Primary Examiner—Clare E Heflin

(57) **CLAIM**

The ornamental design for a racked pool balls-simulating lighting fixture, as shown and described.

DESCRIPTION

FIG. 1 is a top-side perspective view of a racked pool balls-simulating lighting fixture showing my new design;

FIG. 2 is a right side elevational view thereof, the left side being substantially a mirror image;

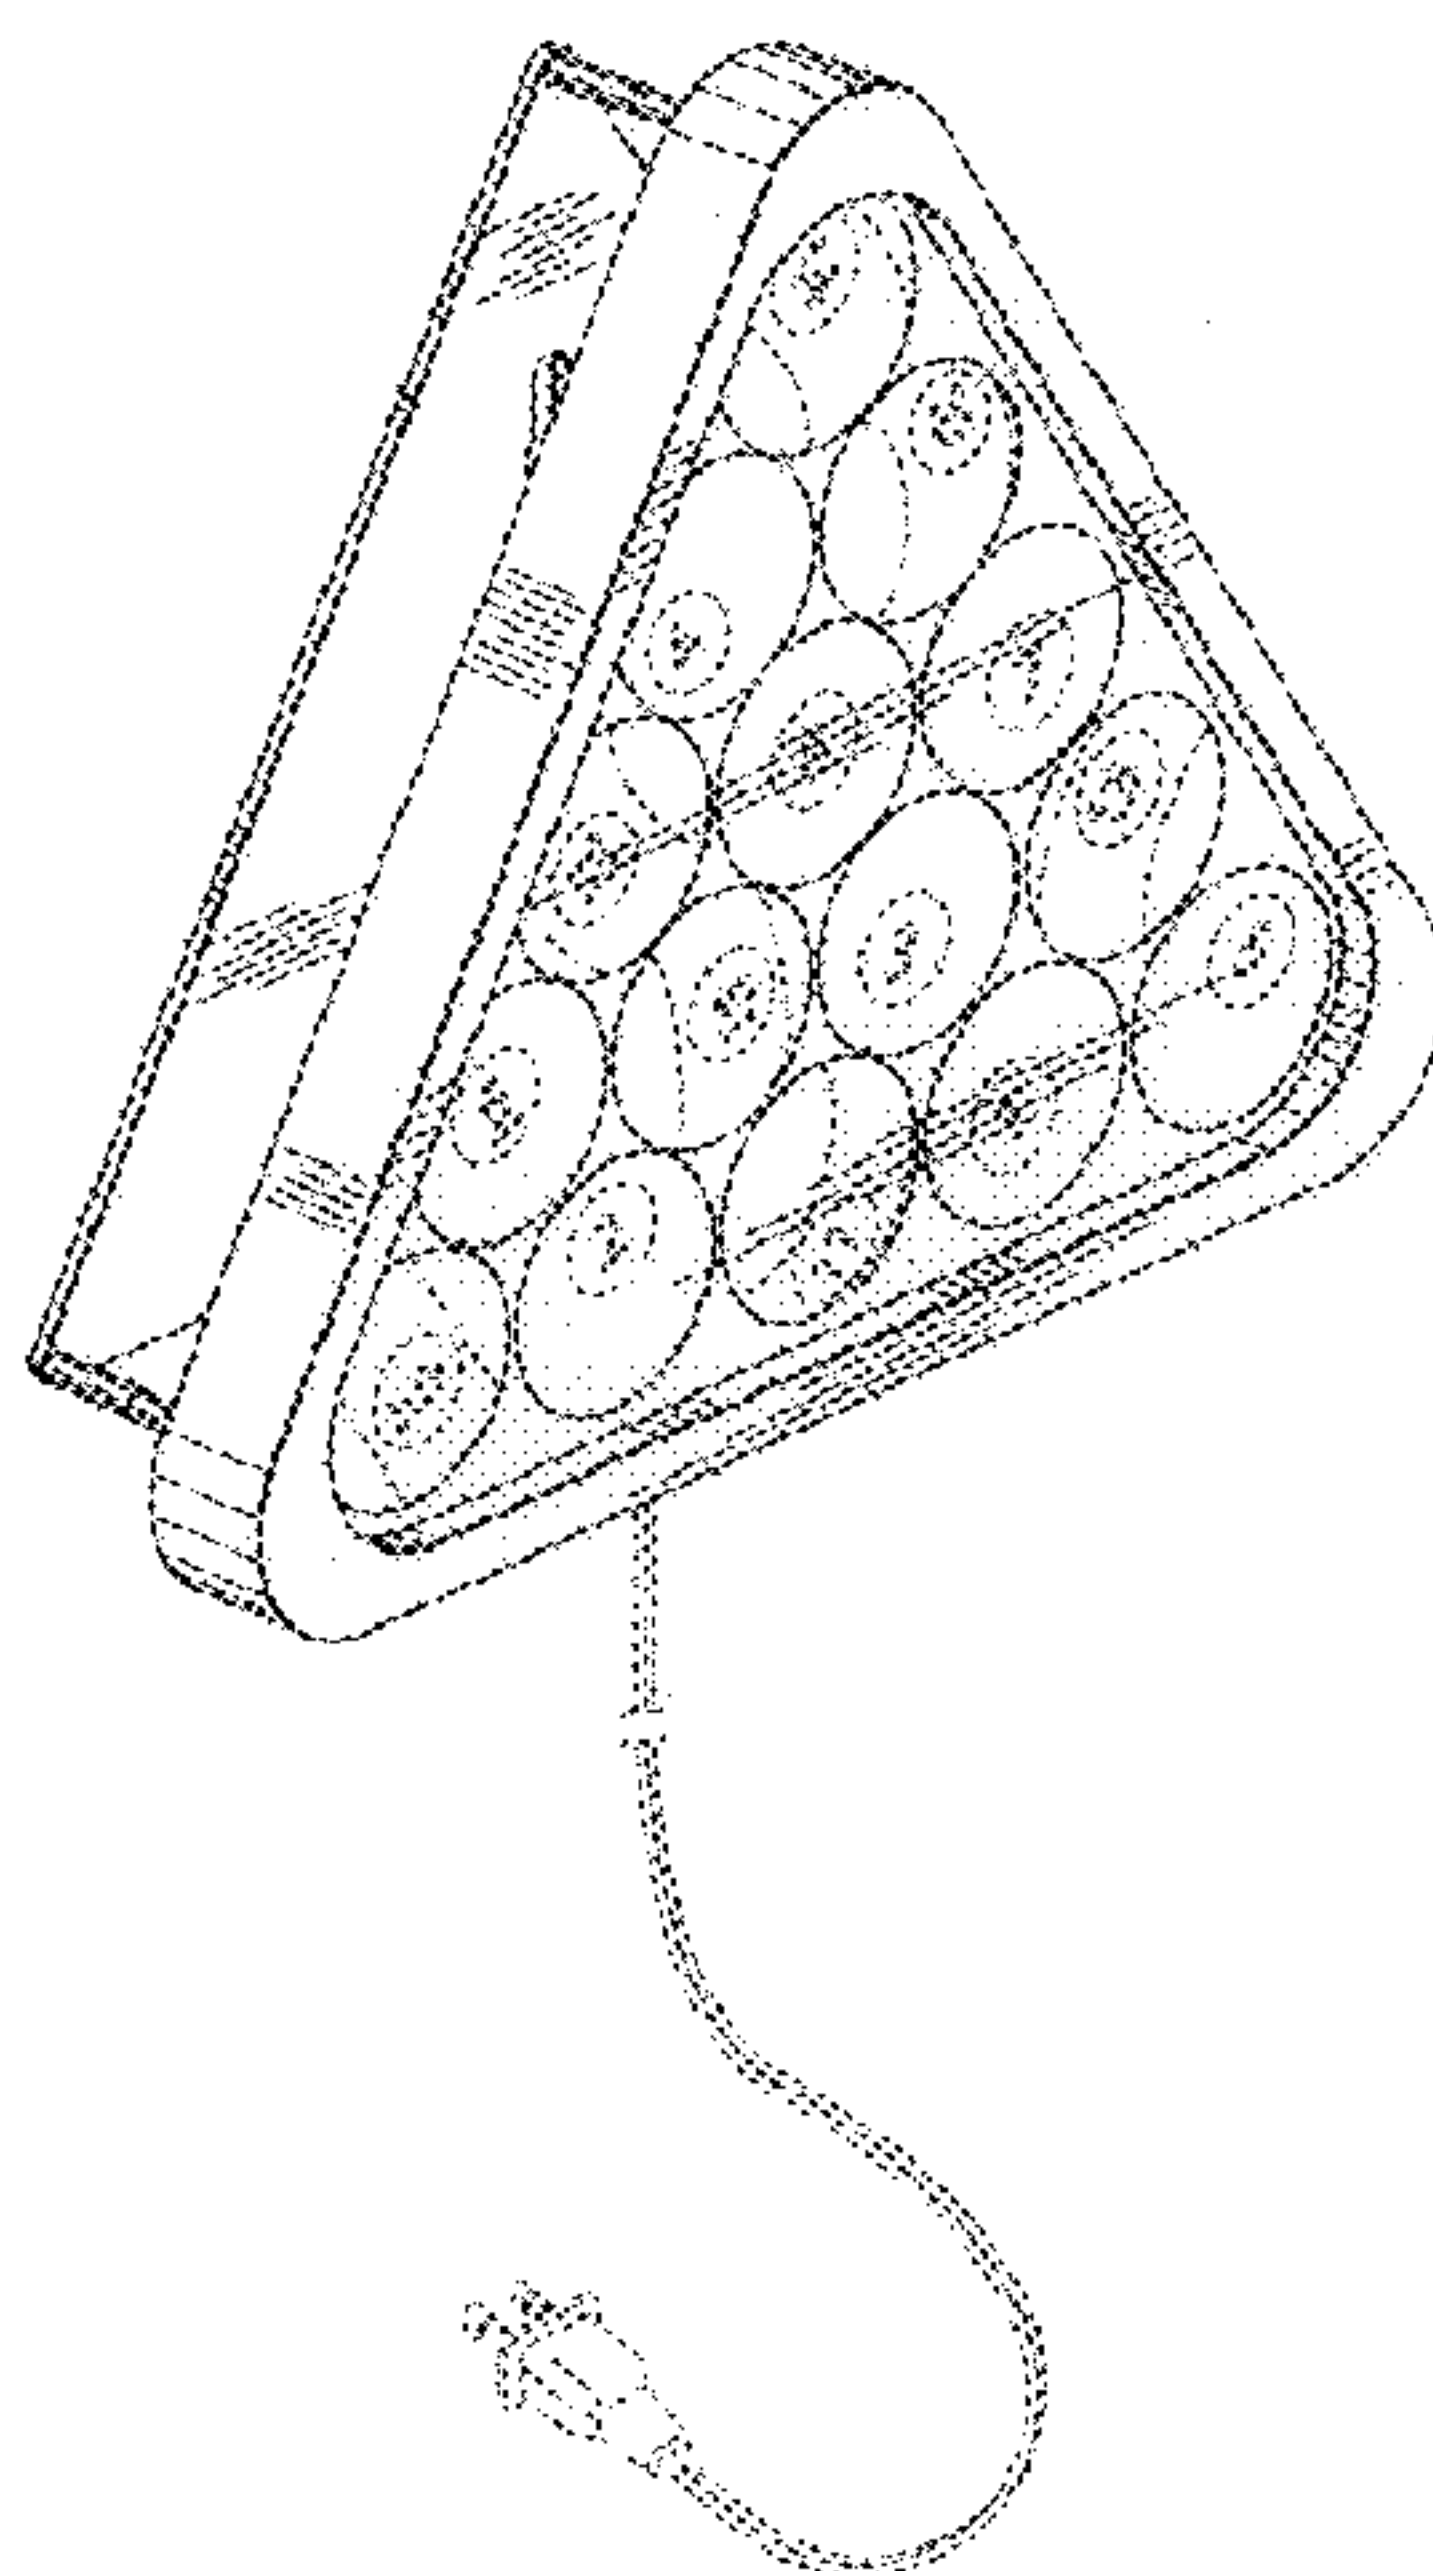

FIG. 3 is a front elevational view, the opposite (rear) view being plain and unornamented;

FIG. 4 is a top plan view thereof; and,

FIG. 5 is a bottom plan view thereof.

The portions of the drawings representing electrical light components by broken line are intended to reflect environment, and do not form a part of the indicated embodiment of my design. The dotted lines on the representations of the pool balls are provided to simulate the numbers and markings on pool balls, but the exact order in which particularly numbered pool balls are placed within the simulated rack does not form a part of my design.
