(57) **CLAIM**

The ornamental design for video game controller with rotational element, as shown and described.

**DESCRIPTION**

FIG. 1 is rear elevational view of the video game controller with rotational element according to the invention, showing our new ornamental design;

FIG. 2 is a top plan view thereof;

FIG. 3 is a front elevational view thereof;

FIG. 4 is a left side elevational view thereof;

FIG. 5 is a right side elevational view thereof;

FIG. 6 is rear elevational view of the video game controller with the rotational element in another position;

FIG. 7 is a top plan view of the video game controller with the rotational element positioned as shown in FIG. 6;

FIG. 8 is a front elevational view of the video game controller with the rotational element positioned as shown in FIG. 6;

FIG. 9 is a left side elevational view of the video game controller with the rotational element positioned as shown in FIG. 6;

FIG. 10 is a right side elevational view of the video game controller with the rotational element positioned as shown in FIG. 6;

FIG. 11 is a rear elevational view of the video game controller with the rotational element in yet another position;

FIG. 12 is a top plan view of the video game controller with the rotational element in still another position;

FIG. 13 is a front elevational view of the video game controller with the rotational element positioned as shown in FIG. 11;

FIG. 14 is a left side elevational view of the video game controller with the rotational element positioned as shown in FIG. 11;

FIG. 15 is a right side elevational view of the video game controller with the rotational element positioned as shown in FIG. 11; and,

FIG. 16 is a side perspective view of the video game controller with the rotational element positioned as shown in FIG. 1.

Shading does not form part of the claimed design, except for purposes of indicating physical contours.

The bottoms of the video game controller with rotational element are plain and include no surface ornamentation.
