(57) **CLAIM**

The ornamental design for a side view mirror, as shown and described.

DESCRIPTION

FIG. 1 is a right side perspective view of a first embodiment side view mirror in accordance with the present invention, wherein a left side perspective view of a second embodiment side view mirror in accordance with the present invention is a mirror image thereof;

FIG. 2 is a front perspective view of the first embodiment side view mirror, wherein a front perspective view of the second embodiment side view mirror is a mirror image thereof;

FIG. 3 is a rear perspective view of the first embodiment side view mirror, wherein a rear perspective view of the second embodiment side view mirror is a mirror image thereof;

FIG. 4 is a right side elevation view of the first embodiment side view mirror, wherein a left side elevation view of the second embodiment side view mirror is a mirror image thereof;

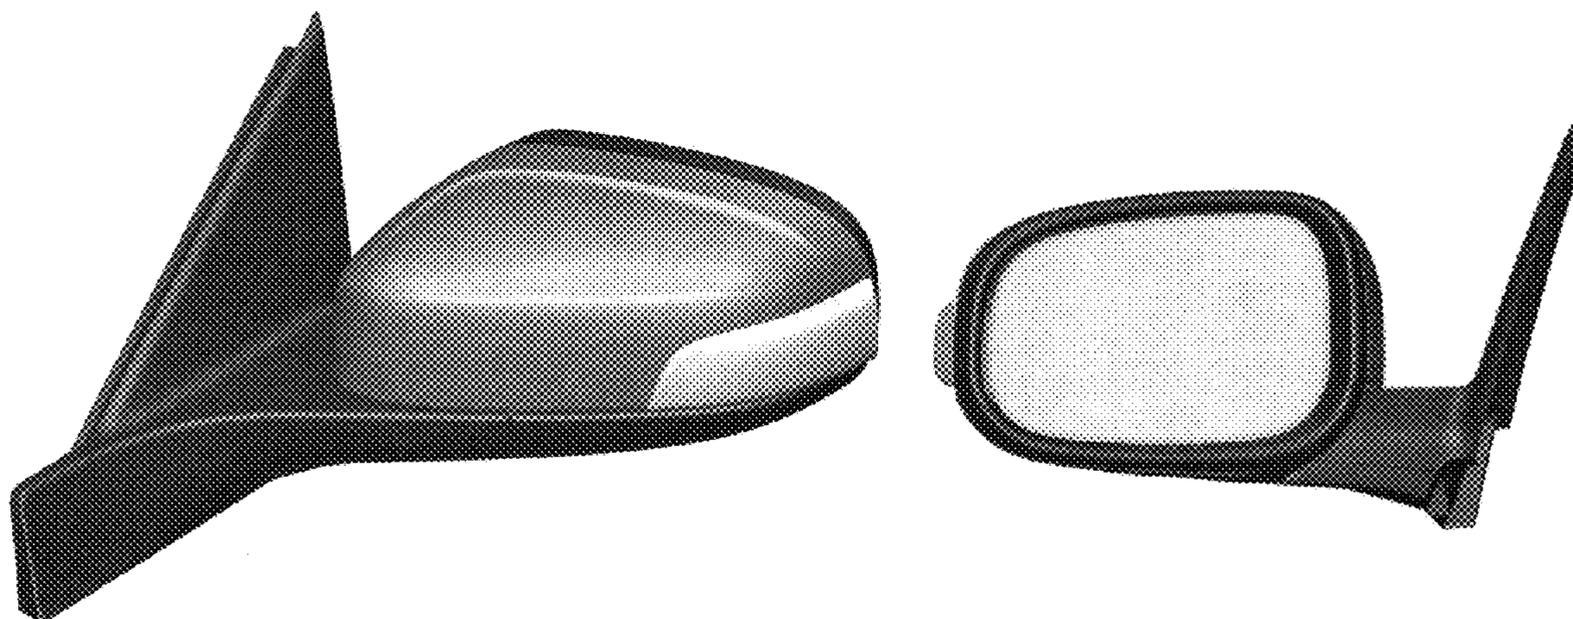

FIG. 5 is a front side elevation view of the first embodiment side view mirror, wherein a front side elevation view of the second embodiment side view mirror is a mirror image thereof;

FIG. 6 is a rear side elevation view of the first embodiment side view mirror, wherein a rear side elevation view of the second embodiment side view mirror is a mirror image thereof;

FIG. 7 is a top plan view of a portion of the first embodiment side view mirror, wherein a top plan view of a portion of the second embodiment side view mirror is a mirror image thereof; and,

FIG. 8 is a bottom side elevation view of the first embodiment side view mirror, wherein a bottom side elevation view of the second embodiment side view mirror is a mirror image thereof.
