(57) **CLAIM**

The ornamental design for a vehicle assembly with tracks, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a vehicle assembly with tracks in accordance with a preferred embodiment of the present invention;

FIG. 2 is a side view of a vehicle assembly with tracks in accordance with a preferred embodiment of the present invention;

FIG. 3 is a front view of a vehicle assembly with tracks in accordance with a preferred embodiment of the present invention;

FIG. 4 is a rear view of a vehicle assembly with tracks in accordance with a preferred embodiment of the present invention; and,

FIG. 5 is a top view of a vehicle assembly with tracks in accordance with a preferred embodiment of the present invention.

The broken lines, including for the styling lines, the track module, the seat, the roll bar, the environmental enclosure module, and the steering controls illustrate the environment of the design. While a large drive wheel dominates the track design, the exact configuration of the tracks is not part of the claimed design.
