(57) **CLAIM**

The ornamental design for a work glove with reinforced, slip-preventive palm, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view, from an upper or inner side position of the top or back-of-the-hand of the work glove design of the present invention having a reinforced, slip-preventive palm and a rearwardly extending cuff or sleeve portion;

FIG. 2 is a perspective view, from a lower or outer side position of the top or back-of-the-hand of the inventive work glove design of FIG. 1;

FIG. 3 is a top or back-of-the-hand, palm down view of the inventive work glove design of FIG. 1;

FIG. 4 is a palm-up or palm face view of the inventive work glove design of FIG. 1, showing the reinforced, slip-preventive palm;

FIG. 5 is a front or finger tip, palm down view of the inventive work glove design of FIG. 1, showing the reinforced, slip-preventive palm;

FIG. 6 is a rear or cuff, palm down view, of the inventive work glove design of FIG. 1, showing the reinforced slip-preventive palm;

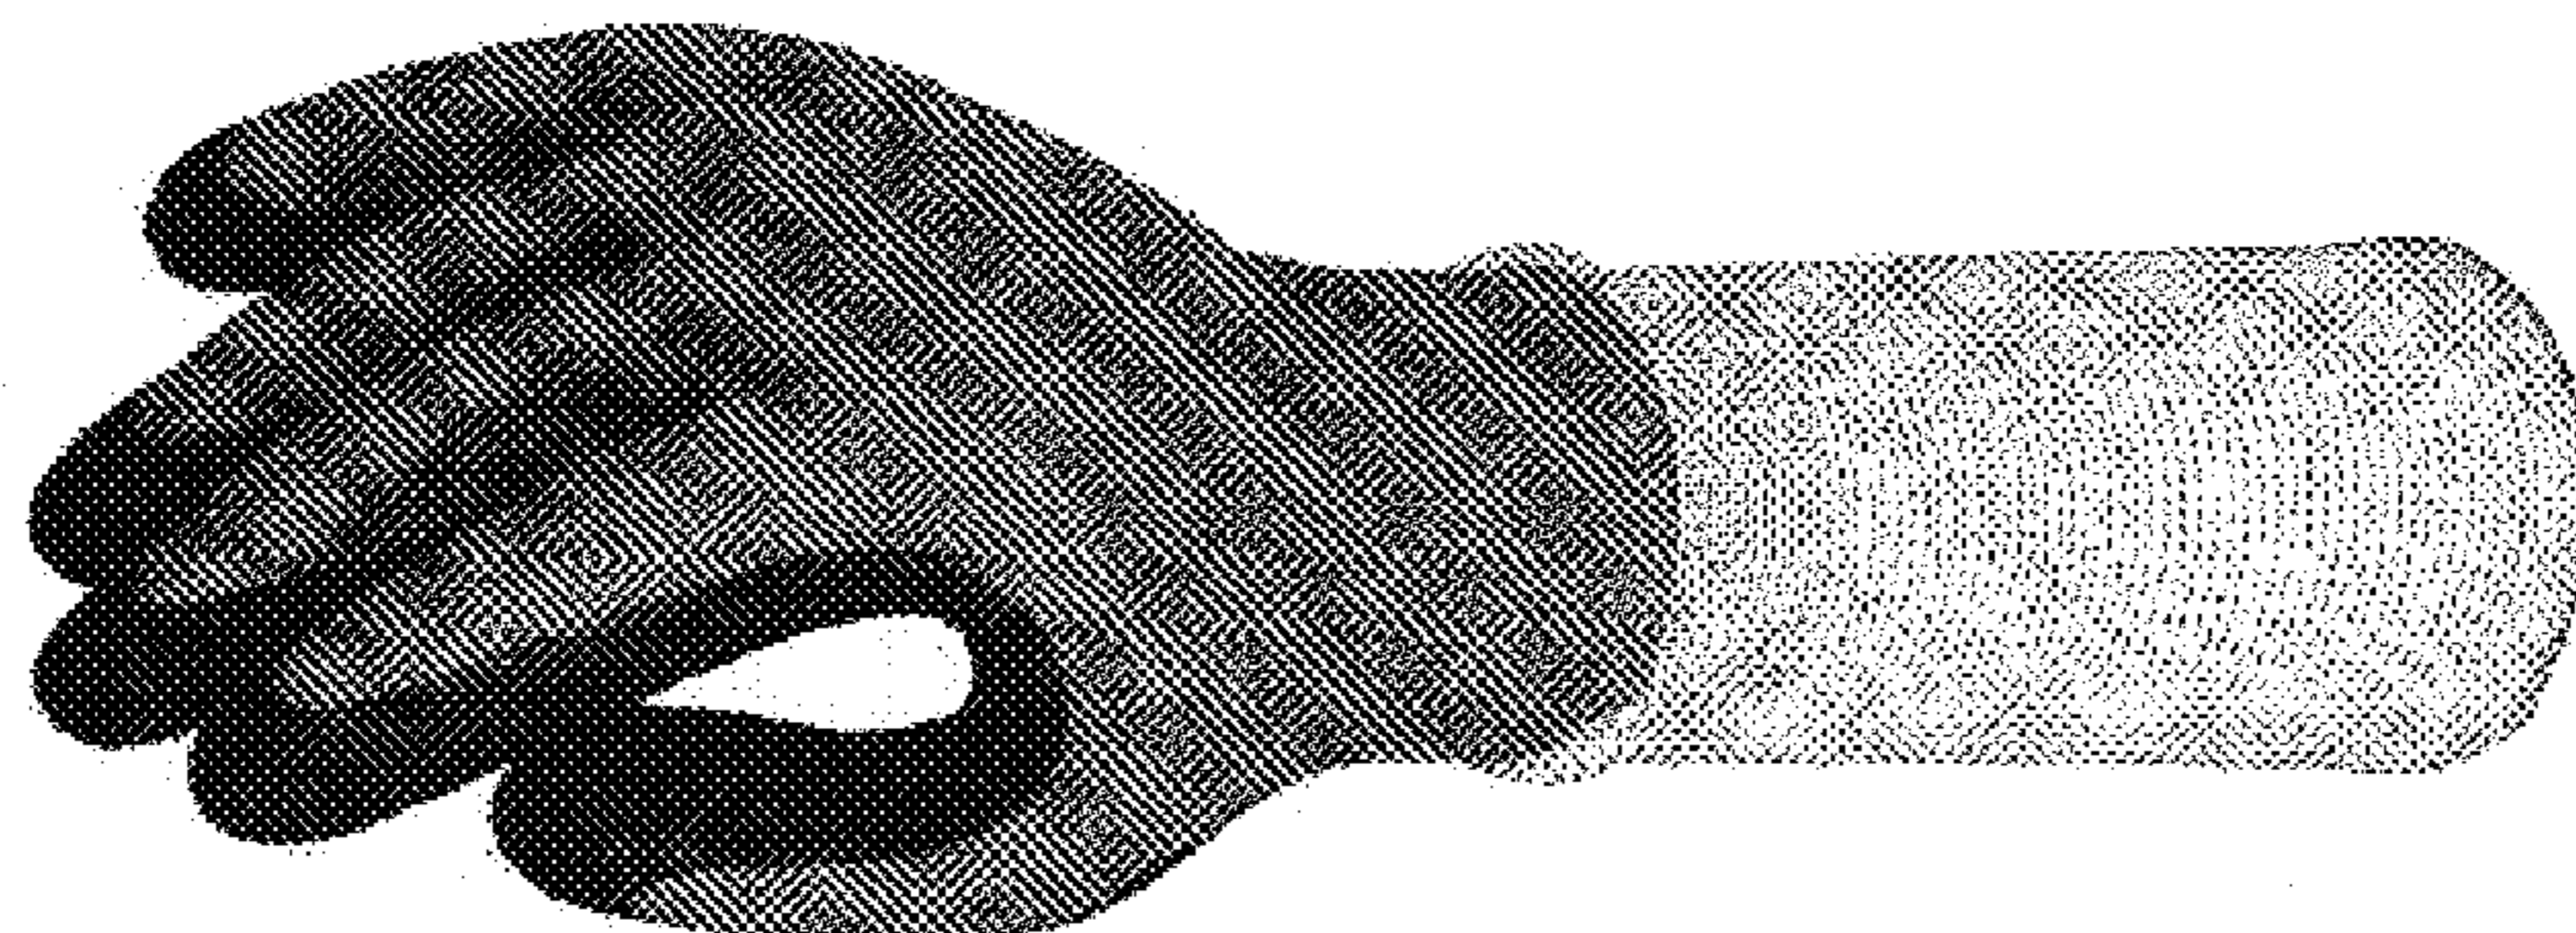

FIG. 7 is an outer side or edge, palm down view, of the inventive work glove design of FIG. 1, showing the reinforced, slip-preventive palm;

FIG. 8 is an inner side or thumb side, palm down view, of the inventive work glove design of FIG. 1, showing the reinforced, slip-preventive palm; and,

FIG. 9 is a palm-up or palm face view of the inventive work glove design of FIG. 1, but at an angle between that of FIGS. 4 and 8, respectively, so that the outer surface of the thumb also shows.

All FIGS. 1-9 respectively, above, illustrate a right hand work glove design of the present invention having a reinforced, slip-preventive palm face and a rearwardly extending cuff or sleeve portion, but it is to be understood that the invention of this application includes left hand work glove designs having a reinforced, slip-preventive palm face, which would be illustrated as mirror images of any or all of the views shown in FIGS. 1-9, respectively, herein.
