(57)CLAIM

The ornamental design for an air turbine handpiece, as shown and described.

DESCRIPTION

The air turbine handpiece may be used for dental techniques.

FIG. 1 is a front view of the air turbine handpiece;

FIG. 2 is a right side view of the air turbine handpiece of FIG. 1;

FIG. 3 is a left side view of the air turbine handpiece of FIG. 1;

FIG. 4 is a plan view of the air turbine handpiece of FIG. 1;

FIG. 5 is a bottom view of the air turbine handpiece of FIG.

FIG. 6 is a perspective view of the air turbine handpiece of FIG. **1**; and,

FIG. 7 is a referential view of the air turbine handpiece of FIG. 1, with a bur attached.

The rear view is omitted because it is represented symmetrically to the front view.

The bur attachment of FIG. 7 is not part of the claimed design, but is represented to show the environment in which the design is associated.
