(57) **CLAIM**

The ornamental design for a slider device for a resealable closure for a flexible container, as shown and described.

DESCRIPTION

FIG. 1 is a top isometric view of a slider device for a resealable closure for a flexible container according to the new design.

FIG. 2 is a bottom isometric view of a slider device for a resealable closure for a flexible container according to the new design.

FIG. 3 is a right side elevational view of a slider device for a resealable closure for a flexible container according to the new design, as shown in FIG. 1.

FIG. 4 is a left side elevational view of a slider device for a resealable closure for a flexible container according to the new design, as shown in FIG. 1.

FIG. 5 is a front end elevational view of a slider device for a resealable closure for a flexible container according to the new design, as shown in FIG. 1.

FIG. 6 is a rear end elevational view of a slider device for a resealable closure for a flexible container according to the new design, as shown in FIG. 1.

FIG. 7 is a top plan view of a slider device for a resealable closure for a flexible container according to the new design; and,

FIG. 8 is bottom plan view of a slider device for a resealable closure for a flexible container according to the new design.
