(57) **CLAIM**

The ornamental design of a panel controller, as shown and described.

DESCRIPTION

The present article is a panel controller for mainly vehicle-mounted applications, which is comprised of a liquid crystal display and a cradle for holding the liquid crystal display, wherein a liquid crystal screen provided at the front of the liquid crystal display is equipped with a touch panel. In the present article the liquid crystal can be removed from the cradle so that the liquid display can be carried.

FIG. **1** is a front elevational view of a panel controller of the present invention.

FIG. **2** is a rear elevational view of the panel controller of FIG. **1**.

FIG. **3** is a left-side elevational view of the panel controller of FIG. **1**.

FIG. **4** is a right-side elevational view of the panel controller of FIG. **1**.

FIG. **5** is a top plan view of the panel controller of FIG. **1**. Broken lines are included for illustrative purposes only and form no part of the claimed design.

FIG. **6** is a bottom plan view of the panel controller of FIG. **1**; and,

FIG. **7** is a perspective view of the panel controller of FIG. **1**.
