(57) **CLAIM**

The ornamental design for a printing stock for making a sign, as shown and described.

FIG. 1 is a front view of printing stock for making a sign according to a first embodiment with substantially uniform margins;

FIG. 2 is a front view of printing stock for making a sign according to a second embodiment, the only difference with the embodiment in FIG. 1 being that there are registration marks in each of the four corners of a removable label, and FIG. 2 includes an enlarged fragmentary front view of a top right corner of the printing stock;

FIG. 3 is a front view of printing stock for making a sign according to a third embodiment, the only difference with the embodiment of FIG. 2 being that the registration marks have a different configuration, and FIG. 3 includes an enlarged fragmentary front view of a top right corner of the printing stock;

FIG. 4 is a front view of printing stock for making a sign according to a fourth embodiment, the only difference with the embodiment of FIG. 2 being that the registration marks have a still different configuration, and FIG. 4 includes an enlarged fragmentary front view of a top right corner of the printing stock;

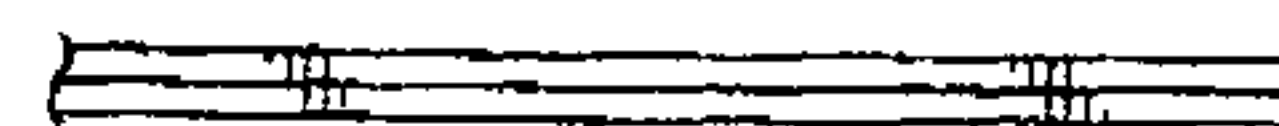

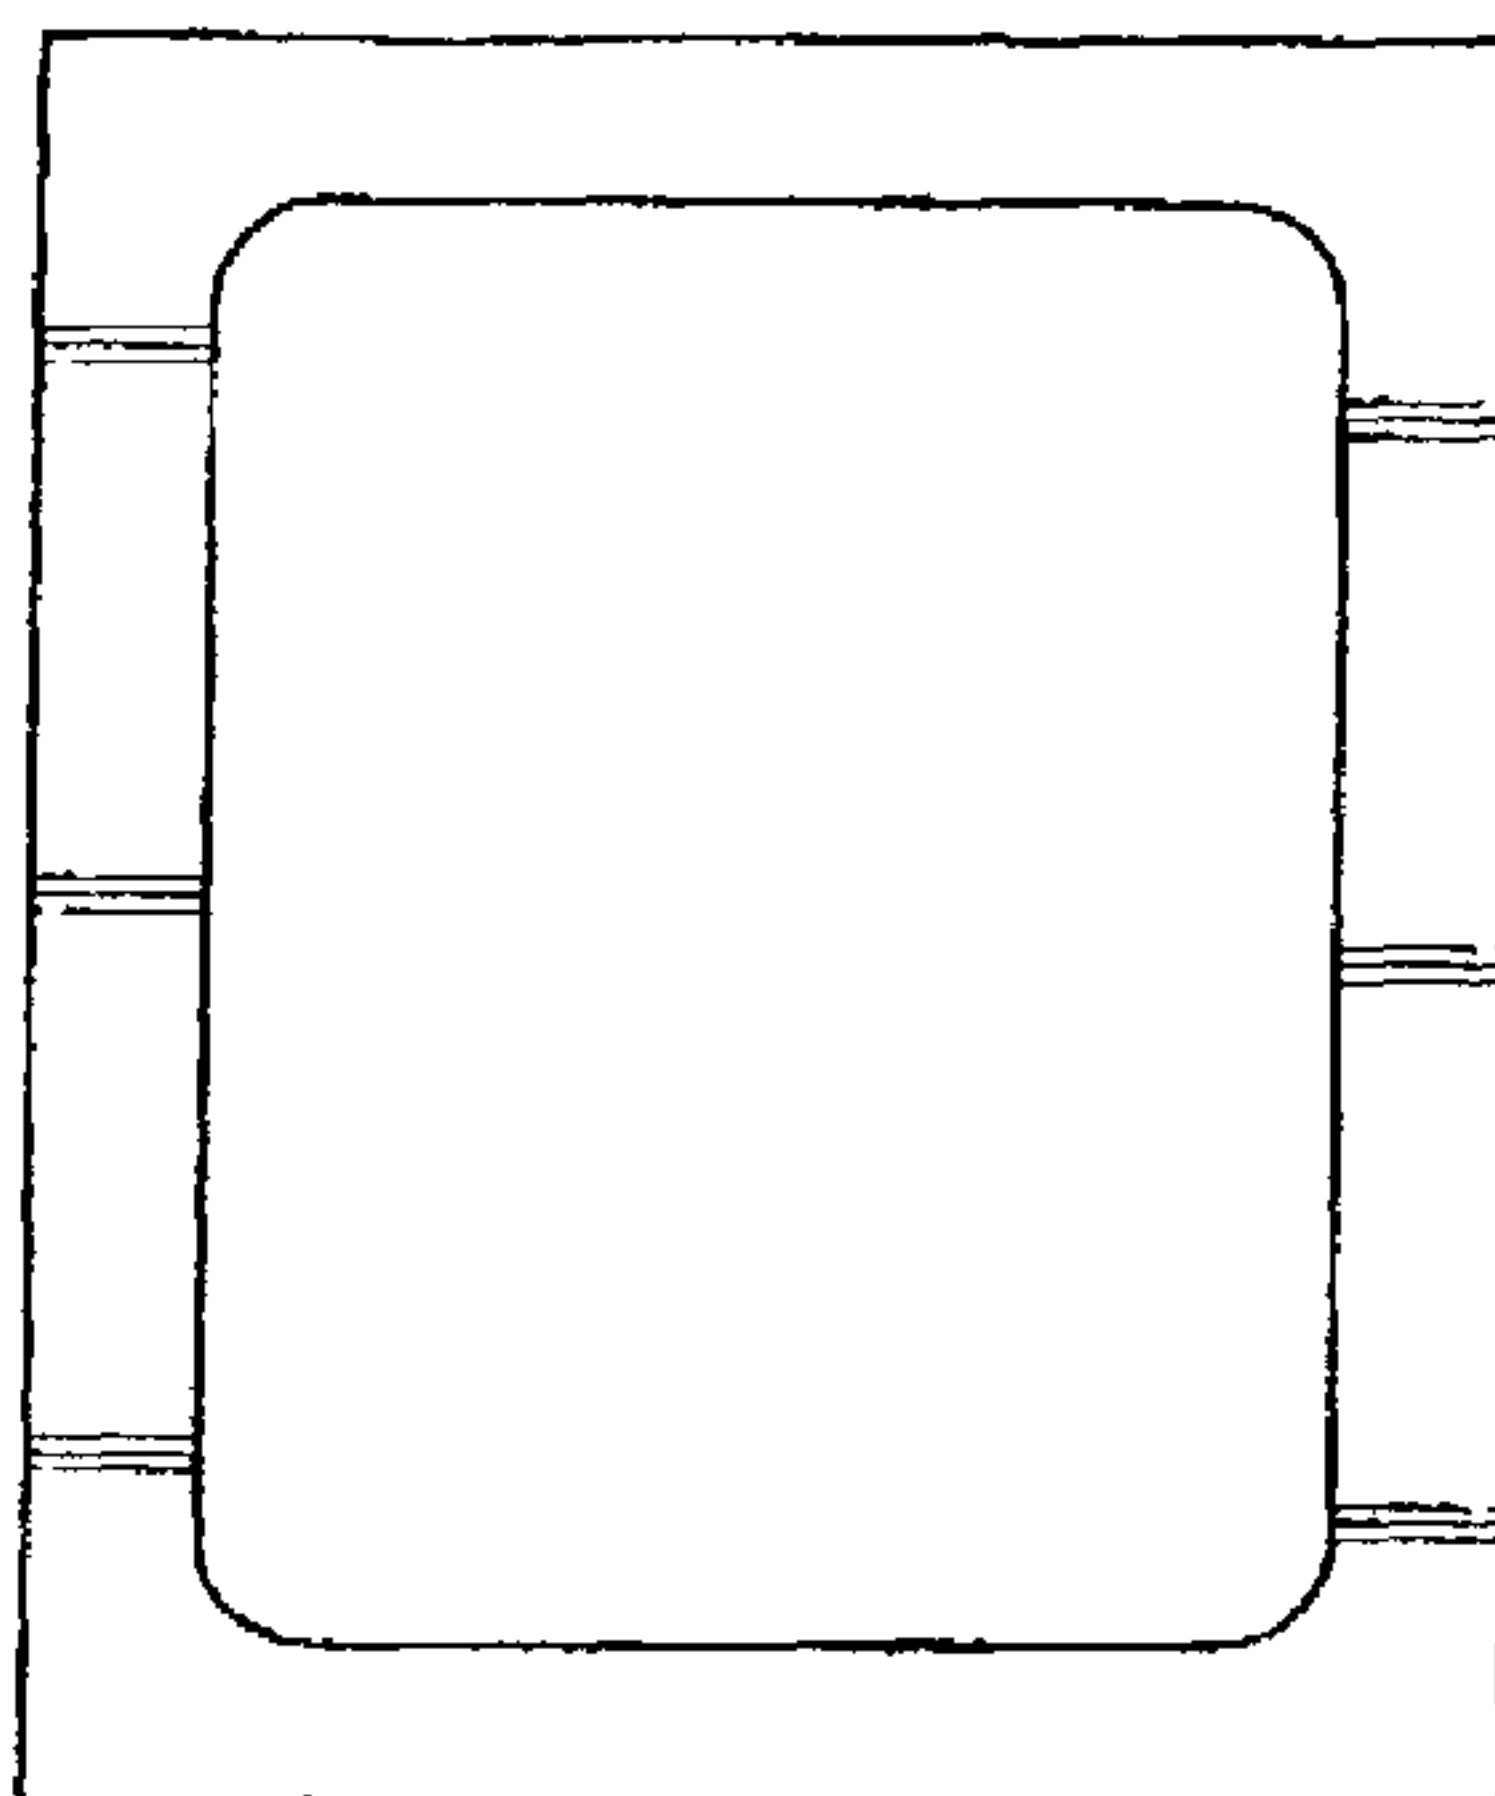

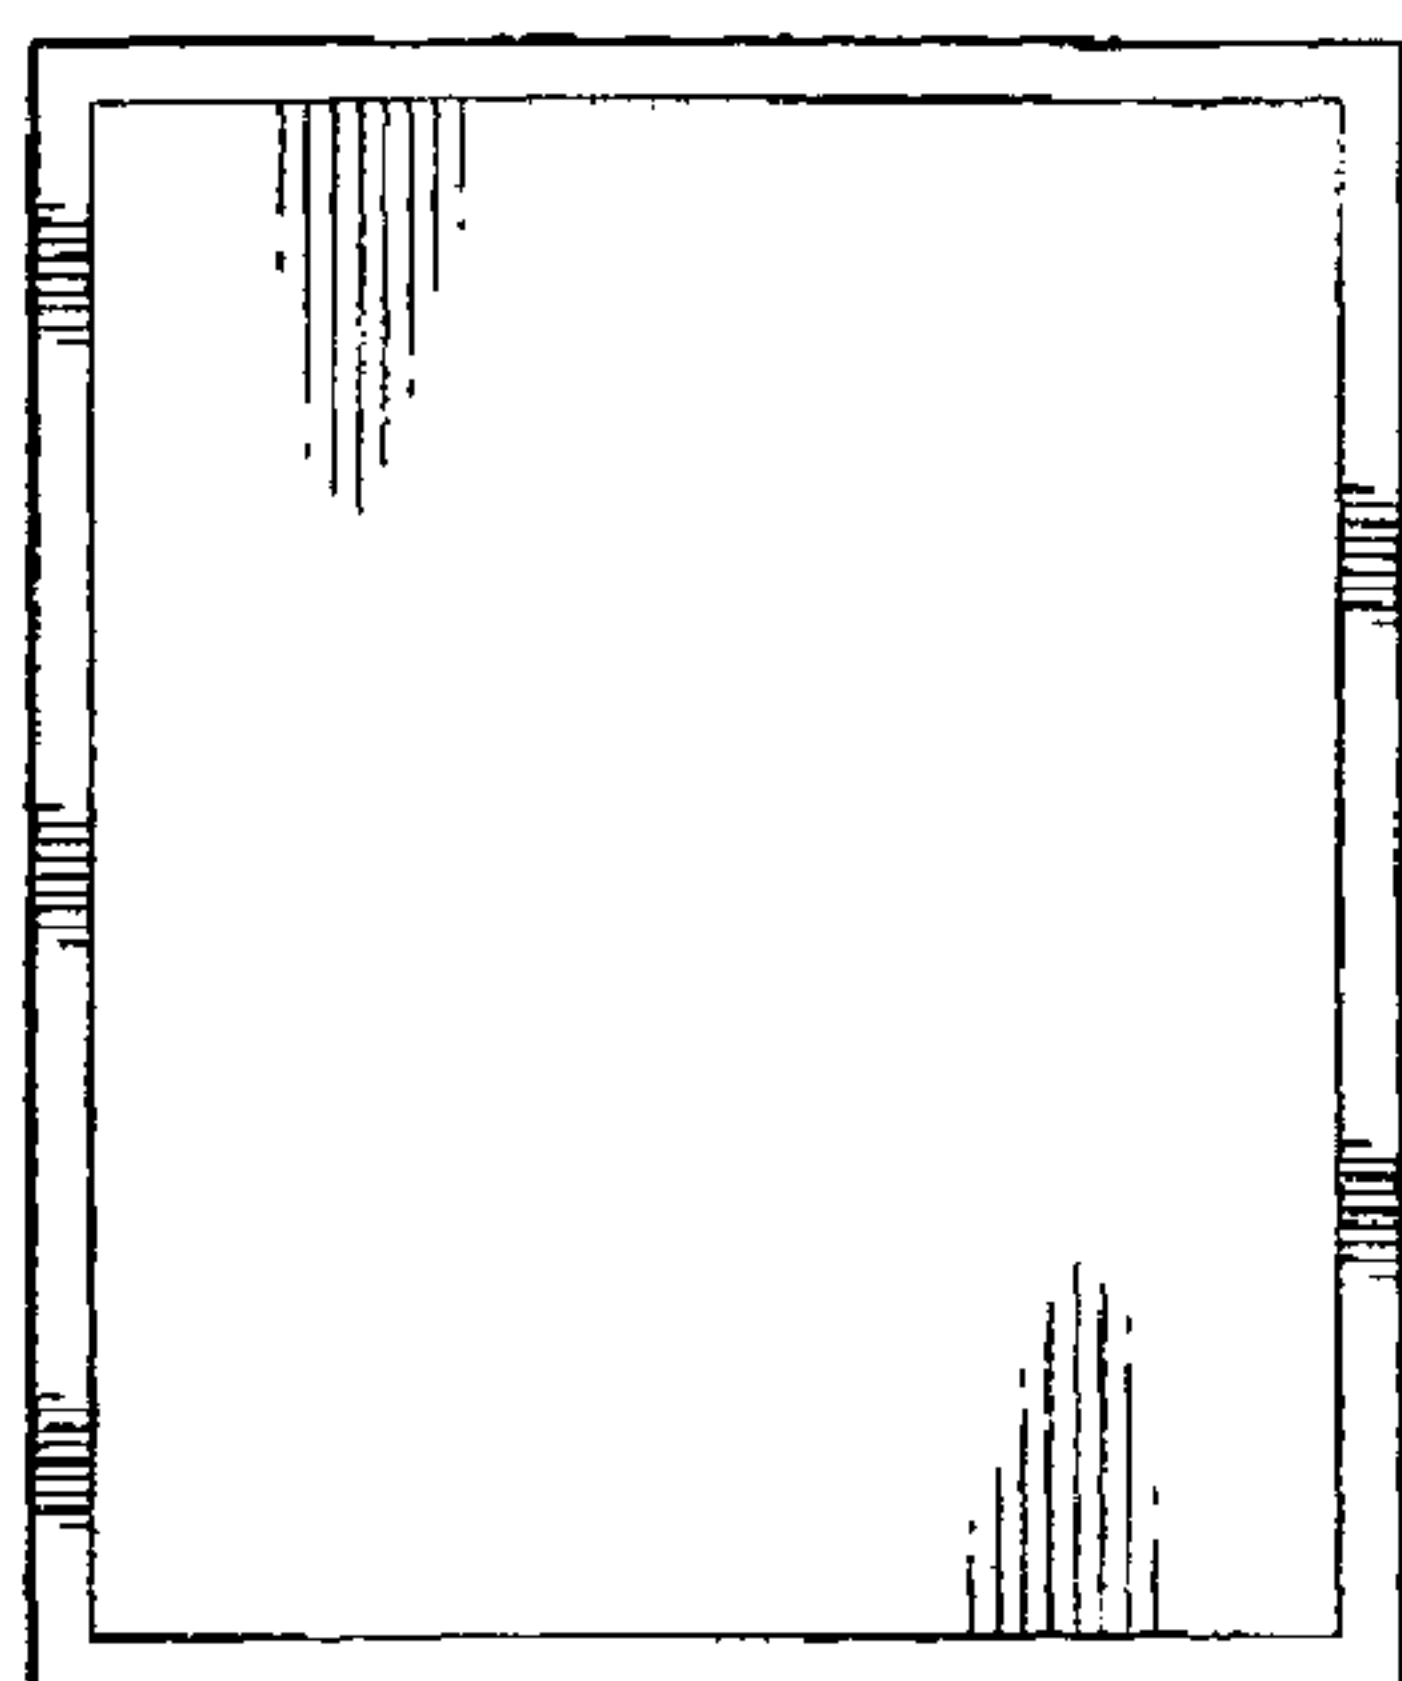

FIG. 5 is a front view of printing stock for making a sign according to a fifth embodiment, the only difference with the embodiment of FIG. 2 being that the registration marks have yet another different configuration, and FIG. 5 includes an enlarged fragmentary front view of a top right corner of the printing stock;

FIG. 6 is a front view of printing stock for making a sign according to a sixth embodiment, the only difference with the embodiment of FIG. 2 being that the registration marks have still another different configuration, and FIG. 6 includes an enlarged fragmentary front view of a top right corner of the printing stock;

FIG. 7 is a back view of printing stock for making a sign; and,

FIG. 8 is a fragmentary side view of a top side, a bottom side, a right side, and a left side of printing stock for making a sign.
