(57) **CLAIM**

The ornamental design for a tire tread, as shown and  
described.

**DESCRIPTION**

FIG. 1 is a perspective view of a tire tread showing my new  
design, it being understood that the tread pattern repeats  
circumferentially throughout the outer circumference and  
shoulder of a tire, the opposite side perspective view being  
an identical image thereto; and,

FIG. 2 is an enlarged fragmentary front elevation view of the  
tire tread thereof of FIG. 1.

In the drawings, the dark stippled surface shading represents  
the recessed groove portions of the tire tread having a depth  
as best illustrated along the right edge of FIG. 1. The broken  
line disclosure of the tire sidewall and inner bead is for  
illustrative purposes only and forms no part of the claimed  
design.
