(57) **CLAIM**

The ornamental design for a pneumatic tire, as shown and described.

**DESCRIPTION**

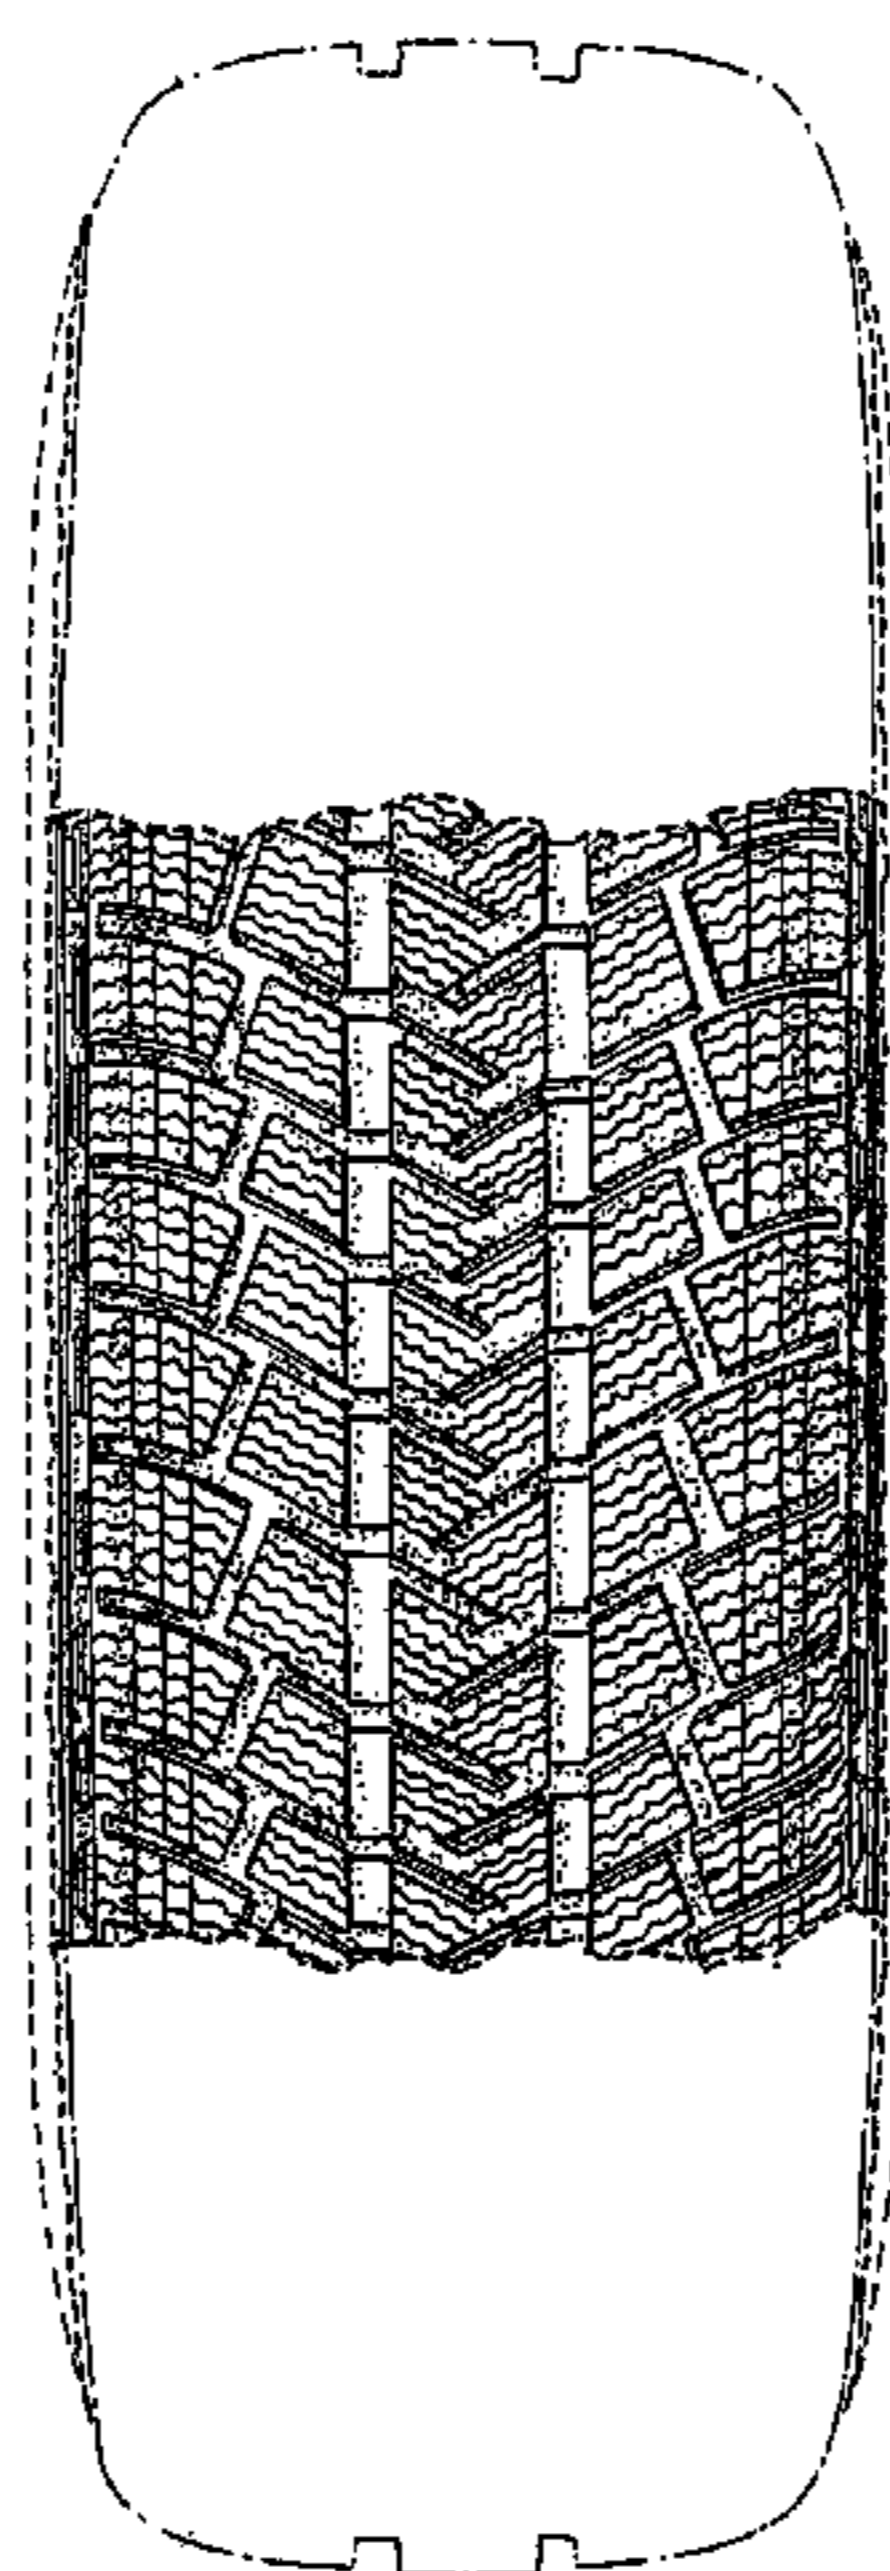

FIG. 1 is a perspective view of one side of a pneumatic tire showing my new design, it being understood that the tread pattern repeats uniformly throughout the circumference of the tire as indicated schematically by the dash-dot-dash broken lines in the drawing, and that the opposite side elevational view is a mirror image of that shown;

FIG. 2 is a reduced scale, left side elevational view thereof, the opposite side elevational view being a mirror image thereof; and,

FIG. 3 is a front elevational view thereof.

In the drawings, the evenly-spaced broken lines represent unclaimed environmental subject matter.
