CLAIM

The ornamental design for a stud mount, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the first embodiment of the stud mount showing my new design. All features shown in phantom (i.e. the exemplary structural stud, washer, nut, J-hook, and screws or bolts) are for illustrative purposes only, namely to show the intended use of the stud mount, and thus those features shown in phantom form no part of the claimed design. FIG. 2 is a front elevation of the design shown in FIG. 1 as well as the designs for the second and third embodiments shown in FIGS. 8 and 12 respectively; FIG. 3 is a rear elevation of the design shown in FIG. 1 as well as the designs for the second and third embodiments shown in FIGS. 8 and 12 respectively; FIGS. 4 and 5 are side elevation views of the design shown in FIG. 1. FIG. 6 is a top plan view of the design shown in FIG. 1. FIG. 7 is a bottom plan view of the design shown in FIG. 1. FIG. 8 is a perspective view of a second embodiment of the stud mount showing my new design. The exemplary structural stud shown in phantom is for illustrative purposes only, namely to show the intended use of the stud mount, and thus forms no part of the claimed design. FIG. 9 is a side elevation view of the design shown in FIG. 8. Both the right and left sides of this second embodiment are identical. FIG. 10 is a top plan view of the design shown in FIG. 8. FIG. 11 is a bottom plan view of the design shown in FIG. 8.

FIG. 12 is a perspective view of a third embodiment of the stud mount showing my new design. The exemplary structural stud shown in phantom is for illustrative purposes only, namely to show the intended use of the stud mount, and thus forms no part of the claimed design.
FIG. 13 is a side elevation view of the design shown in FIG.
12. Both the right and left sides of this third embodiment are identical.
FIG. 14 is a top plan view of the design shown in FIG. 12; and,
FIG. 15 is a bottom plan view of the design shown in FIG.
