(57) **CLAIM**

The ornamental design for a cane holder, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of the cane holder, without a cane, showing our new design, where the broken lines show a pegboard mounting device.

FIG. 2 is a side elevational view thereof, without a cane, the opposite side being a mirror image thereof, the broken lines showing a clamp mounting device.

FIG. 3 is a side elevational view thereof with a cane shown in broken lines, the opposite side being a mirror image thereof, the broken lines showing the clamp mounting device shown in FIG. 2.

FIG. 4 is a top plan view thereof, without a cane, the opposite side being a mirror image thereof, the broken lines showing an adhesive mounting device.

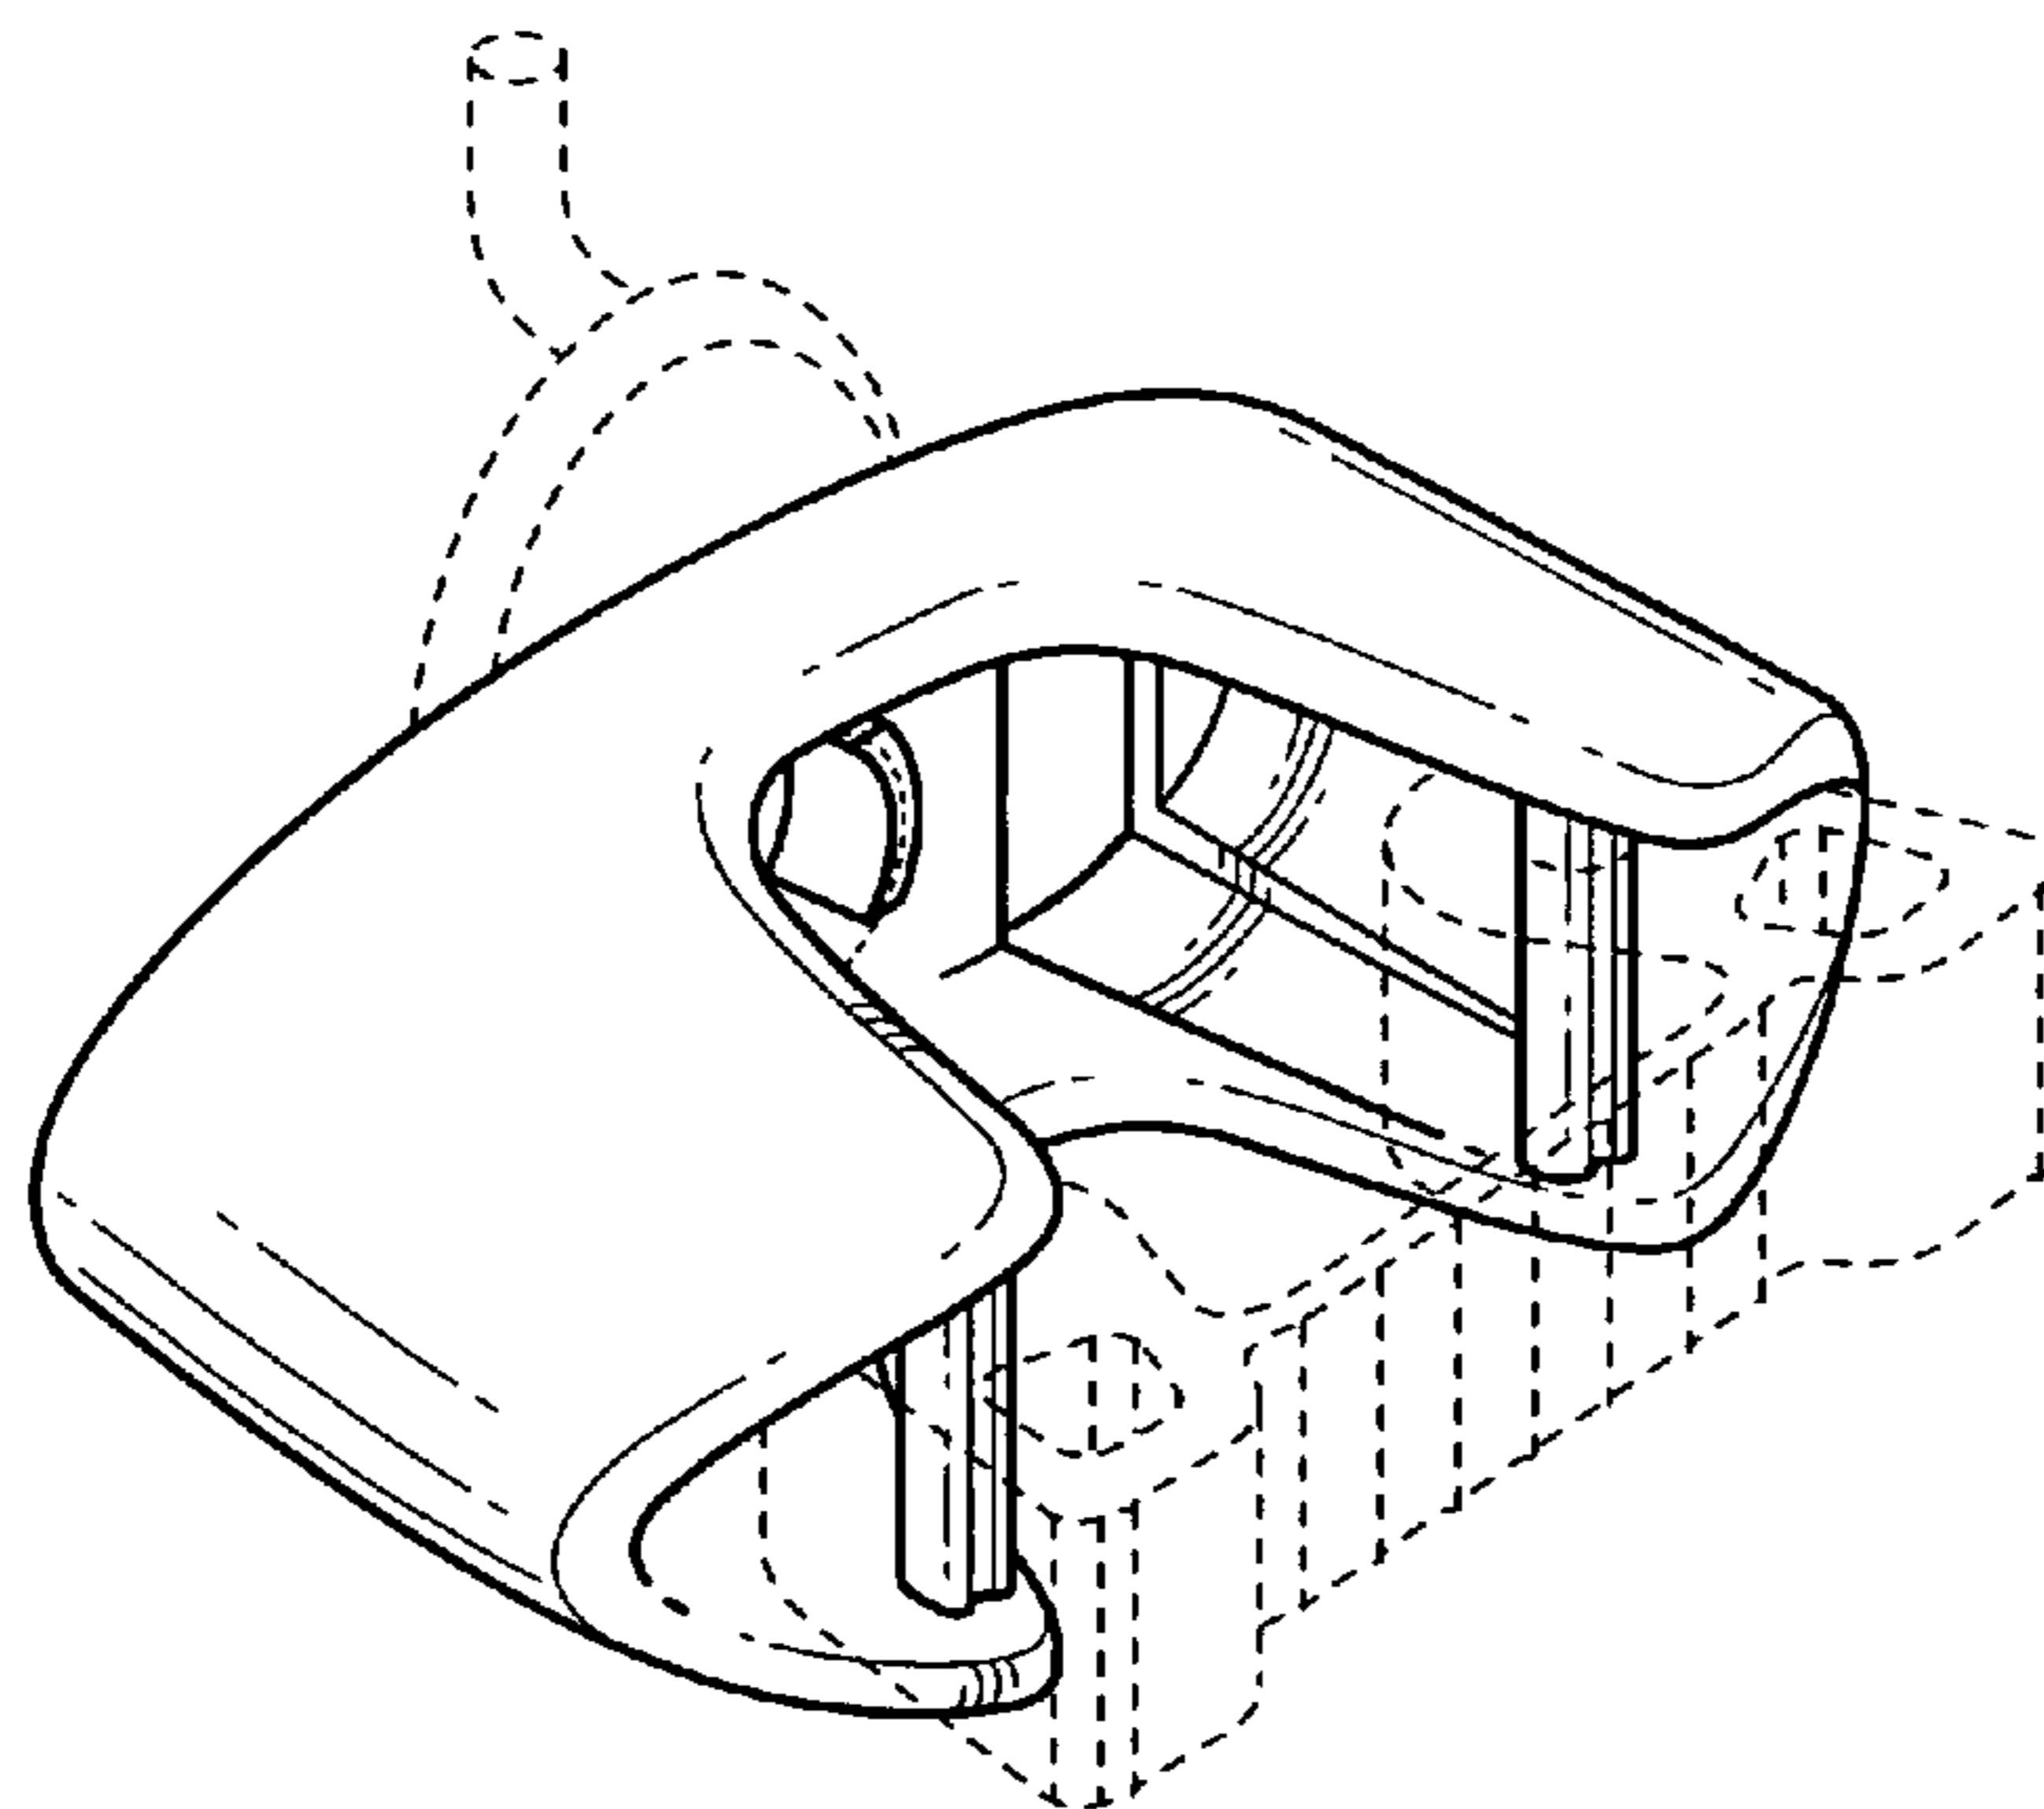

FIG. 5 is a top plan view thereof with a cane shown in broken lines, the opposite side being a mirror image thereof, the broken lines showing the adhesive mounting device shown in FIG. 4.

FIG. 6 is a rear elevational view thereof, the broken lines showing the adhesive mounting device shown in FIG. 4; and,

FIG. 7 is a front elevational view thereof, the broken lines showing a channel-engaging mounting device.

The broken line showing of the environment is for illustrative purposes only and forms no part of the claimed design.
