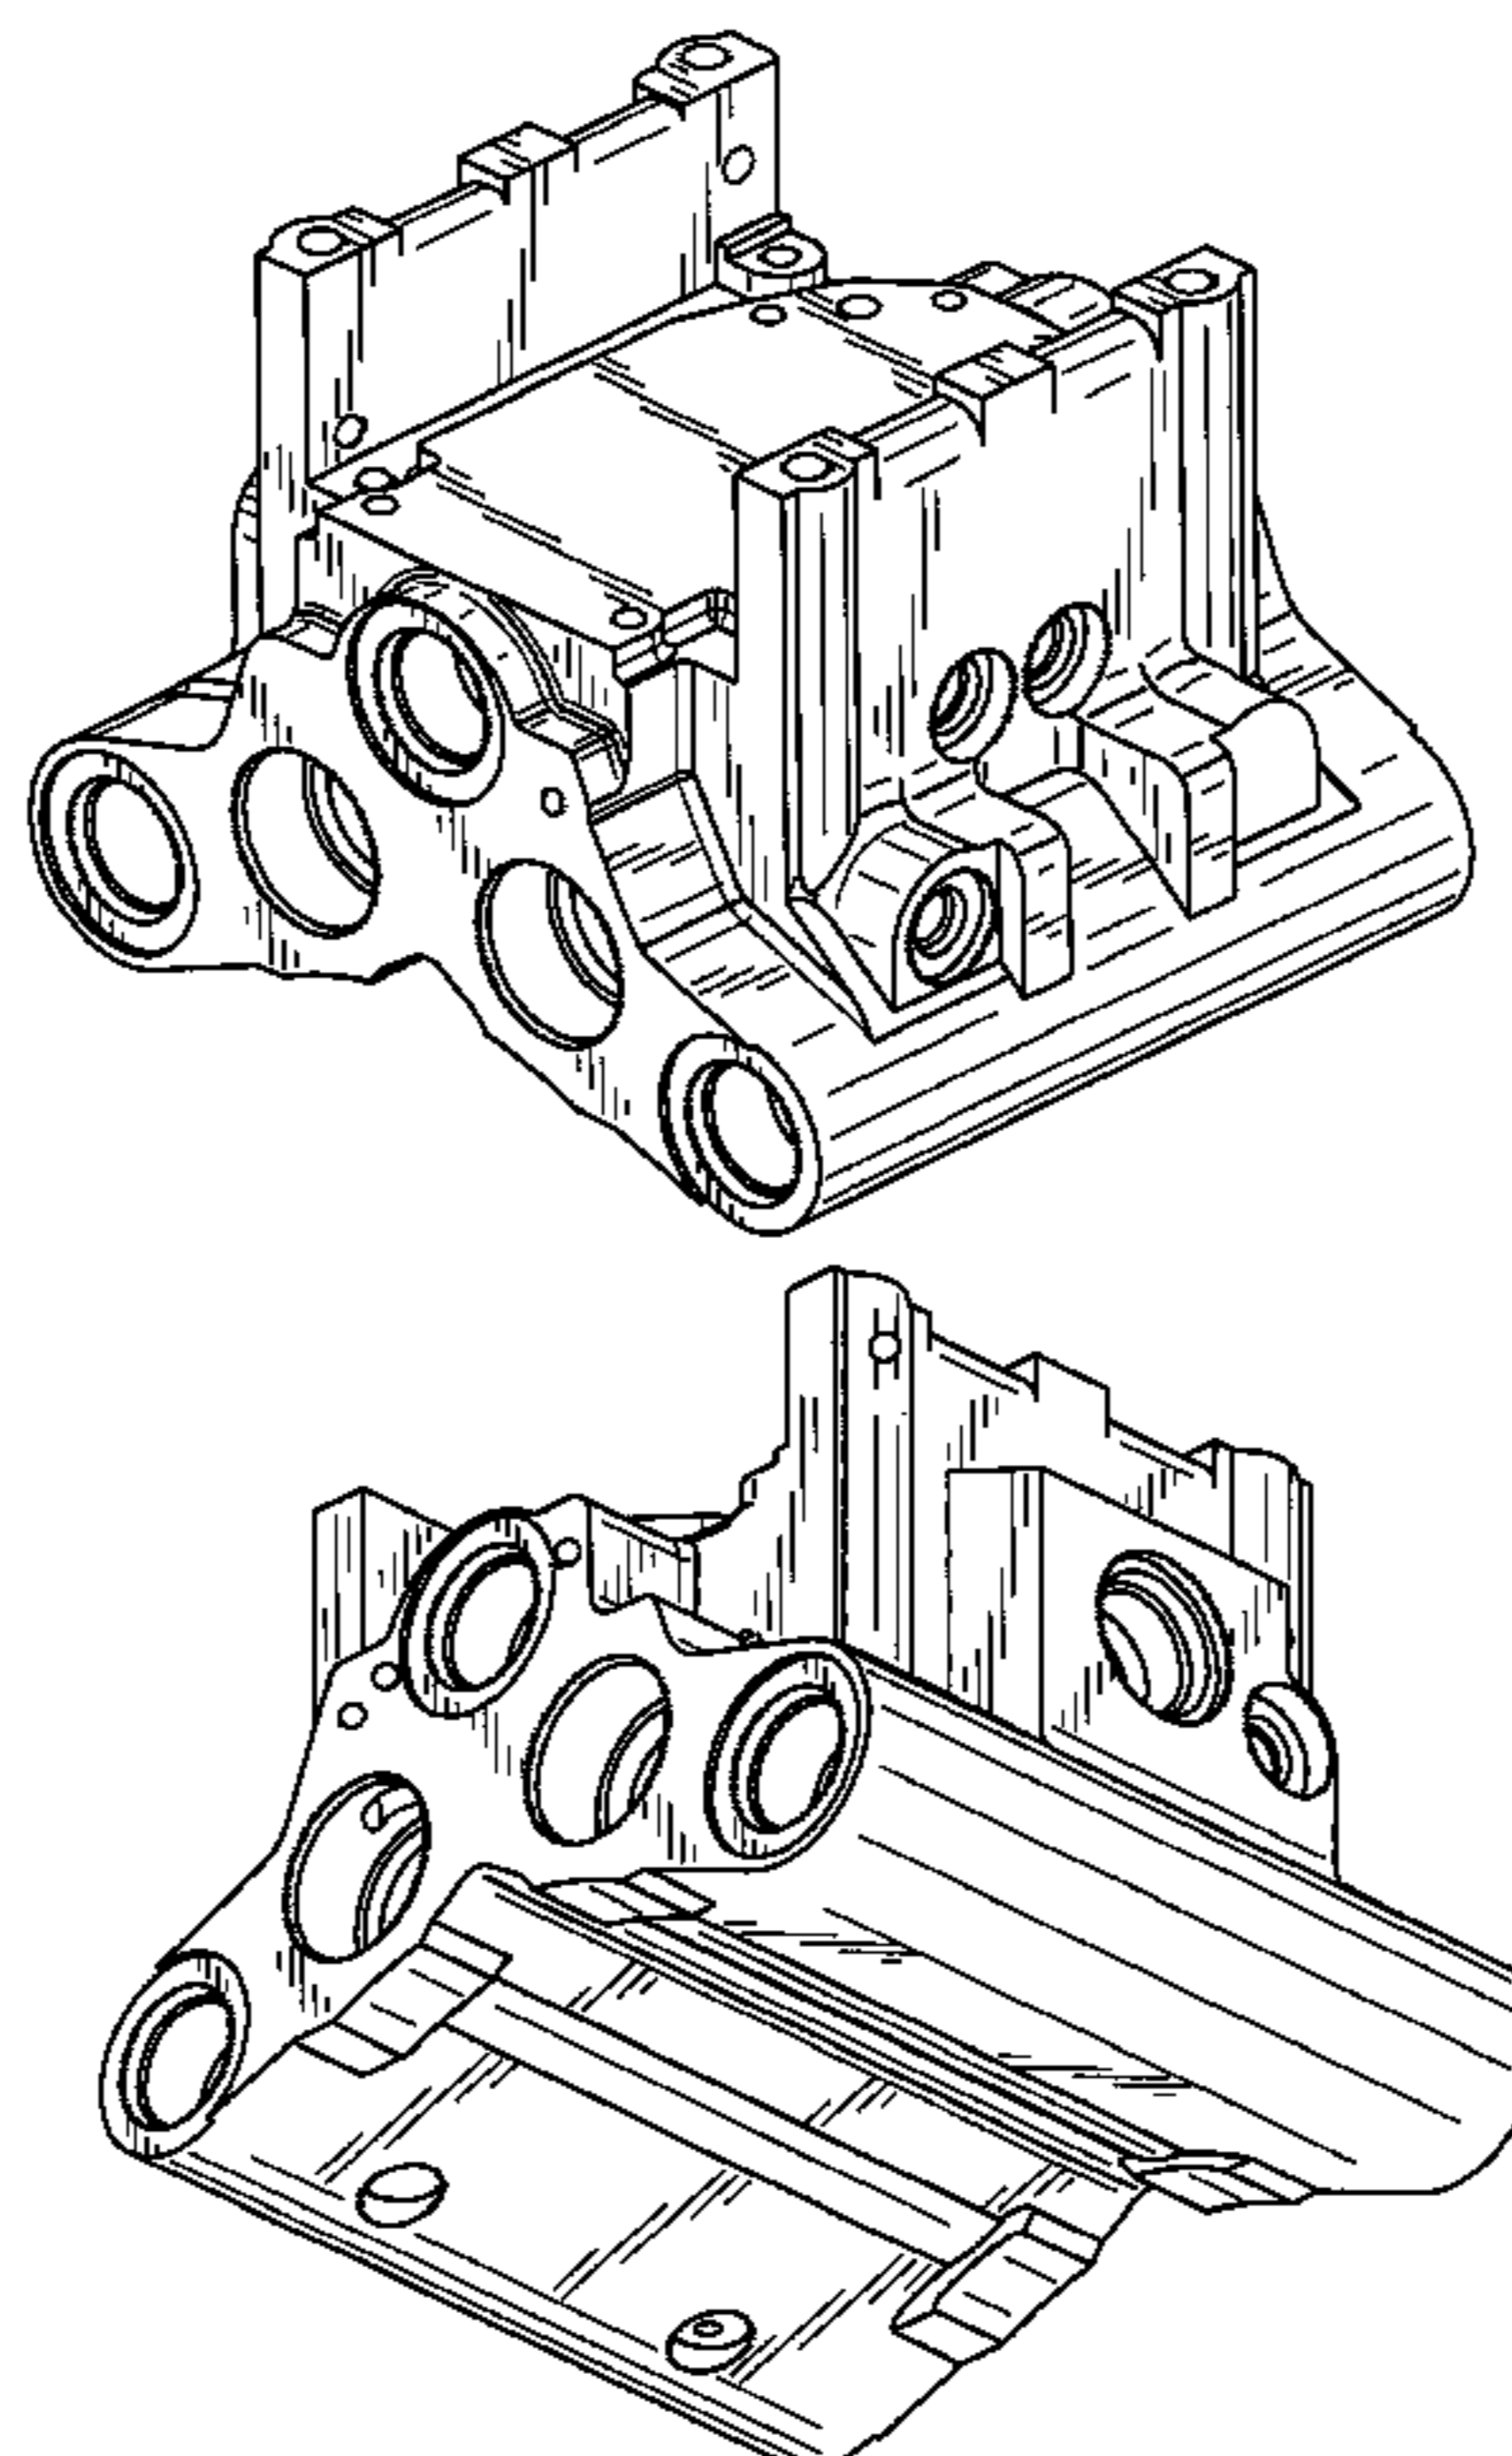

FIG. 4 is a front elevational view thereof, wherein the rear elevational view is a mirror image of the front elevational view;

FIG. 5 is a bottom plan view thereof;

FIG. 6 is a left side elevational view thereof; and,

FIG. 7 is a right side elevational view thereof.
