(57) **CLAIM**

I claim the ornamental design for a reaction block for chemical synthesis for use upon a hot plate stirrer, as shown and described.

DESCRIPTION

FIG. **1** is a top perspective view of a reaction block for chemical synthesis for use upon a hot plate stirrer showing my new design;

FIG. **2** is a top plan view thereof;

FIG. **3** is a bottom plan view thereof;

FIG. **4** is a front side elevation view thereof;

FIG. **5** is a rear side elevation thereof;

FIG. **6** is a left side elevation view thereof; and,

FIG. **7** is a right side elevation view thereof.

The broken lines in the drawings, FIGS. **1**–**3**, are for illustrative purposes only and form no part of the claimed design.

The characteristic feature of the design resides in a round reaction block for accepting round bottom flasks and adapters.
