(57) **CLAIM**

The ornamental design for a directional display, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a directional display according to a first embodiment of the invention, with elements in dashed lines forming no part of the claimed design.

FIG. 2 is a front view of a directional display according to a first embodiment of the invention, with elements in dashed lines forming no part of the claimed design.

FIG. 3 is a rear view of a directional display according to a first embodiment of the invention, with elements in dashed lines forming no part of the claimed design.

FIG. 4 is a top view of a directional display according to a first embodiment of the invention.

FIG. 5 is a bottom view of a directional display according to a first embodiment of the invention.

FIG. 6 is a left side view of a directional display according to a first embodiment of the invention.

FIG. 7 is a right side view of a directional display according to a first embodiment of the invention, with elements in dashed lines forming no part of the claimed design.

FIG. 8 is a perspective view of a directional display according to a second embodiment of the invention, with elements in dashed lines forming no part of the claimed design.

FIG. 9 is a front view of a directional display according to a second embodiment of the invention, with elements in dashed lines forming no part of the claimed design.

FIG. 10 is a rear view of a directional display according to a second embodiment of the invention, with elements in dashed lines forming no part of the claimed design.

FIG. 11 is a top view of a directional display according to a second embodiment of the invention.

FIG. 12 is a bottom view of a directional display according to a second embodiment of the invention.

FIG. 13 is a left side view of a directional display according to a second embodiment of the invention, with elements in dashed lines forming no part of the claimed design; and,

FIG. 14 is a right side view of a directional display according to a second embodiment of the invention.
