(57) **CLAIM**

The ornamental design for a rotary clothes dryer, as shown and described.

**DESCRIPTION**

FIG. 1 is a front left side elevational view of a rotary clothes dryer in an open configuration showing my new design;

FIG. 2 is a left side elevational view thereof;

FIG. 3 is front right side elevational view of an intermediate portion thereof;

FIG. 4 is a front left side elevational view of an upper portion of the rotary clothes dryer, with the rotary clothes dryer in the open configuration;

FIG. 5 is a front left side elevational view of the rotary clothes dryer in a closed configuration;

FIG. 6 is a left side elevational view of the rotary clothes dryer of FIG. 5;

FIG. 7 is an enlarged front right side elevational view of the intermediate portion of FIG. 5, substantially adjacent to a lower portion of the rotary clothes dryer, shown separately for clarity of disclosure, with said clothes dryer in the closed configuration;

FIG. 8 is an enlarged front left side elevational view of the lower portion spaced apart from the intermediate portion, shown separately for clarity of disclosure, thereof;

FIG. 9 is an enlarged top right side perspective view of the intermediate portion substantially adjacent to the lower portion as in FIG. 7, shown separately for clarity of disclosure;

FIG. 10 is an enlarged top front perspective view of a top portion of FIG. 5 of the rotary clothes dryer shown separately for clarity of disclosure, in the closed configuration,

FIG. 11 is a top front left side perspective view of an alternative embodiment of the rotary clothes dryer in a closed configuration;

FIG. 12 is a top front right side perspective view of the alternative embodiment of the rotary clothes dryer in FIG. 11 in an open configuration;

FIG. 13 is a top plan view of the rotary clothes dryer of FIG. 5 in the closed configuration; and,

FIG. 14 is a top plan view of the alternative embodiment of the rotary clothes dryer of FIG. 12 in the open configuration.
