(57) **CLAIM**

The ornamental design for a food container array, as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of the first embodiment of the food container array of the present invention;

FIG. 2 is a front elevation view of the first embodiment of the food container array of the present invention, with the rear elevation view a mirror image of the front elevation view;

FIG. 3 is a left elevation view of the first embodiment of the food container array of the present invention, with the right elevation view a mirror image of the left elevation view;

FIG. 4 is a top elevation view of the first embodiment of the food container array of the present invention;

FIG. 5 is a bottom elevation view of the first embodiment of the food container array of the present invention;

FIG. 6 is a bottom perspective view of the first embodiment of the food container array of the present invention;

FIG. 7 is a top perspective view of the second embodiment of the food container array of the present invention;

FIG. 8 is a front elevation view of the second embodiment of the food container array of the present invention, with the rear elevation view a mirror image of the front elevation view;

FIG. 9 is a left elevation view of the second embodiment of the food container array of the present invention, with the right elevation view a mirror image of the left elevation view;

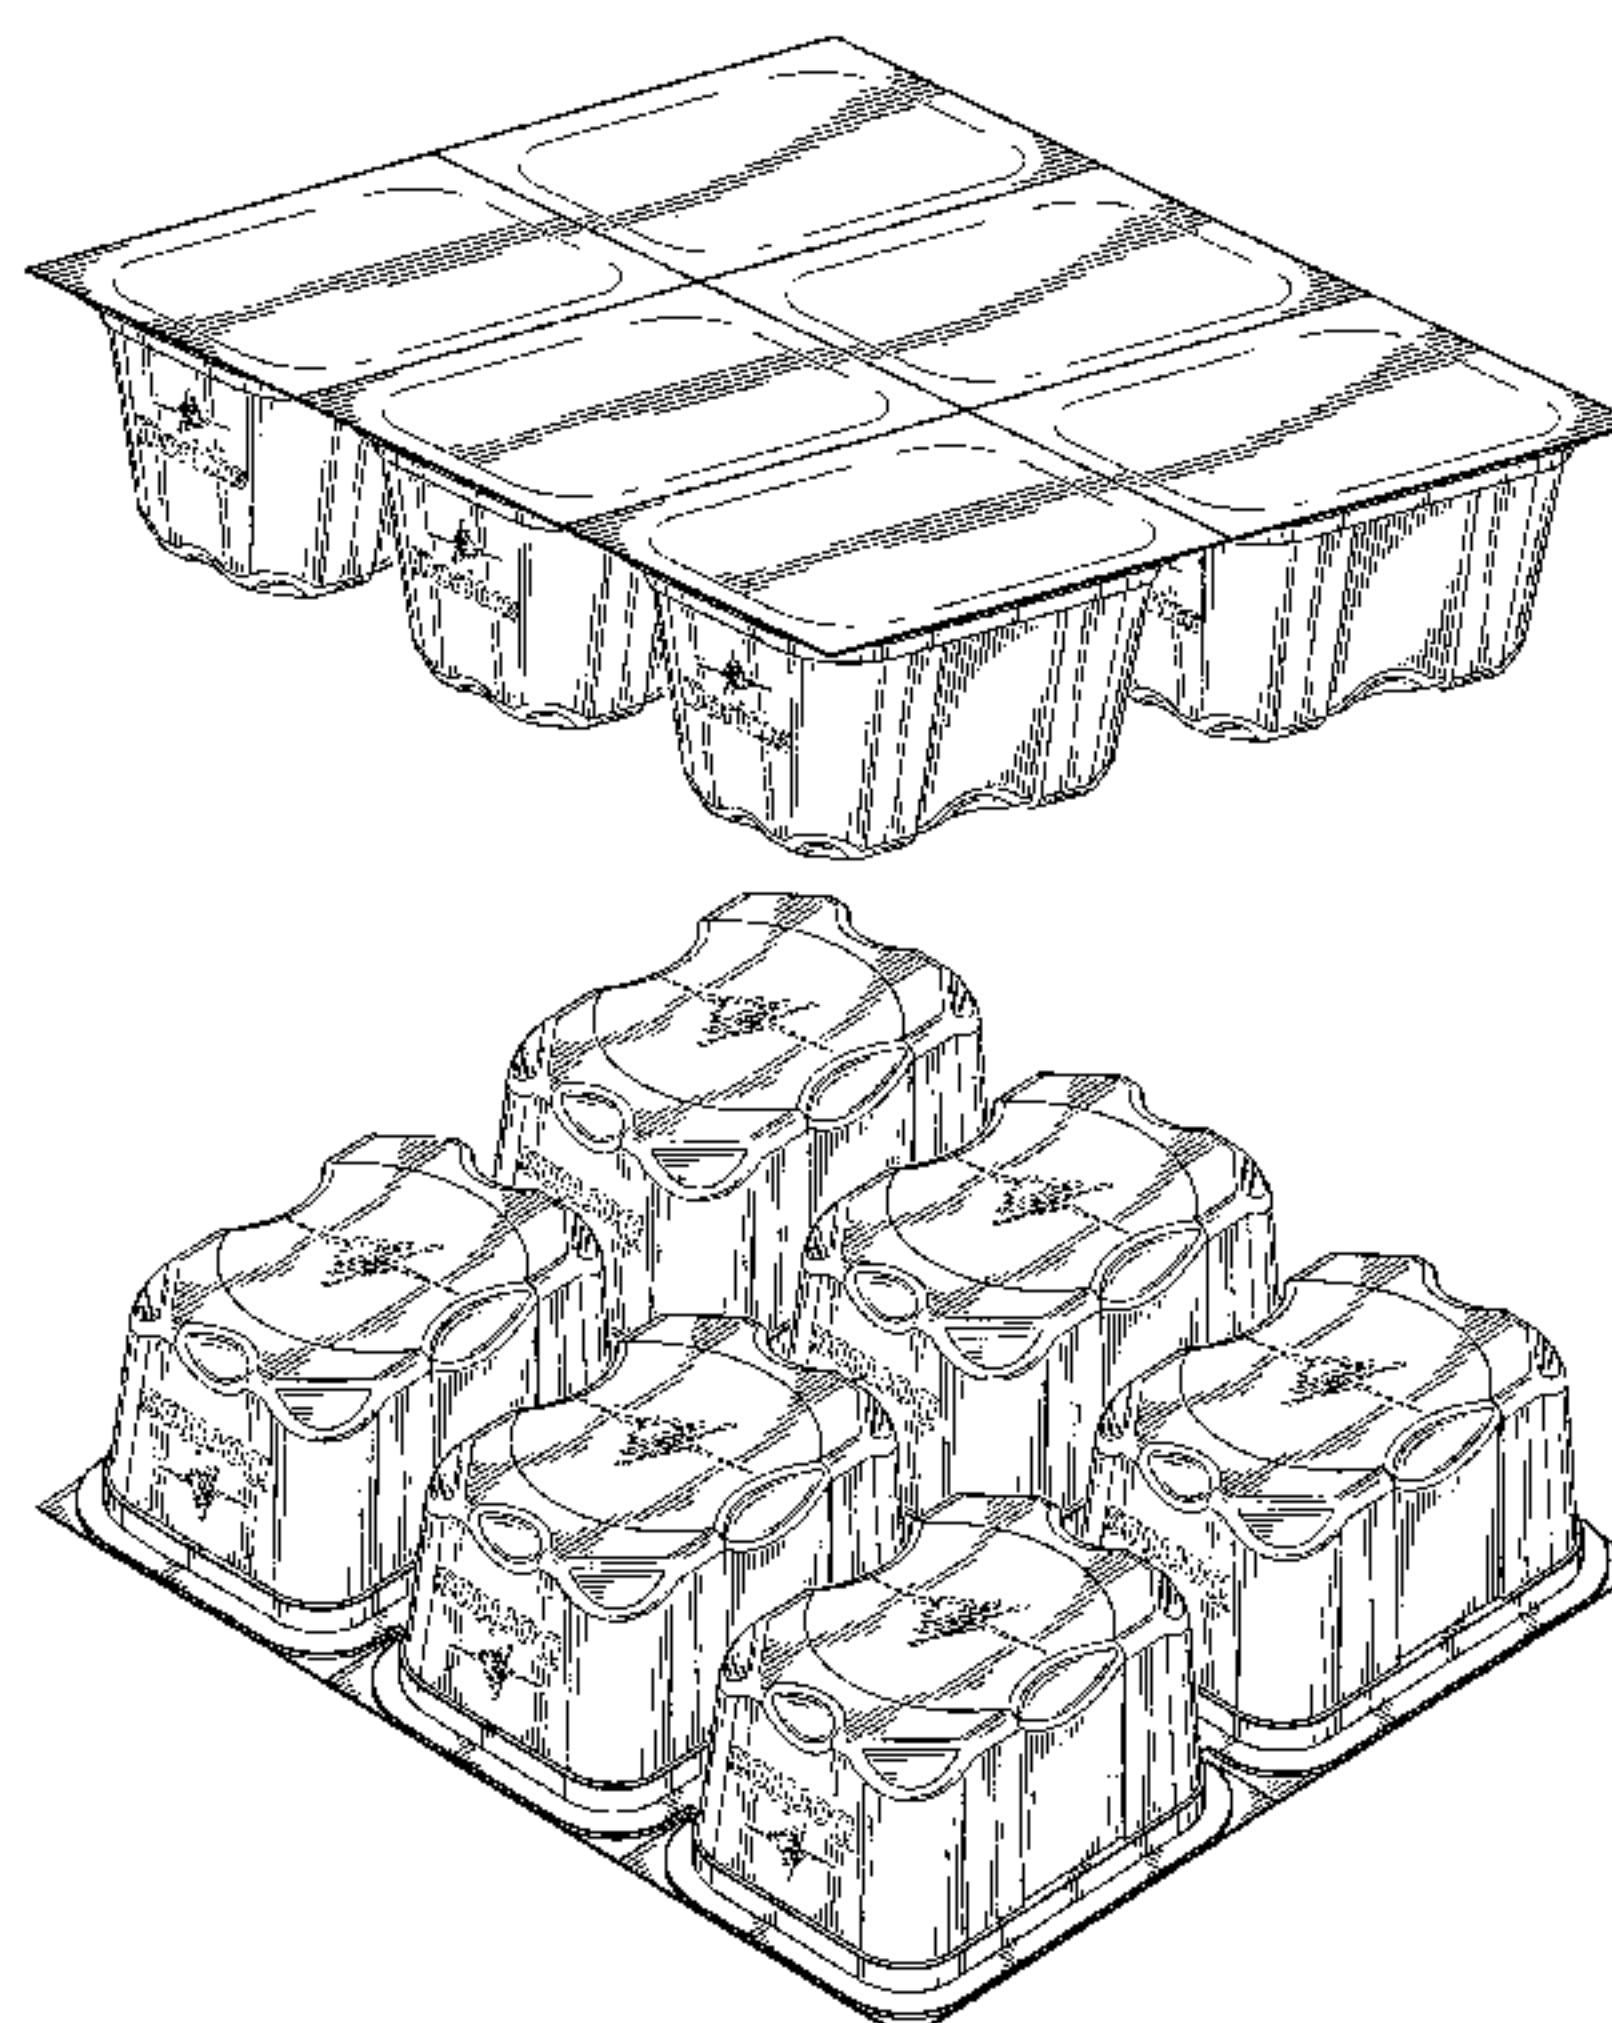

FIG. 10 is a top elevation view of the second embodiment of the food container array of the present invention;

FIG. 11 is a bottom elevation view of the second embodiment of the food container array of the present invention; and,

FIG. 12 is a bottom perspective view of the second embodiment of the food container array of the present invention.

The broken line showing product logos in FIGS. 1, 2, 5, 6, 7, 8, 11, and 12 is for illustrative purposes only and forms no part of the claimed design.
